January, 1956

TABLE OF CONTENTS

	Page	Russ. page
1. Heterotriacids. V. Heterotriacids of Phosphorus and Silicon with Varying Composition of Addends, Containing Molybdenum and Tungsten. A. I. Kokorin and N. A. Polotebnova	1	1
2. Preparation of Silicotungstic Acid Without the Use of Ether. E. A. Nikitina, G. N. Pyatnitskaya and I. I. Angelov	9	10
3. Ammonium-Calcium Octoborate. A. F. Ievinsh, Ya. K. Ozol and S. G. Vimba	15	17
4. Irreversible Reciprocal Systems of the Singular Type with Layering from Chlorides and Nitrates of Potassium and Silver, and Bromides and Nitrates of Potassium and Silver. G. M. Lifshits	19	20
5. Dipole Moments of Some Complex Compounds of Indium and Thallium Trihalides. I. A. Sheka	25	26
6. Formation of Sulfides in the Reaction of Ferrous Sulfide with Metal Oxides. I. Reaction of FeS with Al_2O_3 in Presence of Carbon. Zh. L. Vert and M. V. Kamentsev	29	30
7. Study of Vanadyl Tartrate Complexes. V. L. Zolotavin and N. I. Sintsov	33	34
8. Investigation of Aqueous Solutions of Dibasic Organic Acids. A. A. Glagoleva	39	41
9. Synthesis of Triethylcarbinol and 3-Ethylpentene-2 from EthylMagnesium Bromide and Carbon Dioxide. A. L. Liberman, T. V. Lapshina and B. A. Kazansky	43	46
10. Conjugated Systems. LIX. Condensation of γ-Vinylpyridine with Diene Hydrocarbons. A. A. Petrov and V. Lyudvig	49	51
11. The Synthesis of Nerol and Geraniol. G. I. Samokhvalov, M. A. Miropolskaya and N. A. Preobrazhensky	53	54
12. Configuration and Properties of Unsaturated Acids and Their Derivatives. IV. Oxidation of Octadecenoic Acids and Their Esters by Benzoyl Hydroperoxide. A. K. Plisov and N. S. Skornyakova	57	59
13. Compounds Containing a Three-Membered Oxide Ring. XV. Study of the Reaction of the Ethyl Ester of β-Methyl-β-Propylglycidic Acid with Aniline. V. F. Martynov and Ya. A. Kastron	61	63
14. Synthesis of Thiazole Derivatives with the Help of Organolithium Compounds. B. M. Mikhailov and V. P. Bronovitskaya	65	66
15. Reaction of the Ethyl Ester of Chloroindanedione-Carboxylic Acid with Primary Amines. G. Ya. Vanag and R. Ya. Silaraya	69	68
16. Mixed Esters of Arylsulfonimidophosphoric Acids and Non-Rotational Tetrahedral Isomerism. A. V. Kirsanov and V. L. Shevchenko	75	74
17. Acetylene Derivatives. 170. Heterocyclic Compounds. XXXI. Synthesis and Transformations of Heterocyclic Acetylenic γ-Glycols. L. N. Nazarov and L. N. Ivanova	79	78

	Page	Russ. page
18. Molecular Chromatography. IV. Resolution of Mixtures of Nitroanilines. K. A. Ogloblin and G. V. Markina	93	96
19. Nitration of Phenyltrifluoromethyl Sulphide. L. M. Yagupolsky and M. S. Marenets	99	101
20. Structure and Color of p-Phenylazo-Substituted Anils of Glutaconic Dialdehyde. N. E. Grigoryeva and R. M. Zueva	105	107
21. Action of Sulfur Chloride on β-Aminoanthraquinone. M. K. Bezzubets	109	111
22. The Reaction of Phenylmagnesium Bromide with Silicon Tetrafluoride. G. V. Medoks and E. M. Soshestvenskaya	113	116
23. Cleavage of Diphenylchloroantimony and Phenyl diiodoantimony with Acid Chlorides and Alkyl Halides in Presence of Aluminum Chloride. M. S. Malinovsky and S. P. Olifirenko	117	118
24. The Reactivity of the Alkali Salts of Dialkylthiophosphoric Acids. II. Acylation Reactions. M. I. Kabachnik, T. A. Mastryukova, N. P. Rodionova and E. M. Popov	119	120
25. Alkyl- and Dialkylarsenious Acid Chlorides. Gilm Kamai and Z. L. Khisatova	125	126
26. Alkamino Esters of Some Heterocyclic Acids as Possible Hyptotensive Agents. M. V. Rubtsov, E. S. Nikitskaya and V. S. Usovskaya	129	130
27. The Preparation and Properties of Ethyl-N-(2-Quinuclidinyl) Urethane. M. V. Rubstov and E. E Mikhlina	135	135
28. The Stability of the Si—C Bond in Aromatic and Hydroaromatic Silanes to the Action of Acidic Reagents. A. D. Petrov, T. L. Chemysheva and E. A. Chernyshev	139	138
29. The Condensation of o-Aldehydobenzoic Acid and Its Methyl Ester with Malonic Ester. V. M. Rodionov and E. I. Chukhina	143	142
30. Absorption Spectra and Structure of Benzene Derivatives. XVIII. 3,4-Dihydroxyacetophenone and Its Methyl Ethers. N. A. Valyashko and N. N. Valyashko	147	146
31. Derivatives of 4-Hydroxy- and 4-Butoxy-5,6,7,8-Tetrahydronaphthalene-2-Carboxylic Acids. S. L. Sergievskaya and E. G. Popova	155	153
32. Mechanism for the Cleavage of Arylsulfonylglycines and Their N-Derivatives. L. N. Nikolenko and V. A. Koptyug	159	156
33. The Chemistry of Heterocycles. XXIII. The Synthesis of 9-Phenylacridine Based on 2-Aminotriphenylcarbinol and the Mechanism of This Transformation. P. A. Petyunin, N. G. Panferova and M. E. Konshin	163	159
34. The Reaction of a Hydrochloric Acid Solution of Iodine Chloride with Barbituric Acid Derivatives. II. Barbiturates Containing a Cyclohexenyl Group. L. I. Rapaport	167	161
35. The Mechanism of the Arbuzov Rearrangement. II. Reaction of α,β-Dibromoethyl and α,β-Dichloroethyl Isopropyl and α,β-Dibromethyl and α,β-Dichloroethyl Butyl Ethers with Phosphites. V. S. Abramov and A. P. Pekhman	171	163

TABLE OF CONTENTS (continued)

	Page	Russ. page
36. The Synthesis and Properties of Sulfamethine – A New Antitubercular Compound. L. M. Kulberg, S. G. Rykils, P. A. Yufa and R. P. Veltman	175	168
37. Alkaloids of Galanthus woronovi. V. Isolation of Galanthamidine. N. F. Proskurnina and A. P. Yakovleva	179	172
38. Alkaloids of the Plants of the Poppy Family. T. F. Platonova, P. S. Massagetov, A. D. Kuzovkov and L. M. Utkin	181	173
39. Conjugated Addition Reactions of Halogens to Olefins. V. Nitrogen β-Haloalkylation. A. I. Titov and V. G. Kuzmin	187	180
40. The Mechanism of Inhibitor Action. L. I. Kashtanov and N. V. Kazanskaya	191	184
41. Acetylene Derivatives. 171. Heterocyclic Compounds. XXXII. Hydration of Heterocyclic Alcohols and Glycols of the Acetylene Series. I. N. Nazarov and L. N. Ivanova	195	186
42. Cycloalkylation of Aromatic Compounds. IX. The Reaction of 1-Phenylcyclohexanol with Benzene. N. G. Sidorova, N. M. Feiershtein and E. A. Kochetkova	201	191
43. The Symmetrization of Methylethoxychlorosilanes. K. A. Andrianov, S. A. Golubtsov and N. P. Lobusevich	207	197
44. The Action of Aromatic Diazonium Compounds on Unsaturated Compounds. V. Azo-Coupling with Simple Vinyl Ethers. A. P. Terentyev and V. A. Zagorevsky	211	200
45. Alkylation of Diphenyl with Alcohols in the Presence of BF_3. I. A. Romadan and T. L. Rendel	215	202
46. The Preparation and Properties of N-Arylmaleimides. A. E. Kretov and N. E. Kulchitskaya	221	208
47. Synthesis of Some 3,6-Endoxohexahydrophthalic Acid Derivatives. N. N. Melnikov and V. A. Kraft	227	213
48. Quinoline Derivatives. XII. B. I. Ardashev and B. A. Tertov	233	218
49. The o-Toluidides of Diarylglycolic Acids and Their Transformation into 3,3-Diaryl-7-Methyloxindoles. XXIV. P. A. Petyunin and A. S. Pesis	239	223
50. Synthesis and Transformations of α-Glycols of the Ethylene Series. V. 2-Methyl-3,5-Diphenyl-4-Penten-2,3-Diol. L. F. Chelpanova, Z. V. Printseva and V. A. Kormer	243	227
51. The Preparation of Arylhalomonosilanes. E. M. Sochestvenskaya	247	231
52. The Reaction Products of 2,4-Dinitrophenylpyridinium Chloride with Diamines. N. E. Grigoryeva and I. K. Gintse	249	232
53. The Synthesis of a Number of Derivatives Based on 2,4-Dichloro-2-Butene. Synthesis and Properties of 2-Chloro-4-Mercapto-2-Butene. A. L. Klebansky and G. T. Esayan	255	239
54. Naphthofuroxan. IV. Derivatives of 1,2-Naphthoquinone-6-Sulfonic Acid Dioxime. S. V. Bogdanov and I. N. Koroleva	259	243

TABLE OF CONTENTS (continued)

	Page	Russ. page
55. Catalytic Condensation of Acetylene with Aromatic Amines. XXV. Synthesis of 2-(Hydroxyphenyl)Quinoline Derivatives. N. S. Kozlov and L. Yu. Pinegina	263	247
56. The Acid Chlorides of Partial Aromatic Esters of Arylsulfonimidophosphoric Acids. A. V. Kirsanov and V. I. Shevchenko	267	250
57. The General Definition of Chemical Science (A Discussion). Yu. A. Zhdanov	271	254
58. Amino Acid Amidines of the Dihydropyrazine Series. I. Preparation from the Imino Ether of (O,O-Dibenzyl-2,5-Dihydropyrazine)Amidines. R. G. Petrova and N. I. Gavrilov	275	258
59. Naphthofuroxan. V. Sulfonation and Chlorination of Naphthofuroxan. S. V. Bogdanov and L. N. Koroleva	281	264
60. Synthesis of Trialkylsilanephosphoric Acids. K. A. Andrianov, B. N. Rutovsky and A. A. Kazakova	285	267
61. Alkoxydianilidophosphazosulfonaryls. V. I. Shevchenko and V. V. Bondarev	287	270
62. 2-Nitro-Perinaphth-1,3-Indandione and Some of Its Derivatives. E. Yu. Gudrinietse, E. Ya. Dreimanis and G. Ya. Vanag	289	272
63. Catalytic Transformations of Heterocyclic Compounds. XLVII. Mechanism of the Catalytic Dehydration of 2,2,5,5-Tetramethylfuranidine. Yu. K. Yuryev and G. Ya. Kondratyeva	293	275
64. Reaction of a Hydrochloric Acid Solution of Iodine Chloride with Barbituric Acid Derivatives. III. Thiobarbiturates. L. I. Rapaport and Ya. A. Fialkov	297	279
65. Aconite Alkaloids. VII. Monoacetylsongorine — A New Alkaloid from Aconitum soongoricum Staph. A. D. Kuzovkov and P. S. Massagetov	299	281
66. Alkaloids of Leontice Ewersmannii BGE. III. Leontine, The Structure of the Heterocyclic Nucleus. T. E. Platonova and A. D. Kuzovkov	301	283

JOURNAL OF GENERAL CHEMISTRY OF THE U.S.S.R. IN ENGLISH TRANSLATION

February, 1956

TABLE OF CONTENTS

		Page	Russ. Page
1.	In Memory of Professor N.A. Valyashko (1871-1955). A.E. Lutsky and V.I. Atroshchenko.	305	289
2.	Absorption Spectra and Structure of Benzene Derivatives. XIX. 2,5-Dihydroxyacetophenone and Its Methyl Ethers. N.A. Valyashko and N.N. Valyashko	311	294
3.	Enthalpies of Formation of Compounds of Zinc with Antimony. S.A. Shchukarev, M.P. Morozova and Yu.P. Sapozhnikov.	321	304
4.	Formation of Sulfides by Reaction of Ferrous Sulfide with Oxides of Metals. II. Reaction of FeS with SiO_2 in Presence of Carbon. Zh.L. Vert and M.V. Kamentsev	325	307
5.	Hydrolysis of Salts. I. Perchlorates of Elements of the Second Group of the Periodic System. L.S. Lilich and M.E. Mogilev.	331	312
6.	Hydrolysis of Salts. II. Halides of Zinc, Cadmium and Mercury. L.S. Lilich and Yu.S. Varshavsky	337	317
7.	Dipole Moments of Some Complex Compounds of Titanium and Tin.Tetrachlorides. VII. O.A. Osipov	343	322
8.	The Ternary Reciprocal System of the Chlorides and Sulfates of Potassium and Calcium. M.S. Golubeva and A.G. Bergman.	349	328
9.	Complex Formation and Double Decomposition in the Reciprocal System of the Fluorides and Sulfates of Lead and Potassium. V.A. Gladushchenko and A.G. Bergman	359	339
10.	Study of the Systems Sodium Sulfate – Cobalt Sulfate and Sodium Sulfate – Nickel Sulfate. K.A. Bolshakov and P.I. Fedorov.	367	348
11.	Cation Exchange in Mixed Solvents on Volkonskoite. A.T. Davydov and R.F. Skoblionok	371	350
12.	Thiocyanate-Halide Compounds of Divalent Mercury in Solution. K.B. Yatsimirsky and B.D. Tukhlov	377	356
13.	Determination of the Solubility of $Co[Hg(CNS)_4]$. I.M. Korenman, F.R. Sheyanova and M.N. Baryshnikova	387	365
14.	Stratification in Ternary Systems When the Component Binary Systems are Homogeneous. I.L. Krupatkin.	393	370
15.	Physico-Chemical Investigation of Systems Containing Dioxane. VIII. The System Sulfuric Acid – Dioxane. Ya.F. Mezhenny.	397	375
16.	Investigation of Complex Formation in the System Aluminum Chloride-Urea-Water by the Methods of Physico-Chemical Analysis. B.Ya. Rabinovich	399	377
17.	Camphorates of Some Rare Earth Elements. Ya.Ya. Dodonov and S.B. Pirkes	401	379
18.	Double Salts of Lanthanum, Cerium, Praesodymium and Neodymium with Triphenylbenzylphosphonium Nitrate. G.V. Medoks	403	382
19.	Inner Complex Salts of Azo Compounds. III. Reaction of Copper Salts with Some o--Hydroxy- and o-Amino-,o'-Alkoxy- and -o'-Aroxy-Monoazo Compounds. V.I. Mur	405	384

February, 1956

TABLE OF CONTENTS (continued)

		Page	Russ. Page
20.	Some Salts of Imidosulfamide. L.M. Volshtein, N.N. Pisarzhevskaya and M.M. Slutskaya	411	389
21.	Reactions of Metallic Oxides with Alcohols. III. Reactions of Manganese Oxides with Isopropyl and Other Alcohols. V.A. Komarov, N.P. Timofeeva and T.M. Moroshkina	415	393
22.	Synthesis of Hydrocarbons. LIII. Isoprene Hydrobromide in the Synthesis of Hydrocarbons with a Quaternary Carbon Atom — Tert.-Alkylethylenes. R.Ya. Levina, V.R. Skvarchenko and T.M. Ushakova	421	398
23.	Reaction of Dioxane with Acetic Acid and Acetic Anhydride. K.N. Kovalenko, N.A. Trifonov and D.S. Tissen	427	403
24.	Investigations on Conjugated Systems. LX. Reaction of Divinylethylacetylene with Tertiary Butyl Chloride and Bromide. A.A. Petrov and K.V. Leets	431	407
25.	Action of Acetyl Chloride and Acetic Anhydride Upon Alkyl Esters of Arsenious Acid. Gilm Kamai and Z.L. Khisamova	435	411
26.	Tertiary Trihydric Alcohols of the Acetylenic Series and Their Transformations. IX. Dehydration of 2-Methyl-5-(1-Hydroxycyclohexyl)-Hexyne-3-Diol-2,5- and 2,4--Di-(1-Hydroxycyclohexyl)-Butyne-3-Ol-2. V.I. Nikitin and A.Kh. Khamatov	439	416
27.	The Mechanism of Dehydration of γ-Glycols. II. Study of the Dehydration of 2,5--Dimethylhexanediol-2,5; 4-Methylhexanediol-1,4 and 4-Methyloctanediol-1,4. T.A. Favorskaya and N.P. Ryzhova	447	423
28.	The Chlorination of Ketene. B.A. Porai-Koshits, L.S. Efros and K.Yu. Maryanovskaya	451	426
29.	Synthesis and Investigation of 1,1-Di-α-Naphthyl-2-Phenyl-2-Bromoethylene. A.M. Khaletsky and A.Ya. Kaplan	455	431
30.	Investigation of the Action of Bromine Upon 1-Phenyl-1-α-(or β-)-Naphthyl-2--Methylethylenes. A.M. Khaletsky and A.Ya. Kaplan	459	434
31.	Synthesis of Steroid Compounds and Related Substances. XXXIV. 9-Methyl-1,6--Diketo-Δ^5-Octahydronaphthalene. I.N. Nazarov, S.I. Zavylov, M.S. Burmistrova, L.A. Gurvich and L.I. Shmonina	465	441
32.	β-(pyridyl-4)-Glutaric Acid and the Products of Its Transformations. M.V. Rubtsov, E.E. Mikhlina and V.Ya. Furshtatova	469	445
33.	Some Products of Transformation of Tetralin Hydroperoxide. A.I. Kamneva and L.A. Salmin	473	449
34.	Sulfonation and Sulfonic Acids of Acidophobic Compounds. XXV. Application of Dioxane Sulfotrioxide to the Determination of Mono- and Polyhydroxy Compounds. A.P. Terentyev and N.B. Kupletskaya	475	451
35.	Imidazole Derivatives. XIV. Oxidation of Benzimidazole and Its Methyl Derivatives. L.S. Efros, N.V. Khromov-Borisov, L.R. Davidenkov and M.M. Nedel	479	455
36.	Imidazole Series. III. Action of α-Halo Ketones on 2-Mercaptoimidazoles. P.M. Kochergin and M.N. Shchukina	483	458
37.	Aminoacriquine and Its Analogs. A.M. Grigorovsky and T.A. Veselitskaya	491	466
38.	Oxidative Action of Some Acyl Peroxides. G.A. Razuvaev, L.V. Stupen and K.S. Minsker	497	473

February, 1956

TABLE OF CONTENTS (continued)

		Page	Russ. Page
39.	Synthesis and Polymerization of Thioesters of Methacrylic Acid. M.M. Koton, T.M. Kiseleva and K.S. Podgorskaya	499	475
40.	Heterocyclic Compounds. 35. Condensation of Tetrahydro-γ-Pyrones and Tetrahydro--γ-Thiopyrones with Organomagnesium and -Lithium Compounds. I.N. Nazarov and E.T. Golovin.	501	477
41.	Heterocyclic Compounds. 36. The Mannich Reaction with Heterocyclic Ketones (γ--Piperidones, Tetrahydro-γ-Pyrones and Tetrahydro-γ-Thiopyrones). I.N. Nazarov and E.T. Golovin.	507	483
42.	The Mannich Reaction in the Thiazole Series. B.M. Mikhailov and I.K. Platova	515	491
43.	Organic Insectofungicides. XVIII. A New Method for the Preparation of Esters of Chloro- and Dichlorothiophosphoric Acids. Z.M. Bakanova, Ya.A.Mandelbaum, N.N. Melnikov and E.I. Sventsitsky.	519	494
44.	Organic Insectofungicides. XIX. Synthesis of Mixed Esters of Dithiophosphoric Acid Containing an Amide Group in the Aliphatic Ester Radical. K.D. Shvetsova-Shilovskaya, N.N. Melnikov and N.I. Martemyanova.	523	496
45.	Quinoline and Its Derivatives. XIII. Synthesis of Quinoline Bases from Diamines of the Diphenyl Series. B.I. Adrashev and Yu.M. Kozlenko	527	498
46.	A Study of the Sulfonation Reaction. XXXVIII. The Preparation and Properties of 1,8--Naphthalenedisulfonic Acid. B.I. Karavaev and A.A. Spryskov	529	501
47.	The Reaction of Trichlorophosphazosulfonaryls with Alcohols. A.V. Kirsanov and V.I. Shevchenko.	533	504
48.	The Condensation of Acenaphthenequinone with 1,3-Indandione. G.Ya. Vanag and L.S. Geita.	539	511
49.	Cycloalkylation of Aromatic Compounds. X. The Condensation of 1,4-Cyclohexanediol and 4-Chlorocyclohexanol with Benzene. N.G. Sidorova and Yu.V. Valibekov.	545	516
50.	A New Synthesis of β-4-Nitrophenyl-β-Alanine. V.M. Rodionov, N.N. Suvorov and V.G. Avramenko	551	520
51.	Behavior of Diphenyl- and Triphenylamines Toward Oxidizing Agents. X. V.S. Smirnov.	557	526
52.	Behavior of Cyclohexanone Azine and Phenylhydrazone Toward Oxidizing Agents. XI. V.S. Smirnov.	561	528
53.	Formation of Polyamide Resins. V. Participation of Polymerization and Polycondensation Reactions in Transformation of ε-Caprolactam into Polymers. A.S. Shpitalnyi.	563	530
54.	Reaction of Mesitylmagnesium Bromide with the Allyl Esters of Trimethylacetic and Formic Acids. E.B. Sokolova and M.E. Dolgaya	569	534
55.	Structure of Chlorophenoxycrotonic Acids. V.P. Mamaev and N.N. Suvorov	573	538
56.	High-Molecular Compounds. XCIII. Properties of the Polyesters of Tetramethylene Glycol and 1,3-Butanediol. V.V. Korshak and S.V. Vinogradova.	575	539
57.	High-Molecular Compounds. XCIV. Polyesters of Trimethylene and Pentamethylene Glycols. V.V. Korshak and S.V. Vinogradova	581	544
58.	Synthesis of ω,ω'-Diamino-p-Xylene and Its Derivatives. I.P. Losev, O.Ya. Fedotova and M.L. Kerber.	585	548

JOURNAL OF GENERAL CHEMISTRY OF THE U.S.S.R. IN ENGLISH TRANSLATION

TABLE OF CONTENTS (continued)

		Page	Russ. Page
59.	Synthesis of 3-Aryl- and 2,3-Diarylthiazolidines. Yu.K. Yuryev and L.S. German	589	550
60.	Catalytic Transformations of Heterocyclic Compounds. XLVIII. Preparation of 3--Isoamyl-, 3-Hexyl- and 3-p-Tolyltetrahydrothiophenes from the Corresponding Furanidines. Yu.K. Yuryev, E.M. Lukina, Yu.M. Polikarpov and V.P. Volkov	593	553
61.	Syntheses with Acrylonitrile. XXV. Cyanoethylation of Indole. A.P. Terentyev, A.N. Kost and V.A. Smit	597	557
62.	Quinones. VII. Synthesis of Some Quinones of the Dihydro- and Tetrahydronaphthalene Series by Oxidation of the Corresponding Hydroquinones with Potassium Bromate. A.N. Grinev, A.B. Terentyev and A.P. Terentyev	601	560
63.	Quinones. VIII. Condensation of Chloro- and 2,3-Dichloro-p-Benzoquinone with Acetoacetic and Benzoylacetic Esters. A.N. Grinev, Pan Bon-Khvar, V.N. Frosin and A.P.Terentyev	603	561
64.	Reaction of Hydrazine Derivatives. II. Synthesis of 1,2,3,4,5,6,7,8-Octahydrocarbazole. A.N. Kost and I.I. Grandberg	607	565
65.	Halogenation of Aromatic Silanes. I. Preparation and Properties of the Chloro Derivatives of Phenyltrichlorosilane. A.Ya. Yakubovich and G.V. Motsarev	611	568
66.	Synthesis of Physiologically Active Putrescine Derivatives. A.A. Ryabinin, A.D. Panashchenko, I.L. Anisimova and G.Yu. Levina	619	577
67.	Fritillaria Alkaloids. I. Alkaloids of Fritillaria Raddeana Rgl. Kh.A. Aslanov and A.S. Sadykov	623	579
68.	Hexaalkyldisilanes. M.G. Voronkov and Yu.I. Khudobin	629	584
69.	Synthesis of p-Divinylbenzene. I.M. Ezrielev, N.A. Larin, O.M. Nefmark and Z.D. Tolstikova	635	589
70.	Selective Dehalogenation of Dichloroacridines with the Aid of Skeletal Nickel. V.S. Fedorov	639	591
71.	Direct Synthesis of Aryl β-Chlorovinyl Ketones. N.K. Kochetkov, A.Ya. Khorlin and M.Ya. Karpeisky	643	595
72.	Oxidation of Cyclooctatetraene to Terephthalic Acid. V.D. Azatyan and G.T. Esayan	647	599
73.	The Condensation of Cyclohexanone with Ammonia. G.A. Razuvaev, E.N. Zilberman and S.V. Svetozarsky	649	601
74.	The Oxidizability of 1,2-Diphenyl-4-n-Butylpyrazolidin-3,5-Dione. V.N. Sokolova and O.Yu. Magidson	653	604
75.	Preparation of α-Naphthylnitromethane and Its Derivatives. L. Zalukaev and E. Vanag	657	607
76.	Pyrido-(3,4-d)-Thiazole Derivatives. S.G. Fridman	663	613

TABLE OF CONTENTS

	Page	Russ. page
1. Chemical Industry and Science in the Sixth Five-Year Plan. G. V. Zavarukhin	I	I
2. Thermographic Investigation of the Most Important Saturated Heteropoly Acids E. A. Nikitina and E. V. Buris	717	621
3. Study of Chlorination Reactions of Titanium Monoxide. A. N. Zelikman and T. Segarchanu	721	625
4. Double Decomposition, Complex-Formation and Polymorphism in Adiagonal Reciprocal System of Chlorides and Sulfates of Potassium and Cadmium. A. G. Bergman and E. L. Bakumskaya	725	629
5. Reciprocal System of Lithium and Barium Silicates and Fluorides. N. A. Bychkova and A. G. Bergman	735	639
6. Equilibrium Diagram of the Na_2Cl_2-K_2Cl_2-$CaSO_4$ System. V. V. Rubleva and A. G. Bergman	747	651
7. Study of Phosphate Complexes in Solution. I. Phosphate Complexes of Iron. A. T. Pilipenko and L. N. Ivashchenko	751	656
8. Oxalate Complexes of Iron (III). A. K. Babko and L. I. Dubovenko	757	660
9. Viscosity Calculations of Binary Systems. II. R. P. Airapetova and N. T. Redkorebrova	765	668
10. A New Synthesis of Imidodisulfonates. E. N. Zilberman and M. M. Smirnova	771	672
11. Some Esters of Butanearsonous Acid. K. I. Kuzmin	775	675
12. Synthesis of Some Mercaptans and Disulfides Labeled with Radioactive Sulfur Isotope. V. N. Vasilyeva and E. N. Guryanova	777	677
13. Catalytic Transformations of Amines Over Aluminomolybdenum Catalyst. A. F. Plate, M. E. Volpin, E. A. Reformatskaya and S. V. Zotova	785	684
14. Dehydration of Substances Using Vacuum and Deep Freezing. Ya. Ya. Dodonov and S. B. Pirkes	791	690
15. The Synthesis of Acetylenes by Exhaustive Methylation. Ya. M. Slobodin and N. A. Selezneva	793	691
16. The Reaction of Trimethylamine with Polyhalides. Ya. M. Slobodin and N. A. Selezneva	797	694
17. Ozonization of Unsaturated Compounds. II. A Study of the Curves for the Absorption of Ozone by Unsaturated Compounds and Their Mixtures. A. I. Yakubchik and N. G. Kasatkina	803	699
18. Oxygen-Containing Organosilicon Compounds. V. Preparation of Organo-Silicon Acetals. M. F. Shostakovsky, I. A. Shikhiev and V. I. Belyaev	811	706

21. The Configuration and Properties of Unsaturated Acids and Their Derivatives. V. The Properties of Angelic and Tiglic Acids and Their Esters. A. K. Plisov and A. P. Kostyuk	823	715
22. Syntheses with Acrylonitrile. XXVI. Synthesis of Some β-Alkoxypropionamides. A. P. Terentyev, A. N. Kost and A. M. Berlin	827	719
23. Syntheses with Acrylonitrile. XXVII. The Diene Synthesis Reaction of Substituted Acrylonitriles. V. G. Yashunsky, A. P. Terentyev and Ya. G. Nekhlin	831	723
24. Quinones. IX. The Reaction of 5,8-Endoethylene-1,4-Naphthoquinone with Hydrogen Chloride and with Acetoacetic Ester. A. N. Grinev, A. B. Terentyev and A. P. Terentyev	837	730
25. High-Molecular Compounds. XCV. The Polyesters of Thiodivaleric Acid. V. V. Korshak and S. V. Vinogradova	841	732
26. High-Molecular Compounds. XCVI. Synthesis and Polymerization of 4-Vinylphenylethane. G. S. Kolesnikov, V. V. Korshak and I. P. Kulyulin	845	735
27. Synthesis and Transformations of Vinyl Ethers of Higher Polyatomic Alcohols and Cellulose. II. Vinyl Ethers Based on Cellulose. M. F. Shostakovsky, E. N. Prilezhaeva and L. V. Tsymbal	849	739
28. Transformation and Synthesis of Carbohydrates. XIV. Steric Hindrance in the Azo-Coupling of Arylglucamines. V. M. Berezovsky and E. P. Rodionova	855	745
29. Cyanoethylated Ketones in the Synthesis of Unsaturated δ-Lactones. V. The Synthesis and Properties of Unsaturated δ-Lactones from Monocyanoethylated Acetone and Cyclohexanone. N. P. Shusherina, R. Ya. Levina and M. Yu. Lurye	861	750
30. Structure of the Triacetyl Derivative of 4,5-Diaminouracil. V. I. Khmelevsky and O. I. Durnitsyna	867	755
31. Synthesis and Study of 2-Phenyl-1,3-Indandione. A. M. Khaletsky, M. B. Kolesova and R. M. Metrikina	871	760
32. Reductive Properties of α-Naphthylmethylmagnesium Chloride in Some Grignard Reactions. A. M. Khaletsky and \. Ya. Kaplan	873	762
33. The Preparation and Some Properties of 1-(2-Furyl)-3-Methyl-1-Buten-3-ol. A. A. Arsenyuk	877	766
34. The β-Chloroethylamide of Nicotinic Acid. G. I. Braz and V. A. Skorodumov	881	770
35. The Chemistry of Chloromycetin (Levomycetin). VIII. The Dependence of the Antimicrobial Activity of Chloromycetin on Its Structure and the Mechanism of Chloromycetin Action. M. M. Shemyakin, M. N. Kolosov, M. M. Levitov, K. I. Germanova, M. G. Karapetyan, Yu. B. Shvetsov and E. M. Bamdas	885	773

	Page	Russ. page
36. The Synthesis of Dihexylfluorescein. B. N. Afanasyev and M. S. Chernavina	895	783
37. Preparation of 10-Vinylacridone. B. I. Mikhantyev and V. A. Sklyarov	897	784
38. Structure and Chemical Transformations of Alkali Organic Compounds of Anils. II. The Transformations of Disodium and Dilithium Compounds of Benzophenonephenylimide Under the Influence of Alkyl Halides. B. M. Mikhailov and K. N. Kurdyumova	899	786
39. The Synthesis of N-Carbazolepropene Oxide. I. M. Ezrielev and N. A. Larin	905	791
40. Synthesis and Separation of Diastereoisomeric γ-Ethyl-β-Aminocaprylic Acids and Their Derivatives. V. M. Rodionov and V. K. Zvorykina	907	793
41. Synthesis of Thiazole Derivatives. XI. Some New Hydrazines of the Benzothiazole Series. V. M. Zubarovsky	911	797
42. Catalytic Amination of Organic Compounds. IV. Catalytic Amination of Nitro Compounds of the Aromatic Series. N. S. Kozlov and G. N. Kozlov	917	803
43. The Preparation of Arylsulfonyl Derivatives of Amino Acids. L. N. Nikolenko	921	806
44. Organic Insectofungicides. XX. The Synthesis of Mixed Esters of Thiophosphoric Acid Containing Heterocyclic Radicals. K. D. Shvetsova-Shilovskaya, N. N. Melnikov and A. F. Grapov	925	808
45. The Interaction of Dialkylphosphorous Acids with Aldehydes and Ketones. IX. Di-Tert-(β', β', β',-Trichloro)-Butyl Esters of Substituted α-Hydroxymethyl-phosphinic Acid. V. S. Abramov and V. K. Khairullin	929	811
46. Acetylene Derivatives. 172. The Mannich Reaction with β-Cyanoethyl Ethers of Acetylenic Alcohols. I. N. Nazarov and G. A. Shvekhgeimer	933	813
47. The Synthesis of Steroids and Related Compounds. XXXI. Condensation of Halogen Derivatives of the Allyl Type with Cyclic 1,3-Diketones and Inner-Molecular Cyclization (with Loss of Water) of the Resultant Compounds. I. N. Nazarov, S. N. Ananchenko and I. V. Torgov	939	819
48. Heterocyclic Compounds. 37. Synthesis of Heterocyclic Aminoalcohols and Their Esters. I. N. Nazarov and E. T. Golovin	951	832
49. The Problem of the Reactivity of Dialkylaminomethyl Alkyl Ethers and Compounds of Similar Structure. K. G. Mizuch and R. A. Lapina	957	839
50. Tautomeric Compounds. XX. The Mobility of the Hydrogen Atoms of the Methyl Groups of Nitrotoluenes. A. E. Porai-Koshits and I. I. Chizhevskaya	961	842
51. Some Properties of Enol Acetates. I. Reaction of the Enol Acetate of Cyclohexanone with N-Bromosuccinimide. I. V. Machinskaya and V. A. Barkhash	967	848
52. Reaction of β-Chlorovinyl Ketones with β-Dicarbonyl Compounds. II. The Keto-vinylation of Alkylmalonic Esters. N. K. Kochetkov and L. I. Kudryashov	971	851
53. Nitrogen-Containing Derivatives of Esters of Meso-α, α'-Diphenylsuccinic Acid. S. F. Torf and N. V. Khromov-Borisov	977	856
54. Derivatives of Pyrido-(3, 2-d)-Thiazole. S. G. Fridman	985	864
55. Derivatives of Benzothiazole II. Reaction of 2-Benzothiazole Sulfonic Acid with Nitrogen Bases. L. R. Davidenkov and B. A. Porai-Koshits	989	868

	Page	Russ. page
56. Tautomeric Compounds. XXI. Tautomerism of Derivatives of Dipyrazolonyl-Phenyl-Methane. A. E. Porai-Koshits, B. A. Porai-Koshits and N. G. Lipina	993	872
57. Chemical Structure and Parasiticidal Activity. XIX. Synthesis of 6-Methoxy-8-(4'-Aminopentyl)-Aminoquinoline. M. B. Braude and V. I. Stavrovskaya	999	878
58. Sulfonation and Sulfonic Acids of Acidophobic Compounds. XXVI. Use of Dioxane-Sulfotrioxide for the Determination of Aromatic Amines and Aldehydes. A. P. Terentyev, N. B. Kupletskaya and E. V. Andreeva	1003	881
59. Hydroxydihydrofurans. IV. The Problem of the Basic Properties of Substituted 2-Hydroxydihydrofurans-2, 5. E. D. Venus-Danilova and A. Fabritsy	1007	884
60. Reaction of m-Nitrophenol with Symmetrical Mercury Compounds. V. F. Martynova	1017	891
61. Syntheses in the Series of Aromatic Derivatives of Thiourea. K. M. Muravyeva and T. P. Sycheva	1021	898
62. Triphenylphosphazosulfonaryls. A. V. Kirsanov and Z. D. Nekrasova	1027	903
63. Di-Acid Chlorides of Acylamidophosphoric Acids of the Aromatic Series. A. V. Kirsanov and R. G. Makirta	1029	905
64. The Reaction of Phosphorus Pentachloride with Carboxylic Acid Amides. Trichlorophosphazoacyls. A. V. Kirsanov and R. G. Makirta	1033	907
65. α-Nitroacetophenone-o-Carboxylic Acid and Its Derivatives. L. P. Zalukaev	1039	914
66. Synthesis of Hydrocarbons. LIV. Transformation of Hydrocarbons of the Cyclohexadiene Series Into Bicyclic Hydrocarbons Containing a Three-Membered Ring -(0, 1, 3)-Bicyclohexanes. R. Ya. Levina, Kim Dyai Gir and E. G. Treshchova	1045	920
67. Tetraacyloxysilanes in the Synthesis of α, β-Unsaturated Acids. I. Synthesis of Cinnamic Acid. Yu. K. Yuryev, G. B. Elyakov and A. N. Vysokosov	1051	926
68. The Chemistry of Selenophene. II. Acylation of 3,4-Dimethylselenophene with Tetraacyloxysilanes. Yu. K. Yuryev and N. K. Sadovaya	1057	930
69. Organocyclosiloxanes. I. Methylchlorocyclosiloxanes. N. N. Sokolov, K. A. Andrianov and S. M. Akimova	1061	933
70. The Problem of the Structure of Gentianine. N. F. Proskurnina and V. V. Shpanov	1065	936
71. Recollections of N. V. Shishkin	1067	937

TABLE OF CONTENTS

	Page	Russ. page
1. Lattice Energy of Salts Formed by Ions with Outer Envelopes of Eight Electrons. A. F. Kapustinsky and K. B. Yatsimirsky	1069	941
2. Methods of Establishing the Mechanism of the Co-precipitation of Radioelements with Precipitates of Difficultly Soluble Salts. A. P. Ratner	1077	949
3. Study of Properties of Acid Sulfates of Potassium. N. S. Bannykh and Ya. E. Vilnyansky	1081	952
4. Sulfates of Trivalent Chromium. A. V. Pamfilov and N. N. Puchkova	1085	955
5. Preparation of Fused Tantalum Carbide. V. I. Smirnova and B. F. Ormont	1089	958
6. Reciprocal Effect of Hydroxides During Fractional Precipitation from Their Solution. N. N. Mironov and A. I. Odnosevtsev	1093	960
7. Reaction of Rhenium with Cyanides of Iron. A. I. Lazarev	1099	965
8. Thermodynamic Characterization of NaOH, Na_2CO_3 and Na_2SO_4 at High Temperatures. D. M. Ginzburg	1103	968
9. Specific Heat of Na_2CO_3, Na_2SO_4 and NaOH at High Temperatures. M. M. Popov and D. M. Ginzburg	1107	971
10. Reciprocal System of Chlorides and Iodides of Potassium and Lead with Internal Heterocomplex. I. I. Ilyasov and A. G. Bergman	1119	981
11. Ternary System of Five Ions Na_2CO_3–K_2Cl_2–K_2SO_4. A. K. Sementsova and A. G. Bergman	1129	992
12. Oxalate Complexes of Iron (III). II. Instability Constant and Equilibrium Diagram. A. K. Babko and L. I. Dubovenko	1133	996
13. Complex Compounds of Phosphorus Pentachloride with Chlorides of Certain Elements. III. Study of Systems PCl_5–HCl–Organic Solvent. Ya. A. Fialkov and Ya. B. Buryanov	1141	1003
14. Change of the Ionic Conductance of Liquid Chemical Compounds and Systems with Temperature. M. A. Klochko	1149	1010
15. Vapor Pressure of the Systems NaCl–$CaCl_2$–H_2O and KCl–$CaCl_2$–H_2O. A. I. Mun	1161	1021
16. Solubility of the Oxalates of Calcium, Strontium, Barium, Cadmium, Copper and Lead in Aqueous Solutions of Potassium Nitrate. M. P. Babkin	1167	1025
17. Investigation of the Ternary Systems $NaNO_3$–NH_4NO_3–H_2O, KNO_3–NH_4NO_3–H_2O, and $RbNO_3$–NH_4NO_3–H_2O Via Methods of Physicochemical Analysis at 25°. A. S. Karnaukhov	1169	1027
18. Determination of the Isotopic Oxygen Composition in Organic Compounds. R. V. Kudryavtsev, B. V. Ottesen and D. N. Kursanov	1177	1035

	Page	Russ. page
19. Study of the Mechanism of Hydrolysis with the Aid of the Heavy Oxygen Isotope. I. Hydrolysis of Ethyl Propionate in Alkaline Medium. D. N. Kursanov and R. V. Kudryavtsev	1183	1040
20. The Electrical Conductivity of Ternary Systems Composed of Amines, Acetic Acid and Water. S. P. Miskidzhyan and I. A. Volina	1185	1041
21. Electrolytic Dissociation in Nonaqueous Systems. IV. Aniline-Allyl Mustard Oil System. S. P. Miskidzhyan	1191	1046
22. Study of Phase Equilibria in the System Pyramidon-Salicylic Acid-Water. I. L. Krupatkin	1197	1050
23. The Surface Tension of Binary Systems Formed by Urea with Acetic Acid and Its Chloro Derivatives. Yu. I. Bokhovkina and I. M. Bokhovkin	1207	1062
24. The Reaction of Ethanolamine with Diatomic Phenols. D. E. Dionisyev and M. G. Kosareva	1211	1065
25. The Influence of Nucleophilic Substances on Compounds of Structure $CCl_3CH=CRR'$. A. N. Nesmeyanov, R. Kh. Freidlina, L. I. Zakharkin and A. B. Belyavsky	1215	1070
26. The Role of Oxygen in the Initial Stage of Vinyl Chloride Polymerization. K. S. Minsker, A. S. Shevlyakov and G. A. Razuvaev	1227	1082
27. Study of the Process for the Catalytic Hydropolymerization of Acetylene to Divinyl Over Palladium Catalyst. Yu. A. Gorin and N. L. Derevyagina	1233	1087
28. The Inhibited Oxidation of α-Pinene. E. N. Novikova	1243	1097
29. The Reactions for the Formation of Polyorganosiloxanes by the Heterofunctional Condensation Method. K. A. Andrianov, N. N. Sokolov and E. N. Khrustaleva	1249	1102
30. The Reaction of Tetrasubstituted Silanes with Carbon Tetrachloride. G. A. Razuvaev and O. S. Dyachkovskaya	1255	1107
31. Reactions of Unsymmetrical Acyl Peroxides with Mercury. G. A. Razuvaev, Yu. A. Oldekop and V. N. Latyaeva	1259	1110
32. Conjugated Systems. LXI. The Addition of Alkyl Halides to Diene Hydrocarbons. A. A. Petrov and K. V. Leets	1263	1113
33. Reaction of 1-Octyne with Lower Saturated Monobasic Acids. A. I. Bolshukhin and A. G. Egorov	1271	1121
34. The Synthesis of Alkylidene and Arylidene Glycol Esters of Acrylic and Methacrylic Acids. I. A. Arbuzova, S. A. Plotkina and V. N. Efremova	1275	1124
35. Synthesis of Chlorophenyl Esters of Methacrylic Acid. I. A. Arbuzova, L. I. Medvedeva and S. A. Plotkina	1279	1127
36. Syntheses Based on 1,4-Diacetylbenzene. A. M. Sladkov and S. V. Vitt	1283	1130
37. Tetrahydropyrimidine Compounds. III. Synthesis of Substituted 4-Piperonyl-6-Oxo-Tetrahydropyrimidines. V. M. Rodionov and V. V. Kiseleva	1287	1133
38. Isonicotinoylacetic Ester and Its Derivatives. O. Yu. Magidson	1291	1137

TABLE OF CONTENTS

	Page	Russ. Page
1. Photochemical Chlorination of Phenyltrichlorosilane. A. D. Petrov, V. A. Ponomarenko, B. A. Sokolov and V. U. Roshal	1391	1229
2. Organolithium Synthesis and Properties of α- and β-Alkenylsilanes. A. D. Petrov and G. I. Nikishin	1395	1233
3. Synthesis of Silicon-Containing Ethers and Diethers. S. I. Sadykhzade, I. I. Tsetlin and A. D. Petrov	1401	1239
4. Reaction of 1,4-Dilithiumdihydrodiphenyl with Alkyl Halides. E. P. Kaplan, Z. I. Letina and A. D. Petrov	1405	1243
5. The Organometal Synthesis of Dibiphenylalkanes and Their Hydrogenation. A. D. Petrov, E. P. Kaplan and Z. I. Letina	1409	1246
6. Direct Synthesis of Alkylpolysilane Chlorides. A. D. Petrov, S. I. Sadykhzade, E. A. Chernyshev and V. F. Mironov	1413	1248
7. Direct Synthesis of Silane Chlorides from Dichlorides of the Vinylallyl Type. A. D. Petrov, S. I. Sadykhzade, N. P. Smetankina and Yu. P. Egorov	1419	1255
8. Study of Sodium Tantalate Hydrates. Vikt. I. Spitsyn and N. N. Shavrova	1425	1258
9. Mechanism for the Reaction of Tantalum Pentoxide with Sodium Hydroxide. Vikt. I. Spitsyn and N. N. Shavrova	1429	1262
10. Reaction of Sodium and Potassium Metatitanates with Salts in Melts. M. L. Sholokhovich and G. V. Barkova	1433	1266
11. Potentiometric Study of Chlorite Solutions. E. I. Flis and T. M. Vasilyeva	1439	1272
12. Thermographic Study of Chromium Sulfate. I. D. Muzyka and O. I. Shor	1445	1277
13. Heterogeneous Equilibria in Aqueous Ternary Systems of Beryllium Chloride with the Chlorides of First Group Metals. V. P. Blidin	1449	1281
14. Viscosity, Density and Molecular Bond Energies of Some Binary Systems. A. P. Toropov	1453	1285
15. Irreversible-Reciprocal System of Sodium and Cadmium Chlorides and Iodides. I. I. Ilyasov and A. G. Bergman	1457	1288
16. Thermochemical Study of Aqueous Solutions of Electrolytes. IV. Thermochemistry of Aqueous Ammonium Chloride Solutions. K. P. Mishchenko and A. M. Ponomareva	1465	1296
17. Decomposition Rate of Potassium Persulfate in Hydrocarbon Emulsions. A. I. Yurzhenko and O. P. Brazhnikova	1481	1311
18. Physicochemical Analysis of Binary Systems Formed by Acetamide with Organic Acids. I. Density, Viscosity, and Electrical Conductivity of the System Acetamide-Acetic Acid. I. M. Bokhovkin and Yu. I. Bokhovkina	1485	1315
19. Physicochemical Analysis of Binary Systems Formed by Acetamide with Organic Acids. II. Density, Viscosity and Electrical Conductivity of the System Acetamide-Monochloroacetic Acid. Yu. I. Bokhovkina and I. M. Bokhovkin	1489	1318

TABLE OF CONTENTS (continued)

	Page	Russ. Page
20. Investigation of the Reaction of Acetamide with Some Aromatic Acids by the Methods of Physicochemical Analysis. Z. K. Dzhelomanova, N. Z. Rudenko and D. E. Dionisyev	1493	1322
21. Physicochemical Analysis of the Reaction of Amines with Acids. III. Thermal Analysis of the Ternary System Urea-Formic Acid-Water. M. N. Kuznetsova and A. G. Bergman	1497	1326
22. Physicochemical Analysis of the Reaction of Amines with Acids. IV. Thermal Analysis of the Ternary System Urea-Water-Butyric Acid. M. N. Kuznetsova and A. G. Bergman	1505	1335
23. Dielectric Properties of Solutions of Aluminum Bromide in Some Organic Substances. I. A. Sheka	1511	1340
24. Investigation of the Viscosity, Density and Electrical Conductivity of the System Quinoline-Acetic Acid. S. P. Miskidzhyan and S. S. Kirilyuk	1521	1350
25. Complex Vanadyl Compounds. II. Citrate Complexes. V. L. Zolotavin and N. N. Kalugina	1527	1355
26. Complex Compounds of Phosphorus Pentachloride with Chlorides of Some Elements. IV. The System Phosphorus Pentachloride-Tin Chloride. Ya. B. Buryanov	1535	1363
27. Oxides of Transition Metals as Catalysts of the Oxidation of Hydrocarbons. L. Ya. Margolis, S. Z. Roginsky and T. A. Gracheva	1541	1368
28. Physicochemical Investigation of Dioxane-Containing Systems. X. Some Physicochemical Properties of Dioxane Solutions of Pyrosulfuric Acid. Ya.F. Mezhenny	1545	1371
29. Alkylation of Benzene with Polyhalogenated Derivatives in Presence of Metallic Aluminum. K. I. Porshakova, N. G. Sidorova and I. P. Tsukervanik	1549	1375
30. Reaction of Organic Bases with Metallic Salts. IV. Reaction of Antipyrine with Thiocyanates of Zinc and Cadmium. S. E. Burkat	1553	1379
31. Hydrogenation of Solutions of Butadiene Rubber at Atmospheric Pressure and Room Temperature. I. Preparation of Rubbers of Different Degrees of Hydrogenation and Study of Their Properties. A.I. Yakubchik and G.N. Gromova	1557	1381
32. The Irreversible Catalytic Conversion of Dipentene Over Skeletal Nickel in the Liquid Phase. G. L. Dranishnikov	1565	1390
33. The Increasing Complexity of the Carbon Skeleton of Molecules in the Action of Iodides on Halogenated Organic Compounds. B. V. Tronov and V. M. Aksenenko	1569	1393
34. Unsaturated Cyclic Hydrocarbons and Their Derivatives. XIX. Synthesis of 1,2,3-Tribromocyclohexane and Its Reaction with Quinoline. N. A. Domnin and M. A. Larionova	1575	1398
35. The Liebermann Nitroso Group Reaction. G. Ya. Vanag and E. Ya. Lukevits	1579	1400
36. Cleavage of Tri-p-tolylantimony and Tri-α-naphthylantimony by Acid Chlorides and Alkyl Halides in Presence of Aluminum Chloride. M. S. Malinovsky and S. P. Olifirenko	1581	1402
37. Compounds Containing a Three-Membered Oxide Ring. XVI. Reaction of Ammonia with Esters of Glycidic Acids. V. F. Martynov, Zh. D. Vasyutina and L. P. Nikulina	1585	1405

	Page	Russ. Page
38. Halogenation of Aromatic Silanes. II. Preparation and Properties of Chloro Derivatives of Diphenyldichlorosilane. A. Ya. Yakubovich and G. V. Motsarev.	1593	1413
39. The Anomalous Reaction of α-Haloketones with Esters of Phosphorous Acid. II. Reaction of Chloro- and Bromoacetone with Esters of Phosphorous and Phenylphosphinous Acids. A. N. Pudovik and V. P. Averyanova	1605	1426
40. The Anomalous Reaction of α-Haloketones with Esters of Phosphorous Acid. III. The Reaction of α,α- and α,γ-Dihaloketones with Triethyl Phosphite. A. N. Pudovik and L. G. Salekhova	1611	1431
41. Investigations on Derivatives of Alkylphosphinous and Dialkylphosphinic Acids. III. The Atomic Refraction of Phosphorus in Esters of Alkylphosphinous Acids. A. Razumov and O. Mukhacheva	1615	1436
42. Preparation of Some Alkyl-β-hydroxyethylphosphorous Acids. E. L. Gefter	1619	1440
43. The Structure of the Product of Reaction of Aniline with Propargyl Aldehyde. I. Ya. Postovsky, R. O. Matevosyan and Yu. N. Sheinker	1623	1443
44. Investigations on Quinones. X. Reaction of Acetylacetonimine with p-Quinone. A. N. Grinev, V. I. Shvedov and A. P. Terentyev	1629	1449
45. Investigations on Quinones. XI. Synthesis of Substituted Indoles. A. N. Grinev, V. I. Shvedov and A. P. Terentyev	1633	1452
46. Synthesis and Investigation of Nitro- and Sulfo- Derivatives of 3,4-Dimethyl-3,4-diphenylhexane. A. M. Khaletsky and A. N. Rudakova	1635	1453
47. The Rate of Transformation of 2-Keto-L-gulonic Acid and Its Methyl Ester Into L-Ascorbic Acid in an Aqueous Medium. V. I. Veksler and G. E. Shaltyko	1639	1456
48. Cyclic Acetals. I. Condensation of Styrene and Its Homologs with Aldehydes in Presence of Hydrochloric Acid and Reaction of 4-Phenyl-1,3-dioxane with $SOCl_2$, PCl_5 and Fatty Acids. N. V. Shorygina	1643	1460
49. The Structure and Properties of Cellulose. LVI. Investigation of the Relative Reactivity of the Hydroxyl Groups of Cellulose. The Distribution of Methoxyl Groups in Partially Methylated Cellulose Prepared in an Alkaline Medium. V. Derevitskaya, Yu. Kozlova and Z. Rogovin	1649	1466
50. Synthesis of Some Physiologically Active Esters of Dialkylaminoacetic Acids. A. L. Remizov and N. V. Khromov-Borisov	1655	1471
51. Synthesis of Polycyclic Compounds Related to the Steroids. XXXV. Condensation of Cyclic Allyl Halo- Derivatives with Cyclic 2-Methyl-1,3-diketones and Intramolecular Cyclization of the Resultant Compounds to Ketones Containing the Hydrogenated Skeleton of Phenanthrene, Chrysene and Cyclopentanophenanthrene with an Angular Methyl Group. I. N. Nazarov, G. P. Berkholetova, S. N. Ananchenko, I. V. Torgov and G. V. Aleksandrova	1667	1482
52. Heterocyclic Compounds. 38. Synthetic Spasmolytics. Preparation of 4-Amino-piperidines by Reductive Amination of 4-Piperidones. I. N. Nazarov and E. T. Golovin	1679	1496
53. The Structure of Gramicidin C. III. Study of Some Products of Hydrolysis of Gramicidin C. N. A. Poddubnaya and M. I. Kiselev	1691	1508

TABLE OF CONTENTS (continued)

	Page	Russ. Page
54. Discussion Concerning a Paper by N. Rïl and G. Orgman. A. Bundel	1697	1512
55. To the Memory of M. V. Likhosherstov. A. A. Petrov	1701	1515

JOURNAL OF GENERAL CHEMISTRY OF THE U.S.S.R. IN ENGLISH TRANSLATION

TABLE OF CONTENTS

		Page	Russ. Page
1.	The System Strontium–Bismuth. S. A. Shchukarev, M. P. Morozova, Kan Kho-Yn and G. V. Kokosh	1705	1525
2.	Study of the Exchange Reactions of Iodine in Systems Containing Iodine Chloride by the Method of Labeled Atoms. V. L. Pavlov and Yu. Ya. Fialkov	1711	1531
3.	Hypotriiodic Acid. V. L. Pavlov and Yu. Ya. Fialkov	1715	1534
4.	The Problem of the Anodic Precipitates Obtained During the Electrolysis of Silver Salts. II. M. S. Skanavi-Grigoryeva and I. L. Shimanovich	1721	1540
5.	Influence of Various Elements on the Solubility of Carbon in Molten Iron. N. A. Vatolin and O. A. Esin	1725	1543
6.	The Solubility of Perchlorates of Elements of the Second Group of the Periodic System. L. S. Lilich and B. F. Dzhurinsky	1733	1549
7.	Interaction of Lithium Titanate with Other Salts in Melts. I. N. Belyaev and N. P. Sigida	1739	1553
8.	The Solubility Product of Beryllium Hydroxide. I. M. Korenman, F. S. Frum and G. A. Tsygankova	1745	1558
9.	The Reciprocal System with Layering of the Chlorides and Tungstates of Lithium and Silver. D. S. Lesnykh and A. G. Bergman	1749	1560
10.	Electrical Conductivity and Viscosity of Solutions of Aluminum Chloride in Nitromethane. V. S. Galinker	1753	1564
11.	Investigation of the Reaction of Phenylhydrazine with Chlorophenols by the Method of Physicochemical Analysis. F. T. Pozharsky and D. E. Dionisyev	1757	1568
12.	The Influence of Specific Adsorption on the Half-Wave Potential During Reduction of Complex Compounds. E. A. Maksimyuk and G. S. Ginzburg	1763	1572
13.	The Composition of Complex Compounds of Cobalt with Dimethylglyoxime formed in Presence of Na_2SnO_3. L. S. Nadezhina and P. N. Kovalenko	1771	1579
14.	The Thermal Stability of Paraffinic Hydrocarbons. B. G. Gavrilov and L. S. Bagratian	1777	1586
15.	Conjugated Systems. LXII. The Condensation of Dienic Hydrocarbons with Propiolic Acid and Its Methyl Ester. A. A. Petrov and K. B. Rafi	1779	1588
16.	Conjugated Systems. LXIII. The Action of Benzenesulfodichloramide on Alcoholic Solutions of Piperylene. T. A. Zyryanova and A. A. Petrov	1785	1593
17.	Preparation of Hydroaromatic Compounds on the Basis of Products of the Diene Synthesis. IV. The Action of Organomagnesium Compounds on Esters of Cyclohexene-4-Dicarboxylic Acids. N. P. Sopov	1795	1602
18.	Transformations of Pinacones Containing Substituted Acetylenic Residues. XI. Action of Mercuric Chloride and Bromide on Unsymm. Dimethyl-Phenyl-Phenylethinyl-Ethylene Glycol. E. D. Venus-Danilova and A. Fabritsy	1803	1609

	Page	Russ. Page
19. Unsaturated Cyclic Hydrocarbons and Their Derivatives. XX. Transformation of Methylcyclohexenes and Methylcyclohexadienes into Dinitrotoluenes Under the Action of Nitrating Mixture. N. A. Domnin and V. A. Cherkasova	1811	1616
20. Unsaturated Cyclic Hydrocarbons and Their Derivatives. XXI. The Reaction of 1-Methyl-3,4-Dibromocyclohexane with Quinoline. N. A. Domnin and V. A. Cherkasova	1813	1618
21. The Chlorination of Dichlorohexadiene and the Dehydrochlorination of the Reaction Products. A. E. Akopyan, Zh. A. Kosoyan and V. V. Vardanyan	1817	1621
22. Hydrogenation of Solutions of Butadiene Rubber at Atmospheric Pressure and Room Temperature. II. Influence of Nature of the Solvent on the Process of Catalytic Hydrogenation of Unsaturated Compounds over Palladium-on-Calcium Carbonate Catalyst. A. I. Yakubchik and G. N. Gromova	1823	1626
23. The Chemical Structure of the Autopolymer of Butadiene. A. I. Yakubchik and A. I. Spasskova	1826	1629
24. Addition of α-Haloethers to Isoprene. A. N. Pudovik and N. Altunina	1833	1635
25. Investigation of the Mobility of the Tertiary Butyl Broup in Derivatives of Tert.-Butylbenzene by the Method of Isotopic Exchange. L. M. Nazarova	1837	1640
26. The Catalyzed Vapor-Phase Hydrolysis of Halo Derivatives of Organic Compounds. I. Hydrolysis of 1,2,4-Trichlorobenzene. A. I. Naumov and Z. G. Lapteva	1845	1647
27. Synthesis of Chloro- and Bromo-Substituted Methylstyrenes. A. F. Dokukina, M. M. Koton, O. K. Mineeva and V. A. Paribok	1849	1651
28. The Condensation of Styrene with Benzene. I. P. Tsukervanik and T. G. Garkovets	1853	1653
29. Condensation of Dimethylaniline with Acetylene and Acetaldehyde. T. G. Garkovets and I. P. Tsukervanik	1857	1656
30. Synthesis of 1,4-Diaminobutanone-2. I. K. Korobitsyna, Yu. K. Yuryev and S. N. Shvedova	1861	1660
31. II. The Catalytic Transformation of n-Butyl Alcohol Under Pressure. B. A. Bolotov and L. K. Smirnova	1865	1662
32. The Isomerization of Monodeuteronaphthalenes. A. Korolev, A. Shatenshtein, E. Yurygina, V. Kalinachenko and P. Alikhanov	1869	1666
33. A New Method of Synthesis of Esters of Phosphinic And Thiophosphinic Acids. XXV. Addition of Mixed Dialkylphosphorous and Dialkylthiophosphorous Acids and of Diallylphosphorous Acid to Unsaturated Compounds. A. N. Pudovik and N. I. Khlupina	1877	1672
34. Synthesis of Acyl Derivatives of O,O-Dialkylthiophosphates. N. I. Zemlyansky and M. S. Malinovsky	1881	1677
35. The Polymerization of α-Methylvinyl Alkyl Ethers. III. Polymerization of α-Methylvinyl Propyl and Butyl Ethers. M. F. Shostakovsky and E. P. Gracheva	1883	1679
36. Free Radical Reactions of Lead Tetraacetate. G. A. Razuvaev, Yu. A. Oldekop, Yu. A. Sorokin and V. M. Tverdova	1887	1683

TABLE OF CONTENTS (continued)

	Page	Russ. Page
37. The Catalytic Decomposition of Phenylmercury Hydroxide in Solvents. G. A. Razuvaev, G. G. Petukhov and R. V. Kalinina	1889	1685
38. Transformation of Tetraethylsilane on Chromium Catalyst. B. N. Dolgov, G. V. Golodnikov and N. E. Glushkova	1893	1688
39. Heterofunctional Condensation of Organoethoxy- and Organochlorosilanes. K. A. Andrianov, T. N. Ganina and N. N. Sokolov	1897	1691
40. Oxidative and Oxidative-Hydrolytic Transformations of Organic Molecules. XXV. The Hydrolytic and Oxidative-Hydrolytic Cleavage of 2-Phenyl- and 2-Benzyl-3-Hydroxy-1,4-Naphthoquinones. L. A. Shchukina and E. P. Semkin	1901	1695
41. Oxidative and Oxidative-Hydrolytic Transformations of Organic Molecules. XXVI. Preparation of Triketocarboxylic Acids Under the Conditions of the Hooker Reaction. L. A. Shchukina	1907	1701
42. Oxidative and Oxidative-Hydrolytic Transformations of Organic Molecules. XXVII. Tautomeric Transformations and Properties of Hydroxy- and Chloroketocarboxylic Acids. L. A. Shchukina and M. M. Shemyakin	1915	1708
43. Synthesis and Properties of Benzimidazole Derivatives. III. The Reaction of 1,2,4-Triaminobenzene with Carboxylic Acids. G. M. Kharkharova	1921	1713
44. Reactions of Hydrazine Derivatives. V. Synthesis of 3,5,5-Trialkylpyrazolines. A. N. Kost and I. I. Grandberg	1925	1717
45. Reduction with Formic Acid and Its Derivatives. V. The Reduction of Quinolinium Salts. A. N. Kost and L. G. Yudin	1929	1720
46. Imidazole Series. IV. Reaction of Sulfuric Acid with 2-β-Ketoalkyl(Aryl)-Mercaptoimidazoles. P. M. Kochergin and M. N. Shchukina	1933	1723
47. Preparation of 4-Methyluracil Based on Diketene. N. V. Khromov-Borisov and R. S. Karlinskaya	1939	1728
48. Absorption Spectra of Triphenylamine and Its p-Nitro Derivatives in Pure Alcohol Solution and in the Presence of Sodium Alcoholate. I. P. M. Bugai	1941	1729
49. Preparation of 6-Monohalomethylquinolines. B. P. Lugovkin	1945	1733
50. The Synthesis of Aromatic Isocyanates. D. F. Kutepov and N. S. Rozanova	1949	1737
51. Heterocyclic N-Oxides. III. Polarographic Reduction of Some Heterocyclic N-Oxides. L. V. Varyukhina and Z. V. Pushkareva	1953	1740
52. Cyclization of 2,2-Diindandionyl-1-Acenaphthenone. G. Ya. Vanag and L. S. Geita	1959	1746
53. Reaction of Hydrazine Hydrate with 2-Nitro-1,3-Indandione. G. Ya. Vanag and M. A. Matskanova	1963	1749
54. Naphthalene Series. XIV. The Light Sensitivity of Aromatic Selenium-Containing Nitro Compounds. 1-Nitronaphthalene-8-Seleninic Acid. V. V. Kozlov	1969	1755
55. Catalytic Reduction of Aromatic Nitro Compounds. VI. The Influence of Some Functional Groups on the Reduction Kinetics of the Nitro Group on Skeletal Nickel. V. P. Shmonina and D. V. Sokolsky	1973	1759

TABLE OF CONTENTS (continued)

	Page	Russ. Page.
56. Exomolecular Reactions and Color. VI. Study of the Absorption Spectra of Molecular Complexes of 1,3-Dinitrobenzene and 2,4-Dinitrostilbene with Dimethylaminostilbene. V. A. Izmailsky, A. N. Guseva and E. S. Solovyeva	1979	1766
57. Structure of Gramicidin S. IV. Further Studies of Its Copper Complexes. N. A. Poddubnaya, N. I. Gavrilov and M. I. Kiselev	1991	1779
58. Corelborin P. M. Ya. Tropp	1999	1786
59. Fritillaria Alkaloids. II. The Chlorination Products of Raddeanine. Kh. A. Aslanov and A. S. Sadykov	2003	1790
60. Fritillaria Alkaloids. III. The Structure of Raddeanine. Kh. A. Aslanov and A. S. Sadykov	2007	1794
61. Delphinium Alkaloids. VII. Delphonine. N. K. Abubakirov and S. Yu. Yunusov	2011	1798
62. Letter to the Editor. L. K. Mushkalo	2021	1809

JOURNAL OF GENERAL CHEMISTRY OF THE U.S.S.R. IN ENGLISH TRANSLATION

July, 1956

TABLE OF CONTENTS

	Page	Russ. Page
1. The Enthalpy of Formation of Arsine. S. M. Ariya, M. P. Morozova, and Knuan Tszi-tao	2023	1813
2. Study of the Interaction of Sulfates and Molybdates of Lithium and Silver in Melts. I. N. Belyaev and S. S. Doroshenko	2027	1816
3. Study of the Mechanism of Distribution of Isomorphous Components on Crystallization from Aqueous Solutions Using Radioactive Indicators. I. Study of the Equilibrium in the System Copperammonium Sulfate–Zincammonium Sulfate–Water at 20° in Presence of the Radioactive Isotopes Zn^{65} and Cu^{64}. G. I. Gorshtein and N. I. Silantyeva	2033	1821
4. Study of the System $(NH_4)_2BeF_4$–NH_4MnF_3–H_2O. L. R. Batsanova and A. V. Novoselova.	2039	1827
5. Study of the Metastable Equilibria Between Liquid Phases. V. I. L. Krupatkin	2043	1831
6. Physicochemical Study of Thiocyanate Complexes of Silver. A. M. Golub	2049	1837
7. The Role of pH in the Formation and Extraction of Internal Complex Compounds. I. M. Korenman and F. R. Sheyanova	2061	1849
8. Polarographic Study of the Kinetics of Polymerization Processes. M. I. Bobrova and A. N. Matveeva	2071	1857
9. Study of the Sorption Exchange of Organic Ions. A. T. Davydov and R. F. Skoblionok.	2075	1860
10. Complex Formation of Acetamide and Benzamide with Other Organic Compounds. N. D. Streinikova	2079	1863
11. Study of Interaction of Acetamide with Phenols by Physicochemical Methods of Analysis. Z. K. Dzhelomanova, N. Z. Rudenko, and D. E. Dionisyev	2083	1866
12. Physicochemical Analysis of Binary Systems Formed by Acetamide with Organic Acids. III. Density, Viscosity and Electrical Conductivity of the System Acetamide–Trichloroacetic Acid. Yu. I. Bokhovkina and I. M. Bokhovkin	2089	1872
13. The Reaction of Potassium Fluoborate with Styrlmagnesium and Phenylacetylenylmagnesium Bromides. V. A. Sazonova and N. Ya. Kronrod	2093	1876
14. Oxonium Compounds of Complex Ethers with Organic Acids. III. The Systems $HCOOC_2H_5$–CH_3COOH and $CCl_3COOC_2H_5$–CH_3COOH. M. Usanovich, K. Bilyalov, and L. Krasnomolova	2099	1881
15. Synthesis of Hydrocarbons. LVI. Conversion of Hydroaromatic Ketones into Aromatic Hydrocarbons by Phosphorus Pentoxide. R. Ya. Levina, Kim Dyai Gir, and V. R. Skvarchenko	2103	1884
16. The Problem of Experimental Proof of the Baker-Nathan Effect. M. I. Batuev	2107	1888
17. Investigation in the Field of Cyclic Acetals of Hydroxycarbonyl Compounds. VII. Preparation and Properties of Epoxyoctenol Methyl Lactolide (α-Methoxy-α-Tert-Butyl-β,β-Dimethylethylene Oxide). T. I. Temnikova and S. S. Skorokhodov	2115	1897

TABLE OF CONTENTS (continued)

	Page	Russ. Page
18. Investigation of the Reaction of Pinacols Containing Substituted Acetylene Residues. XII. The Action of Mercuric Acetate on Unsymmetrical Dimethylphenylphenyl-acetylenyl-Ethyleneglycol. E. D. Venus-Danilova and A. Fabritsy	2119	1901
19. The Reaction of Divinyl Oxide with Amines. A. A. Petrov and V. M. Albitskaya	2125	1907
20. Hypochlorination of Piperylene. A. N. Pudovik and B. E. Ivanov	2129	1910
21. Condensation of Diene Hydrocarbons with Acetylenedicarboxylic Acid and Its Methyl Ester. N. P. Sopov and V. S. Miklashevskaya	2133	1914
22. Investigation in the Field of Conjugated Systems. LXIV. The Action of Benzosulfodibromoamide on Solutions of Piperylene in Methyl and Ethyl Alcohols. T. A. Zyryanova and A. A. Petrov	2137	1918
23. Investigation in the Field of Conjugated Systems. LXV. Hydrogenation of Vinylalkylacetylenes in the Presence of Colloidal Palladium. Kh. V. Balyan, A. A. Petrov, and Yu. L. Porfiryeva	2145	1926
24. Catalytic Alkylation of Chlorobenzene by Propyl Alcohols. M. B. Turova-Polyak, N. V. Danilova and N. V. Kuklina	2155	1936
25. Oxidation and Oxidative-Hydrolysis of Organic Molecules. XXVIII. Oxidative-Hydrolysis of Nitrosubstituted Hydroxyazo Dyes. O. M. Shemyakina, B. M. Bogoslovsky, and M. M. Shemyakin	2161	1940
26. Quaternary Ammonium Compounds. II. The Formation of Tetrolic Acid by Reaction of Trimethyl-(2, 2, 3, 3-Tetrachlorobutyl)-Ammonium Iodide with Aqueous Alkali. A. T. Babayan and A. A. Grigoryan	2167	1945
27. Mechanism of Guanidine Nitrate Formation by Ammoniolysis of Cyanoguanidine. S. N. Kazamovsky and N. I. Moshchanskaya	2171	1948
28. Investigation in the Field of Tautomeric Compounds. XXII. The Lability of Hydrogen Atoms of the Quinaldine Methyl Group. A. E. Porai-Koshits and L. I. Chizhevskaya	2175	1950
29. Synthesis of Propionic Acid-1-C^{14} Via an Organolithium Compound. N. F. Novotorov and L. A. Korshunov	2183	1959
30. Compounds Labeled with C^{14} and N^{15}. IV. Synthesis of "Key" Compounds. V. I. Malmind, B. V. Tokarev, E. Gomes, R. G. Vdovina, K. M. Ermolaev, and M. M. Shemyakin	2187	1962
31. Aliphatic-Aromatic Aminoalcohols. I. Synthesis of α-(m-Aminophenyl)-β-Alkylaminoethanols. S. I. Sergievskaya and L. E. Sventsitskaya	2193	1967
32. Reactions of Hydrazine Derivatives. VI. The Action of Alkyl Halides on Acetone Azine. A. N. Kost, G. A. Golubeva, and L. I. Grandberg	2201	1976
33. The Change of the Chemical Heterogeneity of Cellulose Xanthate During the Ripening of Viscose. A. T. Serkov, A. B. Pakshver and E. M. Mogilevsky	2205	1979
34. The Chain Reaction of Carbon Tetrachloride with Isopropyl Alcohol Initiated by Acetylated and Benzoylated Hydroperoxides of 1-Hydroxycyclohexanone. G. A. Kolpovskaya, B. N. Moryganov, G. A. Razuvaev, and V. A. Shushunov	2209	1981

TABLE OF CONTENTS (continued)

		Page	Russ. Page
35.	Reactions of Acetyl Benzoyl Peroxide with Alcohols and Acetic Acid. G. A. Razuvaev and V. N. Latyaeva	2213	1986
36.	Syntheses with the Help of Acrylonitrile. XXVIII. γ-Benzoylcaproic Acid and Its Derivatives. A. N. Kost and A. P. Terentyev	2219	1992
37.	Synthesis of Some Halo Derivatives of Benzophenone. B. V. Tronov and E. S. Novikova	2221	1994
38	The Sulfonation of 2-Chloronaphthalene. I. Sulfonation at Low Temperature. N. N. Vorozhtsov, jun., and N. N. Karandasheva	2225	1997
39.	The Sulfonation Reaction. XXXIX. The Hydrolysis and Isomerization of Naphthalene Trisulfonic Acids. B. I. Karavaev and A. A. Spryskov	2231	2002
40	Sulfonic Acids of Sulfones as By-Products of Sulfonation Reactions. II. The Behavior of the Disulfonic Acid or Diphenylsulfone Under Conditions of Alkaline Fusion of Benzene-m-Disulfonic Acid. A. P. Shestov and N. A. Osipova	2235	2005
41	Trichlorophosphazotrichloroacetyl and the Acid Chloride of the N-Phosphoric Acid of Trichloriminoacetyl Chloride. A. V. Kirsanov and G. I. Derkach	2239	2009
42	The Mechanism of the Arbuzov Rearrangement. III. Reaction of the Nitrile and Methyl Ester of α,β-Dibromo- and α,β-Dichloropropionic Acid Phosphites. V. S. Abramov and N. A. Ilyina	2245	2014
43	Azomethine Dyes from Oxindole Derivatives. II. M. S. Kisteneva	2251	2019
44	The Tautomerism of α-Pyridone and Carbostyril. M. I. Kabachnik, S. T. Ioffe, and Yu. N. Sheinker	2257	2025
45	The Structure of Gramicidin S. V. Two Forms of Gramicidin, Their Mutual Transformations and Structure. N. I. Gavrilov, N. A. Poddubnaya, L. N. Akimova, and E. M. Grigoryeva	2261	2029
46	Isolation of a New Antibiotic Longisporine and Study of Its Chemical Nature. G. P. Menshikov and M. M. Rubinshtein	2267	2035
47	Synthesis of 3-Vinylpiperidine. L. N. Yakhontov and M. V. Rubtsov	2271	2040
48.	Some β-Chloroethyl and Ethylenimine Derivatives of Pyridine. B. M. Mikhailov and T. K. Kozminskaya	2275	2042
49.	Reaction of Acylsulfanilyl Chlorides with 2-Aminothiazole. I. Reaction of Di-(Carbomethoxysulfanilyl)-Aminothiazole with 2-Aminothiazole. B. G. Yasnitsky and E. B. Dolberg	2279	2046
50.	Chemistry of Heterocycles. XXV. Synthesis of 9-Phenylacridine from Acyl Derivatives of 2-Aminotriphenylcarbinol. P. A. Petyunin, N. G. Panferova, and M. E. Konshin	2283	2050
51.	The Structure of Thiazole Disulfamides. I. Ya. Postovsky and V. V. Kushkin	2287	2052
52.	3,4-Diketones of the Furanidine Series of the Bispyran Type in the Synthesis of Condensed Heterocyclic Systems. I. K. Korobitsyna, Yu. K. Yuryev, Yu. A. Cheburkov and E. M. Lukina	2293	2058
53.	Aconite Alkaloids. VIII. Identity of Delphelatine with Eldeline. A. D. Kuzovkov	2299	2063

TABLE OF CONTENTS (continued)

	Page	Russ. Page
54. Study of C_{19} Alkaloids. I. Sophocarpinols. A. S. Sadykov, O. S. Otroshchenko, and Yu. K. Kushmuradov	2303	2066
55. Alkaloids of the Branchy Plantain (Plantago Ramosa, Syn. P. Indica). II. A. V. Danilova	2307	2069
56. 1,2-Naphtho-(3',4')-Furoxan Series. VI. The Bisulfite Compound of 6-Nitro-1,2-Naphtho-(3',4')-Furoxan and Its Derivatives. S. V. Bogdanov and N. I. Zilberman	2311	2071
57. Fatty Aromatic Amino Alcohols. II. α-(p-Aminophenyl)-β-Alkylaminoethanols. S. I. Sergievskaya and L. E. Sventsitskaya	2317	2077
Discussion		
58. The Nomenclature of Compounds Obtained by Treating Carboxylic Acid Amides with Phosphorus Pentachloride. A. V. Kirsanov	2323	2082
59. On the Problem of Stepwise Complex Formation. K. B. Yatsimirsky	2325	2083
60. Further Discussion on the Polarographic Determination of the Composition and Stability of Complex Ions in Solution in Stepwise Complex Formation. Ya. I. Turyan	2327	2084
61. From the Commission on Nomenclature of Chemical Compounds of the Chemical Sciences Division of the Academy of Sciences of the USSR	2331	2086

JOURNAL OF GENERAL CHEMISTRY OF THE U.S.S.R. IN ENGLISH TRANSLATION

TABLE OF CONTENTS

	Page	Russ. Page
1. The Preparation of Sodium Phosphotungstates from Tungstic Acid and Sodium Phosphates. E. A. Nikitina and E. V. Buris	2967	2661
2. A Study of the Redox Properties of Germanium Heteropolyacids. Z. F. Shakhova and R. K. Motorkina	2969	2663
3. The Interaction of Some Lithium and Cadmium Salts in the Absence of Solvent. D. S. Lesnykh, A. G. Bergman and N. G. Bukun	2977	2673
4. Solubility in the Potassium Chloride–Urea–Water System at 25°. A. K. Zhdanov and K. G. Nigai	2983	2679
5. The Influence of Alkali Metal Cations in Complex Compounds of Aluminum Bromide on the Molecular Composition of These Complexes in Solvents of Low Dielectric Constant. E. Ya. Gorenbein	2985	2680
6. The Polarographic Behavior of Stypticin. I. N. Ya. Khlopin and G. F. Reikhardt	2991	2685
7. The Determination of Water in Complex Compounds Using the Fischer Reagent. E. P. Zemlyakova	2993	2687
8. The Fusibility, Viscosity and Density of the Systems $SnBr_4$–$CH_2BrCOOH$ and $SbBr_3$–$CH_2BrCOOH$. T. Sumarokova and N. Khakhlova	2997	2690
9. The Viscosity of Binary Systems with Chloral. I. V. V. Udovenko and R. I. Khomenko	3001	2693
10. Spectra and Halochromism. I. Halochromism of Aromatic Carbinols. V. F. Lavrushin	3005	2697
11. Spectra and Halochromism. II. Halochromism of Tertiary Alicyclic and Aliphatic Alcohols. V. F. Lavrushin and N. N. Verkhovod	3013	2704
12. Catalytic Reactions with Metallic Aluminum. II. Alkylation of Benzene with Chlorocyclohexane and Chlorocyclopentane. M. B. Turova-Polyak and I. R. Davydova	3019	2710
13. Hydrogenation and Hydrogenolysis of α-Ethyl and α-Propenylfuran on Raney Nickel Catalyst. N. I. Shuikin and I. F. Belsky	3025	2716
14. 2-Furyltrichloromethylcarbinol and Its Complex Esters. M. A. Zakutskaya	3029	2720
15. The Oxonium Compounds of Complex Esters with Organic Acids. IV. The $CH_3COOC_4H_9$–CCl_3COOH, $CH_3COOC_5H_{11}$–CCl_3COOH and $CCl_3COOC_2H_5$–CCl_3COOH Systems. M. Usanovich, K. Bilyalov and L. Krasnomolova	3033	2723
16. Bromination of Unsaturated Compounds. V. Bromine Addition Reactions of Allyltrimethylammonium Perchlorate. N. P. Kanyaev	3037	2726
17. Isomerization of Polymethylene Hydrocarbons by Aluminum Chloride. XIX. Isomerization of 1,3,5-n-Trimethylcyclohexane and Isopropylcyclohexane. M. V. Turova-Polyak, Z. S. Kraits and E. G. Treshchova	3043	2732

TABLE OF CONTENTS (continued)

	Page	Russ. Page
18. The Reaction of Isovaleraldehyde with a Solution of Sodium Isoamylate in Isoamyl Alcohol. V. I. Lyubomilov	3049	2738
19. Investigations in the Field of Conjugated Systems. LXVIII. Diene Syntheses with Fluoroprene. I. Condensations of Fluoroprene with α,β-Unsaturated Aldehydes and Ketones. A. A. Petrov and A. V. Tumanova	3055	2744
20. Hydrolysis of Alkyldioxanes. M. I. Farberov and N. K. Shemyakina	3061	2749
21. The Alkylation of Benzene with Di-(1-Hydroxy)-Cyclohexylacetylene Monoacetate in the Presence of $AlCl_3$. R. M. Lagidze, N. K. Iremadze and L. P. Chigogidze	3067	2754
22. A Contribution to the Synthesis of Tertiary Alcohols Based on Camphor. II. I. Esafov and N. I. Novikov	3071	2758
23. A Contribution to the Synthesis of Tertiary Alcohols Based on Camphor. III. V. I. Esafov and N. I. Novikov	3075	2762
24. The Synthesis of Complex Esters of Lignoceric Alcohol and Lignoceric Acid. A. M. Khaletsky and N. M. Gorskaya	3079	2765
25. Addition Reactions of α-Oxides of Piperylene. A. N. Pudovik and B. E. Ivanov	3083	2768
26. Oxidation of Divinyl, Isoprene and Piperylene with Acetyl Peroxide. A. N. Pudovik and B. E. Ivanov	3087	2771
27. Halogenation of Unsaturated Compounds with Aromatic Diazo Compounds. I. The Reaction of Phenyldiazonium Chloride and Bromide with Butadiene-1,3 and Some Reactions of 4-Chloro-1-Phenylbutene-2. A. V. Dombrovsky and A. P. Terentyev	3091	2776
28. Synthesis of Some Derivatives of p,p'-Diamino-Meso-3,4-Diphenylhexane. S. F. Torf and N. V. Khromov-Borisov	3099	2783
29. Attempted Synthesis of 7-Aminoheptanoic Acid by the Partial Hydrolysis of Pimelodinitrile with Hydrogen Peroxide. M. N. Bogdanov	3103	2786
30. Investigations in the Field of Açetylenic Amines. III. Isomerization of Dialkylaminoacetylenes. A. T. Babayan and N. G. Vartanyan	3107	2789
31. Synthetic Investigations in the Field of Polyene Compounds. X. The Direction and the Stereochemical Specificity of the Dehydration of Esters of 3,7-Dimethylocten-6-ol-3-ic-(1) Acid (β-Hydroxy- α, β-Dihydrogeranic) and 5,9-Dimethyldecadien-2,8-ol-5-ic-(1) Acid. G. I. Samokhvalov, M. A. Miropolskaya and N. A. Preobrazhensky	3111	2793
32. Heterocyclic Compounds. 39. Synthetic Anesthetics. IV. Esters of 1,2,5-Trimethyl-4-Phenyl-4-Piperidol with Aliphatic Acids. Synthesis of Promedol and Isopromedol. I. N. Nazarov, N. S. Prostakov and N. I. Shvetsov	3117	2798
33. Heterocyclic Compounds. 40. Synthetic Anesthetics. V. Esters of 1,2,5-Trimethyl-4-Phenyl-4-Piperidol with Aromatic Acids. I. N. Nazarov, N. S. Prostakov, N. N. Mikheeva and O. A. Shavrygina	3131	2812
34. Heterocyclic Compounds. 41. Synthetic Anesthetics. VI. Esters of 1,2,5-Trimethyl-4-Aryl-4-Piperidols. I. N. Nazarov, N. S. Prostakov, Zh. A. Krasnaya and N. N. Mikheeva	3139	2820

TABLE OF CONTENTS (continued)

	Page	Russ. Page
35. Heterocyclic Compounds. 42. Synthetic Anesthetics. VII. Esters of Tertiary and Secondary 4-Piperidols. I. N. Nazarov and N. S. Prostakov	3153	2834
36. Synthesis of 1-Benzoyl-4-(β-Carbethoxy-β-Formylethyl)-Piperidine Acetal. L. H. Yakhontov and M. V. Rubtsov	3163	2844
37. Cyanoethylated Ketones in the Synthesis of Unsaturated δ-Lactones. VII. Isomeric Benzotetrahydrocoumarins. N. P. Shusherina, R. Ya. Levina and V. I. Zdanovich	3167	2847
38. Barbituric Acids. V. Methylenemalonic Ester in Diene Synthesis. Spirobarbituric Acids. R. Ya. Levina, Yu. S. Shabarov and L. A. Chervoneva	3173	2852
39. Investigations in the Field of Alkanesulfo Acids. XV. Chlorination of Anilides of Alkanesulfo Acids. A. G. Kostsova, N. M. Yanova and Z. N. Sushko	3177	2855
40. The Reaction of Acylsulfanilyl Chloride with 2-Aminothiazole. II. Investigation of the Reaction of Carbomethoxysulfanilyl Chloride with 2-Aminothiazole. B. G. Yasnitsky and E. B. Dolberg	3181	2859
41. Investigation of Sulfonation. XLI. Hydrolysis and Sulfonation of Benzenedisulfonic Acids. A. A. Spryskov and S. P. Starkov	3185	2862
42. Sulfonic Acids of Sulfones as Side Products in Sulfonation Processes. III. Behavior of Diphenyl Sulfone and Its Sulfonic Acids Under the Action of Sulfuric Acid. A. P. Shestov and N. A. Osipova	3189	2866
43. Sulfanyl Derivatives of Natural Amino Acids and Their Analogs. Yuan Chen-e and M. N. Shchukina	3195	2872
44. Investigation of the Process of Polymerization of Styrene Under the Influence of Diazoamino Compounds and Activators. P. A. Vinogradov	3205	2882
45. Steric Hindrance in Quaternary Salts of 2-Arylbenzothiazoles and 2-Arylbenzoselenazoles. A. I. Kiprianov and V. A. Shrubovich	3215	2891
46. Synthesis of 4-Methyl-5-Acetyl-2-Aminothiazole and Some of Its Derivatives. P. M. Kochergin	3223	2897
47. Synthesis of β-(N-2-Chlorophenothiazyl)-Propionic Acid and Its Derivatives and Derivatives of β-N-Phenothiazylpropionic Acid. N. V. Savitskaya, Yu. S. Tsizin and M. N. Shchukina	3227	2900
48. Investigations in the Imidazole Series. VI. The Action of Bromoacetaldehyde and Its Derivatives on Some 2-Mercaptoimidazoles. P. M. Kochergin and M. N. Shchukina	3233	2905
49. Investigations in the Imidazole Series. VII. The Action of Acetic Anhydride on 2-β-Ketoalkyl(Aryl)-Mercaptoimidazoles. P. M. Kochergin	3243	2916
50. Syntheses with the Help of Acrylonitrile. XXIX. The Cyanoethylation of Some Ketones. A. P. Terentyev, A. N. Kost, Yu. V. Saltykova and V. V. Ershov	3251	2925
51. Investigations on Quinones. XII. The Reaction of p-Benzoquinone with Ethyl Acetoacetate. A. N. Grinev, Pan Bon Khvar and A. P. Terentyev	3255	2928
52. Investigations on Quinones. XIII. Preparation of Endoethylenenaphthofurans. A. N. Grinev, A. B. Terentyev and A. P. Terentyev	3259	2931

TABLE OF CONTENTS (continued)

	Page	Russ. Page
53. Investigations on Quinones. XIV. The Reaction of p-Benzoquinone with p-Nitro- and p-Bromobenzoylacetic Esters. A. N. Grinev, N. K. Venevtseva and A. P. Terentyev	3261	2933
54. The Synthesis of Homologs of Taurine by the Leuckart Reaction. A. P. Terentyev, V. M. Potapov and I. Z. Semion	3263	2934
55. Some Properties of Esters of p-Toluenesulfonic Acid with 17β-Hydroxysteroids. V. Study of the Products of Dehydration of 17α-Methylandrostanediol-3β,17 and Its Derivatives. O. S. Madaeva	3267	2937

JOURNAL OF GENERAL CHEMISTRY OF THE U.S.S.R. IN ENGLISH TRANSLATION

TABLE OF CONTENTS

	Page	Russ. Page
1. The Preparation of Sodium Phosphomolybdates from Molybdic Anhydride and Sodium Phosphates. E. A. Nikitina and E. V. Buris	3273	2945
2. Study of the Melts of Potassium and Silver Nitrates by the Method of Electromotive Forces. M. S. Zakharyevsky and T. V. Permyakova	3275	2947
3. Surface Tension of Binary Systems Composed of Acetic Acid and Its Chloro Derivatives. I. M. Bokhovkin	3281	2953
4. Physicochemical Analysis of Binary Systems Formed by Acetamide with Organic Acids. IV. Surface Tension of Binary Systems Formed by Acetamide with Acetic Acid and Its Chloro Derivatives. Yu. I. Bokhovkina	3285	2955
5. The Viscosity of Binary Systems with Chloral. II. V. V. Udovenko and R. I. Khomenko	3291	2959
6. Physicochemical Study of the Reaction of Titanium Tetrachloride with the Esters of Monobasic Acids. VIII. Reaction of Titanium Tetrachloride with n-Butyl Formate and Isoamyl Formate. Yu. A. Lysenko	3297	2963
7. On the Periodic Relationship of Electrode Potentials of Metals in Fused Salts. Yu. K. Delimarsky	3303	2968
8. Reaction of Free Radicals in Solutions. VI. Mechanism of the Decomposition of Aliphatic Aromatic Triazenes in the Presence of Water and Acids. V. Ya. Andakushkin, B. A. Dolgoplosk and I. I. Radchenko	3307	2972
9. Oxidation-Reduction Systems for the Initiation of Radical Processes. III. Utilization of the Reaction for the Reduction of Metal Oxide Salts with Hydrocarbons for Initiation of the Polymerization Process. B. A. Dolgoplosk and E. N. Kropacheva	3315	2980
10. Synthesis of Ethyl Alcohol, Containing the Heavy Oxygen Isotope. R. V. Kudryavtsev and D. N. Kursanov	3319	2984
11. Study of the Mechanism of Hydrolysis by Means of the Heavy Oxygen Isotope. II. Hydrolysis of Dimethyl Sulfate in Acid and Alkaline Medium. D. N. Kursanov and R. V. Kudryavtsev	3323	2987
12. Low Temperature Oxidation of Methane Hydrocarbons. B. G. Gavrilov and G. V. Zinovyeva	3327	2989
13. Conjugated Systems. LXIX. Diene Synthesis with Fluoroprene. II. Condensation of Fluoroprene with Derivatives of α,β-Unsaturated Monobasic Acids. A. A. Petrov and A. V. Tumanova	3329	2991
14. Conjugated Systems. LXX. Diene Syntheses with Fluoroprene. III. Condensation of Fluoroprene with the Esters of α,β-Unsaturated Dibasic Acids. A. A. Petrov and A. V. Tumanova	3335	2995
15. Reaction of Cyclopropane Hydrocarbons with Mercuric Salts. V. Action of Mercuric Acetate on Methylcyclopropane and 1,1-Dimethylcyclopropane. R. Ya. Levina, V. N. Kostin and V. A. Tartakovsky	3339	2998

	Page	Russ. Page
16. Chemistry of Cuprammonium Solutions of Cellulose. VII. The Reaction of Polyhydroxy Compounds with the Ammine Complex of Copper. S. N. Danilov and M. G. Okun	3347	3005
17. Role of Phosphoric Acid in the Study and Treatment of Cellulose. I. The Swelling and Solution of Cellulose in Phosphoric Acid. S. N. Danilov and N. F. Gintse	3357	3014
18. Study of the Reaction for the Exchange of Alkoxyl Groups by the Radicals of Organomagnesium Compounds. A New Method for the Preparation of Mixed Acetals of Formaldehyde with the β-Phenylethyl Alcohol Residue. M. R. Kulibekov and Shamkhal Mamedov	3363	3020
19. Glycol Ethers. XXVII. Synthesis of the β-Alkoxy Derivatives of Methylene Glycol Ethers. Shamkhal Mamedov and G. Mamedov	3367	3023
20. The Synthesis of Nonsteroid Androgens. A. M. Khaletsky and B. A. Zaputryaev	3371	3026
21. The Synthesis of Organophosphorus Compounds from Hydrocarbons and Their Derivatives. VI. The Oxidative Chlorophosphination of Cyclohexane and Propylene Using Phenyldichlorophosphine. Yu. M. Zinovyev and L. Z. Soborovsky	3375	3030
22. The Synthesis of Halogen Derivatives of Phenazine. IV. Bromophenazines. V. P. Chernetsky and A. I. Kiprianov	3377	3032
23. Studies in the Field of Azomethine Dyes. III. Azomethine Dyes from 3-Alkyl-1-(Carboxy and Dicarboxybenzthiazolyl-2')-Pyrazolones-5. I. A. Solovyeva, M. V. Krasheninnikova and G. I. Arbuzov	3383	3036
24. The Analysis of the Influence of Structure on Spectra. I. A Comparative Study of Color in Azomethines of Type $O_2NC_6H_4CH=NC_6H_4A$ and $AC_6H_4CH=NC_6H_4O_2$. Reflection and Absorption Spectra. V. A. Izmailsky and E. A. Smirnov	3389	3042
25. The Preparation of Chlorides and Esters of Arylphosphoric Acids. Catalytic Phenomena in the Reaction of Phenols with Phosphorus Oxychloride. V. V. Katyshkina and M. Ya. Kraft	3407	3060
26. The Enzymatic Hydrolysis of N-Benzoyl-O-Peptides of Serine and Threonine. S. M. Avayeva and M. M. Botvinik	3413	3066
27. Tetra-Tert.-Butoxysilane. M. G. Voronkov, A. N. Lazarev and A. K. Baigozhin	3421	3072
28. Spectra and Halochromism. III. The Reaction of p-Fuchsin, Aniline Blue and Their Carbinols with Acids. V. F. Lavrushin and T. M. Shmaeva	3425	3075
29. β-Aminovinyl Ketones. VI. Tautomerism of Alkyl β-Aminovinyl Ketones. N. K. Kochetkov and Yanush Dombrovsky	3431	3081
30. The Preparation of Furyl- and Arylpyruvic Acids by Hydrolysis of 5-Arylidene-2-thio-oxazolidones-4. T. E. Gorizdra and S. N. Baranov	3443	3092
31. The Effect of Acids and Alkalis on Absorption Spectra of Pyridine Dyes. N. E. Grigoryeva, I. K. Gintse and A. P. Severina	3447	3096
32. Synthetic Investigations on Polyenoid Compounds. XI. The Structure of 2-Methyl-4-(2',6',6'-trimethylcyclohexen-1'-yl)-buten-2-al-1. G. I. Samokhvalov, L. P. Zhukova and N. A. Preobrazhensky	3457	3105

	Page	Russ. Page
33. A New Method of Preparation of Esters of Phosphinic and Thiophosphinic Acids. XXVI. Addition of Incomplete Esters of Acids of Phosphorus to Ethyl Isocyanate, Vinylacetate and Esters of Unsaturated Carboxylic Acids. A. N. Pudovik, I. V. Konovalova and R. E. Krivonosova	3463	3110
34. Synthesis of ω-Nitroethyl-p-Nitrobenzene. L. Zalukayev and E. Vanag	3469	3115
35. Hydrogenation of 4-(β,β-Dicarbethoxyvinyl)-pyridine in the Presence of Raney Nickel Catalyst. E. S. Nikitskaya and M. V. Rubtsov	3475	3119
36. Chloromethylation of Anthracene. E. Yu. Gudrinietse and G. Ya. Vanag	3479	3123
37. Addition of Indandione-1,3 and of Its Nitro-Derivative to a Double Bond. L. Zalukayev	3483	3125
38. Reactions of Hydrazine Derivatives. IX. Interaction of Phenylhydrazine with β-Substituted Propionitriles. A. N. Kost and V. V. Ershov	3491	3132
39. Reactions of Hydrazine Derivatives. X. Absorption Spectra of Azines and Pyrazolines. N. B. Kupletskaya, A. N. Kost and I. I. Grandberg	3495	3135
40. Halogen Derivatives of Nitrodimedone. O. Ya. Neiland, E. Yu. Gudrinietse and G. Ya. Vanag	3499	3139
41. Indole Derivatives. I. The Synthesis of N-Benzyl-1,2,3,4-tetrahydrocarbazoles. N. K. Kochetkov, N. F. Kucherova and V. P. Evdakov	3505	3144
42. Indole Derivatives. II. The Synthesis of Some Derivatives of 1,2,3,4-Tetrahydro-γ-carboline. N. F. Kucherova and N. K. Kochetkov	3511	3149
43. The Chemistry of Selenophen. IV. The Iodination and Metallation of Selenophen and Its Homologs. Selenophen Carboxylic Acids. Yu. K. Yuryev and N. K. Sadovaya	3517	3154
44. Heterocyclic Compounds. 43. Synthetic Pain-Relieving Substances. VIII. 1-Alkyl-2,5-dimethyl-4-phenyl-4-piperidinols. I. N. Nazarov, N. I. Shvetsov and O. I. Sorokin	3521	3157
45. Heterocyclic Compounds. 44. Synthetic Pain-Relieving Substances. IX. Esters of 1-Alkyl-2,5-dimethyl-4-phenyl-4-piperidinols. Homologs of Promedol and Isopromedol. I. N. Nazarov and N. I. Shvetsov	3533	3170
46. Heterocyclic Compounds. 45. Cyanhydrins of γ-Piperidones, Tetrahydro-γ-pyrones and Tetrahydro-γ-thiopyrones. Stereochemistry of the Cyanhydrin Synthesis. I. N. Nazarov and B. V. Unkovsky	3545	3181
47. Studies in the Field of Heterocyclic Chemistry. XXVI. New Methods for Preparing 9-Phenylacridine. P. A. Petyunin and N. G. Panferova	3555	3191
48. Tetraacyloxysilanes in Organic Synthesis. VII. Silicoanhydrides of Unsaturated Monobasic Organic Acids in the Synthesis of Unsaturated Ketones of the Benzene, Thiophen and Selenophen Series. Yu. K. Yuryev, G. B. Elyakov and I. M. Milshtein	3559	3194
49. Some Properties of p-Toluenesulfonates of 17β-Hydroxysteroids. VI. The Synthesis of the Acetate of 17,17-Dimethyl-18-nor-$\Delta^{5,12}$-Androstadienol-3. O. S. Madaeva	3565	3198

TABLE OF CONTENTS (continued)

50. Some Properties of p-Toluenesulfonates of 17β-Hydroxysteroids. VII. Infrared Spectra of Some Derivatives of the Androstane and 18-Norandrostane Series. O. S. Madaeva and Yu. N. Sheinker	3569	3201
51. Electrolytic Dissociation Constants of Some Saccharodicarboxylic Acids and Their Monolactones. L. A. Mai	3575	3206
52. Inner Complexes of Azocompounds. IV. The Reaction of Copper Salts with Certain o-Hydroxy- and o-Amino-o'-Methylthioazocompounds. V. I. Mur	3577	3208
53. The Reaction of Tetraphenyltin with Organic Acids. M. M. Koton	3581	3212
54. The Halogenoarylation of Unsaturated Compounds with Aromatic Diazocompounds. II. Acrylonitrile in Halogenoarylation. A. V. Dombrovsky, A. P. Terentyev and A. M. Yurkevich	3585	3214
55. Speciosine — A New Alkaloid from Colchicum Speciosum Stev. V. V. Kiselev	3591	3218
56. The Study of Plant Alkaloids of the Elaeagnaceae Family. The Isolation of Tetrahydroharmol and N-Methyltetrahydroharmol from the Bark of Elaeagnus Angustifolia L. T. F. Platonova, A. D. Kuzovkov and P. S. Massagetov.	3593	3220
57. In Memoriam A. A. Strepikheev	3597	3223
58. Errata	i	

JOURNAL OF GENERAL CHEMISTRY OF THE USSR IN ENGLISH TRANSLATION

December, 1956

TABLE OF CONTENTS

	Page	Russ. Page
1. The Oxidation Potential of Bichromate. B. V. Pitsyn and V. F. Petrov	3601	3233
2. Study of Metastable Equilibria Between Liquid Phases. VI. I. L. Krupatkin	3609	3240
3. Fusion Diagrams of Systems Containing Hexachloroethane. III. T. Sumarokova and L. Shefer	3615	3247
4. Physicochemical Analysis of the Ternary System Urea-Acetic Acid-Monochloroacetic Acid. I. M. Bokhovkin and Yu. I. Bokhovkina	3623	3255
5. The Use of Refractometry for Studying Complex Formation in Solutions of Electrolytes. I. System $CdCl_2$-KCl-H_2O. B. V. Ioffe	3627	3259
6. The Viscosity, Density and Bond Energy of Mixed Binary Systems, The Components of Which Possess Geometrically Similar Molecules. A. P. Toropov	3635	3267
7. Viscosity of Binary Systems With Chloral. III. V. V. Udovenko and R. I. Khomenko	3639	3270
8. Physicochemical Study of the Reaction of Titanium Tetrachloride with the Esters of Monobasic Acids. IX. The Reaction of Titanium Tetrachloride with n-Butyl Chloroacetate and With Some Esters of Trichloroacetic Acid. Yu. A. Lysenko	3643	3273
9. Method for the Determination of the Activity of Skeletal Nickel Catalyst With the Aid of the Cementation Reaction. A. I. Kryagova	3649	3280
10. The Reaction of Nitrous Acid with Salicylic Acid in Acetic Acid Medium. A. A. Nemodruk	3653	3283
11. Syntheses With Complex Compounds. III. The Preparation of Azo Compounds from Chromotropic Acid and Other 1,8-Dihydroxynaphthalene Sulfonic Acids. V. I. Kuznetsov and A. A. Nemodruk	3657	3285
12. Complexes of Stannic Chloride and Bromide With Thiourea. T. Sumarokova and E. Yarmukhamedova	3663	3291
13. Complexes of Stannic Chloride and Bromide With Glycine. T. Sumarokova and E. Yarmukhamedova	3667	3295
14. Contact Transformations of Dicycloheptyl in the Presence of Platinized Carbon. S. I. Khromov, I. M. Kuznetsova and E. S. Balenkova	3673	3302
15. Reaction of Metal Oxides with Alcohols. IV. Vanadium Oxides-Isopropyl Alcohol. V. A. Komarov and N. P. Timofeeva	3679	3306
16. The Reaction of Silicon Tetrafluoride with Benzylmagnesium Chloride. G. V. Medoks and E. M. Soshestvenskaya	3683	3310
17. Catalytic Synthesis of Ketones. VI. Synthesis of Methyl Butyl and Ethyl Phenyl Ketones. I. P. Yakovlev and M. M. Kreimer	3685	3312
18. Conjugated Systems. LXXI. Dimerization of Fluoroprene. A. A. Petrov and A. V. Tumanova	3687	3314
19. The Order of Addition of Bromine, Hydrogen Bromide and Alkyl Hypobromites to Allylmethylacetylene (Hexene-1-yne-4). A. A. Petrov	3693	3319

	Page	Russ. Page
20. The Synthesis of 2,2,3,5,6,8,9,9-Octamethyldecadiene-3,7, 3,5,6,6-Tetramethyl-2-carboxy-4-heptenic Acid-1 and 3,5,6,6-Tetramethyl-4-heptenic Acid-1. A. D. Petrov, V. N. Gramenitskaya and M. P. Shebanova	3699	3324
21. The Synthesis of Branched Acetylenic Hydrocarbons. The Preparation of 2,6,6-Trimethyl-3,3-diisopropylheptyne-4. A. I. Zakharova and G. M. Murashov	3703	3328
22. The Reaction of Hydrogen Selenide with α-Oxides of the Acetylene and Vinylacetylene Series. The Synthesis of Alkyl-, Hydroxyalkyl- and Vinylselenophen. F. Ya. Perveev, N. I. Kudryashova and V. N. Glebovsky	3707	3331
23. The Addition of Polyhalogensilanes and Alkylhydrosilanes to Compounds Containing a Triple Bond. L. L. Shchukovskaya, A. D. Petrov and Yu. P. Egorov	3713	3338
24. Tetraacyloxysilanes in Organic Synthesis. VIII. Silicoanhydrides of Saturated Monobasic Organic Acids in the Synthesis of Ketones of the Thiophen Series. Yu. K. Yuryev, G. B. Elyakov, N. S. Zefirov and A. N. Vysokosov	3717	3341
25. Studies on the Synthesis and Reactions of Organosilicon Compounds Containing Oxygen. The Synthesis of Dialkyl-, Alkylaryl- and Diarylsilanediols and Certain Of Their Properties. M. F. Shostakovsky, D. A. Kochkin, Kh. I. Kondratyev and V. M. Rogov	3721	3344
26. The Reaction of Vinyl Ethers With Compounds Containing Mobile Hydrogen. I. The Reaction of Vinyl Butyl Ether with Esters of Malonic Acid. Z. I. Torgashina and A. L. Naumchuk	3731	3353
27. Reactions of Certain β,β-Dihalogen Substituted Propionaldehydes. T. V. Protopopova and A. P. Skoldinov	3733	3355
28. Studies in the Field of Thiosulfonic Acids. I. The Synthesis and Antibacterial Properties of Certain Alkyl Esters of Propane-1-Thiosulfonic Acid and Butane-1-Thiosulfonic Acid. B. G. Boldyrev, A. K. Litkovets and T. A. Troflmova	3739	3360
29. Bisulfite Compounds of 4-Nitroso-1-Naphthol and 1-Naphthol. S. V. Bogdanov and N. N. Karandasheva	3745	3365
30. A Study of the Comparative Reactivity of the Hydroxyl Groups in Cellulose. II. The Distribution of Methoxy Groups in Partly Methylated Cellulose Prepared in a Medium of Bases. V. Derevitskaya, Yu. Kozlova and Z. Rogovin	3749	3369
31. A Study of the Comparative Reactivity of the Hydroxyl Groups in Cellulose. III. The Distribution of Methoxy Groups in Partly Methylated Cellulose Obtained by the Methylation of Cellulose with Diazomethane. V. Derevitskaya, Yu. Kozlova and Z. Rogovin	3755	3374
32. The Reaction of Alkyl Hypochlorites with Phosphites. K. A. Petrov and G. A. Sokolsky	3759	3377
33. The Reaction of n-Chloramines with Phosphites. K. A. Petrov and G. A. Sokolsky	3761	3378
34. The Reactions of Sulfenyl Chlorides with Phosphites. K. A. Petrov, G. A. Sokolsky and B. M. Polees	3765	3381
35. Synthesis in the Phenothiazine Series. I. The Synthesis of Dialkylaminoacyl-2-chlorophenothiazines. S. V. Zhuravlev and A. N. Gritsenko	3769	3385
36. The Direct Amination of Benzothiazole Derivatives. R. P. Veltman	3773	3388
37. Spatial Structure and Reactivity. V. Inhibited Internal Rotation and the Kinetics of the Acylation of 2,2'-Halogen Derivatives of 4-Aminodiphenyl and 4-Amino-4'-nitrodiphenyl. L. M. Litvinenko and A. P. Grekov	3777	3391

TABLE OF CONTENTS (continued)

	Page	Russ. Page
38. A New Way of Introducing a Dihydroxyacetone Side-Chain. L. V. Sokolova, G. A. Frangulyan and N. N. Suvorov	3785	3399
39. Free Radical Reactions in Solutions. VII. Role of Activators in the Decomposition Processes in Triazenes and in Initiation of Polymerization. V. Ya. Andakuskin, B. A. Dolgoplosk and I. I. Radchenko	3789	3403
40. Synthesis and Transformation of Some Derivatives of Di-2-thienylmethane. III. Bromine-Substituted Di-2-thienylmethanes. Ya. L. Goldfarb and M. L. Kirmalova	3797	3409
41. Some Esters of Dibutylarsinic Acid. K. I. Kuzmin	3803	3415
42. Studies in the Pyrimidinoimidazolone Field. III. Preparation of Pyrimidinoimidazolone Salts, and Alkylation of Pyrimidinoimidazolones. Yu. P. Shvachkin and M. A. Prokofyev	3805	3416
43. Thiazolidine-4-carboxylic Acid and Its Derivatives. VI. Study of the Products from Condensing α-Amino-β-mercapto Acids with 4-Aminomethylene-2-phenyl-5-oxazolone. I. T. Strukov	3811	3422
44. Preparation of Asymmetric Phosphonium Compounds With Different Aliphatic Radicals. Gilm Kamai and L. A. Khismatullina	3815	3426
45. Derivatives of Bicyclo(2,2,1) Heptane. 1. Condensation of 2-Acyl-3-chlorobicyclo(2,2,1) Heptanes With Malonic Ester and Related Compounds. N. K. Kochetkov and A. Ya. Khorlin	3819	3430
46. The Interaction of Copper Tetraphenyl Boron with Carbonyl Compounds. V. A. Sazonova and I. I. Nazarova	3829	3440
47. The Synthesis of β-Chloroalkylamino Derivatives of Thiazole. B. M. Mikhailov, V. P. Bronovitskaya and I. K. Platova	3835	3445
48. Reactions of Hydrazine Derivatives. XI. Synthesis of Some Cyclopropane Hydrocarbons. I. I. Grandberg, A. N. Kost and A. P. Terentyev	3839	3450
49. Interaction Products of β-Picoline and 2,4-Dinitrochlorobenzene. N. E. Grigoryeva, I. K. Gintse and N. G. Karpyuk	3845	3455

– mono- and dichloroacetyl, phosphono-, reaction with phosphorous esters (triethyl, trilsobutyl phosphites) to form unsaturated mixed phosphoric esters, 2503;

– monocyanoethylated, conversion to unsaturated δ-lactone, 861.
Acetonitrile, system with PCl_5-HCl, complex formation in, 1141.
Acetophenone, 2,5-dihydroxy, and methyl ethers, absorption spectra and structure, 311;
– 3,4-dihydroxy-, and methyl ethers, preparation, properties, absorption spectra, structure, 147;
– α-nitro, o-carboxylic acid, see acid.
Acetylation, of imino and imido groups, with ketene, 1375.
Acetyl benzoyl peroxide, see benzoyl peroxide.
Acetyl chloride, action on alkyl esters of arsenious acid, to form acid chlorides of dialkylarsenious acids, 435.
Acetylene, catalytic condensation with aromatic amines. Synthesis of 2-(hydroxyphenyl)quinoline derivatives, 263;
– catalytic hydropolymerization to divinyl over palladium catalyst, mechanism of, 1233;
– condensation with dimethylaniline, to form 1,1-di-(4-dimethylaminophenyl)-ethane, 1857.
Acetylene compounds. Addition of polyhalogen silanes and alkylhydrosilanes to silicoacetylenic hydrocarbons, 3713;
– Alkylation of benzene with di-(1-hydroxy)-cyclohexylacetylene monoacetate in the presence of $AlCl_3$, 3067;
– Condensation of diene hydrocarbons with acetylenedicarboxylic acid and its methyl ester, 2133;
– Heterocyclic compounds. Hydration of heterocyclic alcohols and glycols of the acetylene series, 195;
– Heterocyclic compounds. Synthesis and transformations of heterocyclic acetylenic γ-glycols, containing one or two piperidine, tetrahydropyran and tetrahydrothiopyran heterocycles, 79;
– Hydrogenation of vinylalkylacetylenes in the presence of colloidal palladium, 2145;
– Investigation of the reaction of pinacols containing substituted acetylene residues. The action of mercuric acetate on unsymmetrical dimethylphenylphenylacetyleneyl-ethylene-glycol, 2119;
– Isomerization of dialkylaminoacetylenes by the action of metallic sodium, and also alcoholic alkali, influence of various factors, 3107;
– Order of addition of bromine, hydrogen bromide and alkyl hypobromites to allylmethylacetylene (hexene-1-yne-4), 3693;
– Reaction of divinylethylacetylene with tertiary butyl chloride and bromide, 431;
– Reaction of hydrogen selenide with α-oxides of the acetylene and vinylacetylene series. The synthesis of alkyl-, hydroxyalkyl- and vinylselenophen, 3707;
– Reactions of acetylenic γ-glycols, Isomerization of unsymm. methyl-di-p-tolylbutindiol (1,1-di-p-tolylpentin-2-diol-1,4), 2423;
– by exhaustive methylation, 793;
– Tertiary trihydric alcohols of the acetylenic series and their transformations. Dehydration of 2-methyl-5-(1-hydroxycyclohexyl)-hexene-3-diol-2,5-and 2,4-di-(1-hydroxycyclohexyl)-butyne-3-ol-2, 439;
– Tertiary triols. Potassium permanganate oxidation of the ethylenic triols : 2,3,6-trimethylhepten-4-triol-2,3,6; 3,4,7-trimethylocten-5-triol-3,4,7; 2,5-dimethyl-5-(1-hydroxycyclohexyl)-penten-3-diol-2,5 and 2,4-di-(1-hydroxycyclohexyl)-buten-3-ol-2, 2429.
– The direction and the stereochemical specificity of the dehydration of esters of 3,7-dimethylocten-6-ol-3-ic(1) acid (β-hydroxy-α, β-dihydrogeranic) and 5,9-dimethyldecadien-2,8-ol-5-ic- (1) acid, 3111;
– The Mannich reaction with β-cyanoethyl ethers of acetylenic alcohols, 933;
– The synthesis of 2,2,3,5,6,8,9,9-octamethyldecadiene-3,7,3,5,6,6-tetramethyl-2-carboxy-4-heptenic acid-1 and 3,5,6,6-tetramethyl-4-heptenic acid-1, 3669;
– Transformations of pinacones containing substituted acetylenic residues. Action of mercuric chloride and bromide on unsymm. dimethyl-phenyl-phenylethinyl-ethylene glycol, to form organomercury compounds, 1803;
– Transformations of pinacones containing substituted acetylenic radicals. The action of mercury salts on unsymm. methyl-diphenyl-phenyl-ethynyl-ethylene glycol and on trimethylphenyl-ethyl-phenylethynyl-ethylene glycol, 2747.
Acetyl peroxide, as oxidizing agent for alkadiene hydrocarbons of unsymmetrical structure, 2413;
– as oxidizing agent for divinyl, isoprene, piperylene, 3087.
Acid, acetylenedicarboxylic, and methyl ester, condensation with diene hydrocarbons (divinyl, piperylene, isoprene, dipropenyl) to form dihydrophthalic acid and esters, 2133;
– o-aldehydrobenzoic, and methyl ester, condensation with malonic ester, 143;
– p-aminobenzenesulfonic and amide spectrographic investigation of, 2801;
– 7-aminoheptanoic, attempted synthesis by the partial hydrolysis of pimelodinitrile with hydrogen peroxide, 3103;
– anthraquinone-1,5-disulfonic, hydrolysis, mechanism of, 2921;
– benzene-m-disulfonic, behavior of the disulfonic acid of diphenylsulfone under conditions of alkaline fusion of, 2235;

– γ-benzoylcaproic, and derivatives, preparation, properties, 2219;
– 2-benzothiazolesulfonic, reaction with nitrogen bases, 989;
– n-butanearsenous, esters of, see esters;
– chloroindanedionecarboxylic, ethyl ester, reaction with primary amines, 69;
– β-(N-2-chlorophenothiazyl)-propionic, and derivatives, (ethyl ester, amide, hydrazide, hydrazone, nitrile, β-chloroethyl ester), synthesis, 3227;
– chlorosulfonic, interaction with aromatic compounds. Di- and polysulfonation during sulfonation of acetanilide, 2623;
– p-dimethylaminobenzenesulfonic, and methyl ester, absorption spectra and structure, 2809;
– 5,9-dimethyldecadien-2,8-ol-5-ic-(1), esters of, see esters;
– 3,7-dimethylocten-6-ol-3-ic-(1)(β-hydroxy-α,β-dihydrogeranic), esters of, see esters;
– dithiophosphoric, mixed esters of, see esters;
– 3,6-endohexahydrophthalic, see phthalic acid derivatives;
– ethylarsinous, esters of, see esters;
– α-hydroxymethylphosphinic, substituted, di-tert-(β', β', β'-trichloro)-butyl, esters, see esters;
– 1-hydroxy-2-naphthoic, anilide of, dyes derived from, see dyestuffs chemistry;
– hypotriiodic, possibility of formation by exchange between iodine and iodate, 1715;
– isonicotinoylacetic, ester of, see ester;
– 2-keto-L-gulonic, and methyl ester, rate of conversion to L-ascorbic acid in an aqueous medium, 1639;
– meso-α,α'-diphenylsuccinic, esters of, see esters;
– methacrylic, chlorophenyl esters of, see esters;
– β-methyl-β-propylglycidic, ethyl ester, preparation, properties, reaction with aniline, 61;
– β-(4-methoxyphenyl)-α-phenylpropionic, esters of, see esters;
– monobromoacetic, systems with stannic bromide, antimony tribromide, fusibility, viscosity and density of, 2997;
– monochloroacetic, system with acetamide, density, viscosity, electrical conductivity, 1489;
– 1,8-naphthalenedisulfonic, see naphthalene compounds;
– α-nitroacetophenone-o-carboxylic, and derivatives, preparation, properties, structure, 1039;
– 1-nitronaphthalene-8-seleninic, see selenium organic compounds;
– β-N-phenothiazylpropionic, derivatives (dimethylaminoethyl ester, its amide and hydrazide, corresponding hydrazones, β'-chloroethyl ester), synthesis, 3227;
– phosphomolybdic, reaction with glycine in aqueous and aqueous alcohol media, 2847;
– phosphinic, esters, see esters;
– N-phosphoric, of trichloriminoacetyl chloride, acid chloride of, preparation, 2239;
– N-phosphoric, trichloroiminoacetic, esters, of, see esters;
– pyrosulfuric, system with dioxane, physicochemical analysis of, chemical interaction, 1545;
– silicotungstic, preparation without the use of ether, 9;
– thiodivaleric, polyesters of, see esters;
– thiophosphinic, esters, see esters;
– thiophosphoric, mixed esters of, see esters;
– trichloroacetic, system with acetamide, density, viscosity, electrical conductivity of, 2089;
– Trichloroacetic, systems with $CH_3COOC_4H_9$, $CH_3COOC_5H_{11}$, $CCl_3COOC_2H_5$, densities and viscosities at 50, 60 and 70°, 3033.
Acid chlorides, cleavage of diphenylchloroantimony and phenyldiiodoantimony with, 117;
– cleavage of tri-p-tolylantimony and tri-α-naphthylantimony by, to form corresponding fatty-aromatic ketones, 1581;
– di-, of acylamidophosphoric acids of the aromatic series, preparation, properties, 1029;
– of alkyl- and dialkyl-arsenious acid, preparation, properties, 125;
– of partial aromatic esters of arylsulfonimidophosphoric acids, preparation, 267.
Acids, acrylic, methacrylic, esters, see esters;
– acylamidophosphoric, di-acid chlorides of, see acid chlorides;
– adipic, sebacic, polyanhydrides of, quantitative characteristics of hydrolysis of, in aqueous and alkaline media, 2851;
– aliphatic, esters with 1,2,5-trimethyl-4-phenyl-4-piperidol, see esters;
– alkanesulfo-, anilides of, see anilides;
– alkyl-β-hydroxyethylphosphorous, see phosphorus organic compounds;
– alkylphosphinous, esters of, see esters;
– alkylthiophosphinic, acid esters, see esters;
– α-amino-β-mercapto, condensation with 4-aminomethylene-2-phenyl-5-oxazolone, study of products, 3811;
– aromatic, esters with 1,2,5-trimethyl-4-phenyl-4-piperidol, see esters;
– arylcarbamidophosphoric, chlorides and esters of, see chlorides, esters;
– arylphosphoric, preparation of chlorides and esters of, catalytic phenomena in the reaction of phenols with phosphorus oxychloride, 3407;
– arylsulfonimidophosphoric, mixed esters of, and non-rotational tetrahedral isomerism, 75;

– benzenedisulfonic, quantitative determination of, 2909;
– benzenedisulfonic, isomeric, hydrolysis (desulfonation), and conversion into trisulfonic acid, conditions for reactions, 3185;
– carboxylic, reaction with 1,2,4-triaminobenzene, 1921;
– chloroacetic, trichloroacetic, esters of, see esters;
– chloro- and dichlorthiophosphoric, esters of, see esters;
– chlorophenoxycrotonic, structure of, 573;
– chromotropic, and other 1,8-dihydroxynaphthalene sulfonic acids, conversion to azo compounds, improved methods of synthesis of Acid Sky Blue S, Acid Chrome Blue K, Direct Sky Blue S, 3657;
– cyclohexene-4-dicarboxylic, esters of, see esters;
– dialkylaminoacetic, esters of, see esters;
– dialkylphosphinous, dialkylphosphinic, see phosphorus organic compounds;
– dialkylphosphorous, condensation with aldehydes and ketones, to form esters, 929;
– dialkylthiophosphoric, alkali salts, reactivity of. Acylation reactions, 119;
– diarylglycolic, aryl hydrazides of, see hydrazides;
– diarylglycolic, o-toluidides of, see o-toluidides;
– diastereoisomeric γ-ethyl-β-aminocaprylic, conversion to substituted tetra- and hexahydropyrimidines, 1323;
– dibasic organic (malonic, succinic, phthalic, malic), physicochemical properties of aqueous solutions of, 39;
– γ-ethyl-β-aminocaprylic, diastereoisomeric and derivatives, (hydrochlorides, N-acyl derivatives, amides, esters), synthesis and separation of, 907;
– furyl-, and arylpyruvic, preparation, by hydrolysis of 5-arylidene-2-thiooxazolidones-4, 3443;
– glycidic, esters of, see esters;
– heterocyclic (pyridine, piperidine, quinuclidine-carboxylic), alkamino esters of, preparation, properties, hypotensive properties, 129;
– heteropoly, germanium, see germanium;
– heterotri, of phosphorus and silicon with varying composition of addends, containing molybdenum and tungsten, 1;
– 4-hydroxy- and 4-butoxy-5,6,7,8-tetrahydroaphthalene-2-carboxylic, derivatives of, preparation, properties, 155;
– hydroxy- and chloroketocarboxylic, tautomeric transformations and properties of, 1915;
– keto, of the selenophene series, use of acyloxysilanes from dicarboxylic acids and their monoethyl esters in the synthesis of, 2631;
– lower saturated monobasic, reaction with 1-octyne to form vinyl esters, 1271;
– monobasic, α,β-unsaturated, derivatives of (methyl acrylate, methyl methacrylate, butyl methacrylate, acrylonitrile), condensation with fluoroprene, 3329;
– mono- and tri- chloroacetic, binary systems with acetamide, surface tension of, 3285;
– mono, di- and tri-chloroacetic, binary systems with acetic acid, surface tension at 40, 50 and 60°, 3281;
– naphthalene trisulfonic, hydrolysis and isomerization of, 2231;
– nicotinic, isonicotinic, 2,6-dimethyldinicotinic, amides of, see amides;
– octadecenoic (oleic, elaidic, petroselenic, petroselaidic), and esters, oxidation with benzoyl hydroperoxide and influence of steric hindrance, 57;
– octadecenoic, and their esters, oxidation of, paper by A. K. Plisov and N. S. Skornyakov, letter to the editor, 2649;
– of elements of subsidiary subgroups, lattice energy of, 2341;
– organic, oxonium compound with complex ethers. The systems $HCOOC_2H_5$-CH_3COOH and $CCl_3COOC_2H_5$-CH_3COOH, 2099;
– phenylalkylarsinic, silver salts of, preparation, properties, reaction with alkyl iodides to form alkyl esters of phenylalkylarsinous acids, 2469;
– phosphinic, thiophosphinic, esters of, see esters;
– propionic, α,β-dibromo- and α,β-dichloro, nitrile and methyl ester of, see nitrile, ester;
– saccharodicarboxylic, and monolactones, electrolytic dissociation constants of, 3575;
– saturated heteropoly, (phosphomolybdic, phosphotungstic, silicomolybdic, silicotungstic), thermographic investigation of, 717;
– saturated monobasic organic, silicoanhydrides of, see silicon organic compounds;
– selenophen carboxylic, see selenium organic compounds;
– substituted benzenesulfonic, phenyl esters of, hydrolysis, influence of substituents, 2537;
– sulfonic, halophenyl esters of, see esters;
– of sulfones, see sulfones;
– tartaric, succinic, dimethoxysuccinic, comparative study of metal complexes with, 2387;
– 3,5,6,6-tetramethyl-2-carboxy-4-heptenic acid-1, 3,5,6,6-tetramethyl-4-heptenic acid-1, preparation, properties, 3699;
– thiosulfonic. Synthesis and antibacterial properties of alkyl esters of propane-1-thiosulfonic acid and butane-1-thiosulfonic acid, 3739;
– tiglic, angelic, and esters, properties, 823;
– trialkylsilanephosphoric, preparation, properties, 285;

– triketocarboxylic, preparation from naphthoquinones under the conditions of the Hooker reaction, 1907;
– trimethylacetic, formic, allyl esters, see esters;
– unsaturated, and their derivatives, configuration and properties of. Oxidation of octadecenoic acids and their esters with benzoyl hydroperoxide, 57;
– α, β-unsaturated, use of tetraacetoxysilanes in the preparation of, 1051;
– α,β-unsaturated, dibasic, esters of, see esters;
– urethanphosphoric, chlorides and esters of, preparation, properties, 2947;
Aconite alkaloids, see alkaloids.
Aconitum soongoricum Staph., alkaloids of, see alkaloids.
Acridine derivatives. Aminoacriquine and its analogs, preparation, properties, biological activity, 491.
Acridine, 9-phenyl, new methods of preparation, from diphenylisatoacid anhydride and 2-methyl-6,6-diphenyl [benzo-1',2' : 4,5-(1,3-oxazine)] suggested reaction mechanism, ease of closure of the acridine ring, 3555;
– synthesis from acyl derivatives of 2-aminotriphenylcarbinol, 2283;
– synthesis from 2-aminotriphenylcarbinol, mechanism of, 163;
Acridines, dichloro, selective dehalogenation with the aid of skeletal nickel, 639.
Acridone, 4-ethoxy, preparation, use as a fluorescent indicator, 2869;
– 10-vinyl, preparation, properties, structure, reduction, 897.
Acrylonitrile, reaction with diazonium salts in presence of cupric halides, to form α-halogeno-β-arylpropionitriles, aryl halides and phenols, 3585;
– γ-Benzoylcaproic acid and its derivatives, preparation, properties, 2219;
– Cyanoethylation of indole, 597;
– Cyanoethylation of some ketones (cyclohexanone), synthesis of δ-keto acids and derivatives, 3251;
– The diene synthesis reaction of substituted acrylonitriles, 831;
– system with methyl methacrylate – glycol esters of methacrylic acid, copolymerization of, 2517;
– system with methyl methacrylate – tetraallyl orthosilicate, copolymerization of, 2513;
– system with methyl methacrylate triallyl borate, copolymerization in presence of benzoyl peroxide, 2509;
– use in synthesis of β-alkoxypropionamides, 827.
Activators, role of, in decomposition processes in triazenes and in initiation of polymerization, 3789;
– polymerization, of styrene in presence of diazoaminobenzene, organic acids and anhydrides as, 3205.
Acylation, of alkali salts of dialkylthiophosphoric acids, 119;
– of 2,2'-halogen derivatives of 4-aminodiphenyl and 4-amino-4'-nitrodiphenyl, kinetics of, and inhibited internal rotation, 3777.
Acyl peroxides, see peroxides.
Additives, effect on the first stages of catalytic cracking of paraffins (n-octane) on aluminosilicate catalysts, 2701.
Adsorption, ion-exchange. Cation exchange in mixed solvents on volkonskoite, 371;
– specific, influence on the half-wave potential during reduction of complex compounds, 1763;
Agricultural chemistry. 2-Furyltrichloromethylcarbinol and its complex esters, 3029;
– Organic insectofungicides. A new method for the preparation of esters of chloro- and dichlorothiophosphoric acids, 519;
– New method for the preparation of halophenyl esters of sulfonic acids, 2875;
– Preparation of dialkyl chlorothiophosphates, 2871;
– Synthesis of mixed esters of dithiophosphoric acid, 2861;
– Synthesis of mixed esters of dithiophosphoric acid containing an amide group in the aliphatic ester radical, 523;
– Synthesis of mixed esters of thiophosphoric acid, 2877;
– Synthesis of mixed esters of thiophosphoric acid containing heterocyclic radicals, 925;
– The reaction of dialkyl chlorothiophosphates with p-nitrophenols in the presence of pyridine hydrochloride, 2867;
– Synthesis of some 3,6-endohexahydrophthalic acid derivatives, 227.
β-Alanine, β-4-nitrophenyl, new synthesis for, 551.
Alcohol, n-butyl, catalytic conversion to n-heptane, under pressure, 1865;
– isopropyl, catalytic decomposition with vanadium oxides, 3679;
– isopropyl, initiation of chain reaction with carbon tetrachloride by acetylated and benzoylated hydroperoxides of 1-hydroxycyclohexanone, 2209;
– isopropyl, reaction with hexachloroethane, initiated by benzoyl peroxide, mechanism of, 2485;
– systems (isopropyl alcohol-isobutyl alcohol, n-butyl alcohol-isobutyl alcohol, isoamyl alcohol-isobutyl alcohol), viscosity, density, and molecular bond energies of, 1453.
Alcohols, reaction with metallic oxides (manganese), 415;
– reaction with trichlorophosphazosulfonaryls, 533;
– acetylenic, β-cyanoethyl ethers of, see ethers;
– amino, aliphatic-aromatic, synthesis of α-(m-aminophenyl)-β-alkylaminoethanols, 2193;

– fatty aromatic. α-(p-Aminophenyl)-β-alkylaminoethanols, and hydrochlorides, preparation, 2317;
– heterocyclic, and their esters, (of piperidine, and pyran series), preparation, properties, 951;
– butyl, amination with compressed ammonia, over aluminum oxide, 2901;
– fatty aromatic amino. Methods for the preparation of α-(m-hydroxyphenyl)-β-methylaminoethanol, 2597;
– heterocyclic, of the acetylene series, piperidine derivatives, preparation, properties, hydration, physiological activity, 195;
– (methyl, ethyl, isopropyl, n-butyl), reaction with acetyl benzoyl peroxide, 2213;
– propyl, for catalytic alkylation of chlorobenzene, 2155;
– tertiary, based on camphor (tertiary alkylborneols), synthesis from camphor by the Grignard reaction, 3071;
– based on camphor (tertiary ethyl- and butylborneol), synthesis via the Grignard reaction, 3075;
– tertiary alicyclic and aliphatic, absorption spectra and halochromism of, 3013;
– tertiary trihydric, of the acetylenic series, see acetylene compounds.
Aldazines, see hydrazine derivatives.
Aldehydes, condensation with dialkylphosphorus acid, to form esters, 929;
– reaction with styrene and its homologs in presence of hydrochloric acid, 1643;
– aromatic, acyl hydrazones of, cyclization to azines, 1297;
– determination using dioxane-sulfotrioxide, 1003;
– α,β-unsaturated, (acrolein), condensation with fluoroprene, 3055.
Alkali metal cations, see cations.
Alkaloids. Structure of gentianine, 1065;
– aconite. Identity of delphelatine with eldeline, 2299;
– Monoacetylsongorine – a new alkaloid from Aconitum soongoricum Staph, isolation, properties, 299;
– C_{15}. Sophocarpinols, phenyl, ethyl, preparation, properties, derivatives, 2303;
– delphinium, Delphonine, isolation, properties, structure, reactions, 2011;
– fritillaria. Chlorination products of raddeanine, 2003;
– fritillaria. structure of raddeanine, 2007;
– Fritillaria Raddeana Rgl., isolation, properties, 623;
– from Colchicum Speciosum Stev., isolation of speciosine, properties, 3591;
– of Elaeagnaceae family, isolation of tetrahydroharmol and N-methyltetrahydroharmol from the bark of Elaeagnus Angustifolia L., 3593;
– of Galanthus Woronovi, isolation of galanthamidine, properties, 179;
– of Leontice Ewersmannii BGE. Leontine, the structure of the heterocyclic nucleus, 301;
– of Leontice ewersmannii BGE: taspine, structure, cleavage, 2957;
– of the branchy plantain (Plantago Ramosa, Syn. P. Indica), extraction and structure of plantagonine, 2307;
– of the plants of the poppy family, isolation and properties of fumandine, fumaramine, fumaritine, fumarinine, fumvaline, pagibrine, remeridine, chelidamine, 181.
Alkanes, dibiphenyl, organometal synthesis of, properties, hydrogenation, 1409.
Alkoxyl groups, reaction for the exchange of, by the radicals of organomagnesium compounds, 3363.
Alkylation of benzene, by pseudobutylene using a $BF_3 \cdot H_3PO_4$ catalyst, 2435;
– with alkyl bromides using aluminum as catalyst, formation of complex compounds, factors affecting yield of alkylbenzene, 2441;
– with chlorocyclohexane and chlorocyclopentane, in presence of metallic aluminum as catalyst, 3019;
– with di-(1-hydroxy)-cyclohexylacetylene monoacetate in the presence of $AlCl_3$, 3067;
– of diphenyl, with alcohols in the presence of BF_3, 215;
– catalytic, of chlorobenzene with propyl alcohols, 2155;
– cyclo, of aromatic compounds. Condensation of 1,4-cyclohexanediol and 4-chlorocyclohexanol with benzene, 545;
– Reaction of 1-phenylcyclohexanol with benzene, 201;
– β-halo, of nitrogen, by the method of conjugated reaction, 187.
Alkyl halides, see halides.
Alkyl hypochlorites, see hypochlorites.
Allyl compounds. Bromine addition reactions of allyltrimethylammonium perchlorate, 3037;
– Synthesis of 2,2,3,5,6,8,9,9-octamethyldecadiene-3, 7, 3,5,6,6,-tetramethyl-2-carboxy-4-heptenic acid-1 and 3,5,6,6-tetramethyl-4-heptenic acid-1, 3699;
– halogen derivatives of, condensation with cyclic 1,3-diketones and inner-molecular cyclization (with loss of water) of the resultant compounds, 939.
Allylmethylacetylene, see acetylene derivatives.
Alumina, reaction with FeS in presence of carbon, 29.
Aluminum, metallic, catalytic reactions with. Alkylation of benzene with chlorocyclohexane and chlorocyclopentane, 3019.

Aluminum bromide, influence of alkali metal cations in complex compounds of, on the molecular composition of these complexes in solvents of low dielectric constant, 2985;
– systems with anisole, pyridine, diphenyl ether, benzophenone, nitromethane, nitrobenzene, dioxane, dielectric properties of, 1511.
Aluminum chloride, system with urea-water, physicochemical analysis of, 399;
– solutions, electrical conductivity and viscosity in nitromethane, 1753.
Amide, p-aminobenzenesulfonic acid, see acid;
– benzosulfodibromo, action on solutions of piperylene in methyl and ethyl alcohols, to form 1-bromopenten-3-ol-2- and 2-ol-4-ethers, 2137;
– β-chloroethyl, of nicotinic acid, preparation, 881;
– of acetoacetic acid, preparation, conversion to pyrazolones (1-(2'-chloro-5'-sulfophenyl)-3-methyl-5-pyrazolone), 2543.
Amides, β-alkoxypropionic acid, synthesis using acrylonitrile, by the Radziszewski method, 827;
– N-aryl, of chlorosuccinic acid, preparation, properties, 221;
– benzosulfodichloro-, benzosulfodibromo-, action on alcohol solutions of isoprene, to give 1,2 and 1,4-chloro- and bromo-ethers reactions and properties of the products, 2447;
– N-benzyl-β-chloropropiono, preparation, anticonvulsant action, 2915;
– bis (β-chloroethyl), of nicotinic, isonicotinic, 2,6-dimethyldinicotinic acids, preparation, properties, 2275;
– carboxylic acid, nomenclature of compounds obtained by treating with phosphorus pentachloride, 2323;
– methyl, of N-benzoyl-O-peptides, see peptides;
– of carboxylic acids, reaction with phosphorus pentachloride to form trichlorophosphazoacyls, 1033.
Amidines, amino acid, of the dihydropyrazine series. Preparation from the imino ether of (O,O-dibenzyl-2,5-dihydropyrazine)amidines, 275.
Amination, with compressed ammonia, of ethers and esters of phenol, 815;
– catalytic, of organic compounds (butyl alcohols), with compressed ammonia over aluminum oxide, 2901;
– catalytic, of nitro compounds of the aromatic series (mononitro derivatives of aromatic hydrocarbons), with compressed ammonia, 917;
– direct, of benzothiazole derivatives, with hydroxylamine, 3773.
Amines, physicochemical analysis of reaction with acids, 1497, 1505;
– acetylenic, see acetylene compounds;
– aliphatic, aromatic, relationship between properties and molecular state in liquids, 2571;
– aromatic, catalytic condensation with acetylene. Synthesis of 2-(hydroxyphenyl)quinoline derivatives, 263;
– determination of amino groups using a solution of sulfur trioxide in dioxane, 1003;
– diphenyl, triphenyl, action of oxidizing agents (hydrogen peroxide, potassium permanganate), 557;
– poly. Application of the Hoffman reaction to high-molecular compounds containing amide groups, 2561;
– primary (aniline, methylaniline, m-toluidine, α- and β-naphthylamine, ethylamine), reaction with the ethyl ester of chloroindanedionecarboxylic acid, 69;
– primary, secondary, reaction with divinyl oxide, to form the corresponding aminoalcohols, 2125;
Amino acids, arylsulfonyl derivatives of, preparation, properties, 921;
– natural, and their analogs, preparation, properties, physiological activity, 3195;
– α-N^{15}, synthesis, via condensation of potassium N^{15}-phthalimide and esters of α-halo acids, 2587;
– preparation from thiophene derivatives, 2893.
Aminoacriquine, see acridine derivatives.
Aminoalcohols, see alcohols, amino.
2-Aminothiazole, see thiazole compounds;
– 4-methyl-5-acetyl, see thiazole compounds.
Ammonia, condensation with cyclohexanone, 649;
– reaction with esters of glycidic acids, reactivity of oxide ring, 1585.
Ammonium-calcium octoborate, see boron compounds.
Ammonium chloride solutions, aqueous, thermochemistry of, 1465.
Ammonium fluoberyllate, system with $NH_4MnF_3 - H_2O$, solubility at 25°, 2039.
Ammonium manganese fluoride, system with $(NH_4)_2BeF_4 - H_2O$, solubility at 25°, 2039.
Ammonium nitrate, systems with $NaNO_3-H_2O$, KNO_3-H_2O and $RbNO_3-H_2O$, physicochemical analysis at 25°C, 1169.
Ammonium salts, formation by reaction of trimethylamine with polyhalides, 797.
Amyl acetate, system with CCl_3COOH, densities and viscosities at 50, 60 and 70°, 3033.
Analgesics, esters of 1-alkyl-2,5-dimethyl-4-phenyl-4-piperidinols, as, homologs of promedol and isopromedol, 3533;

– preparation and separation of isomers of 1-alkyl-2,5-dimethyl-4-phenyl-4-piperidinols, 3521.
Analytical chemistry. Absorption spectra and structure of benzene derivatives. p-Dimethylaminobenzenesulfonic acid and its methyl ester, 2809;
– Spectrographic investigation of p-aminobenzensulfonic acid and its derivatives, 2801;
– Application of dioxane-sulfotrioxide to the determination of mono- and polyhydroxy compounds, 475;
– A study of the redox properties of germanium heteropolyacids, 2969;

– Dielectric properties of solutions of aluminum bromide in some organic substances, 1511;
– Further discussion on the polarographic determination of the composition and stability of complex ions in solution in stepwise complex formation, 2327;
– Hydrolysis of alkyldioxanes, 3061;
– Methods of establishing the mechanism of the co-precipitation of radioelements with precipitates of difficultly soluble salts, 1077;
– Molecular chromatography. Resolution of nitroanilines, 93;
– Potentiometric study of chlorite solutions, 1439;
– Preparation of the fluorescent indicator 4-ethoxyacridone, 2869;
– Reaction of rhenium with cyanides of iron, 1099;
– Solubility of the oxalates of calcium, strontium, barium, cadmium, copper and lead in aqueous solutions of potassium nitrate, 1167;
– Study of phosphate complexes in solution, 751;
– Study of the mechanism of hydrolysis with the aid of the heavy oxygen isotope. Hydrolysis of ethyl propionate in alkaline medium, 1183;
– Study of the sulfonation reaction. Quantitative determination of benzendisulfonic acids, 2909;
– Sulfonation and sulfonic acids of acidophobic compounds. Use of dioxanesulfotrioxide for the determination of aromatic amines and aldehydes, 1003;
– The determination of water in complex compounds using the Fischer reagent, 2993;
– The Liebermann nitroso group reaction, 1579;
– The polarographic behavior of stypticin, (alkaloid cotarnine – N-methyl-6,7-methylenedioxy-3,4-dihydroisoquinoline chloride), 2991;
– The reaction, between glycine and phosphomolybdic acid, 2847;
– Thermographic investigation of the most important saturated heteropoly acids, 717.
Androgens, nonsteroid, (diethyl α,β-dicyclopentanone-2,2'-ethanedicarboxylate-1,1'), biological activity, 3371.
Androstane and 18-norandrostane series, see steroid compounds.
Androstanediol-3 β, 17, 17 α-methyl, see steroids.
Androstadienol-3, 17, β-dimethyl-18-nor-$\Delta^{8,12}$-acetate of, see steroid compounds.
Anesthetics, synthesis of esters of tertiary and secondary 4-piperidols, 3153;
– synthesis of esters of 1,2,5-trimethyl-4-aryl-4-piperidol, 3139;
– synthesis of esters of 1,2,5-trimethyl-4-phenyl-4-piperidol with aliphatic acids (isopromedol and promedol), 3117;
– synthesis of esters of 1,2,5-trimethyl-4-phenyl-4-piperidiol with aromatic acids, 3131.
Anhydrides, poly, of adipic and sebacic acids see acids;
– silico, of saturated monobasic organic acids, see silicon organic compounds;
– of unsaturated monobasic acids, see silicon organic compounds.
Anilide, of 1-hydroxy-2-naphthoic acid, see acid.
Anilides, of alkanesulfo acids, chlorination with elementary chlorine in CCl_4 and also in alkaline medium, to form alkanesulfo-2,4-dichloroanilides, proof of structure of the products, 3177;
Aniline, reaction with propargyl aldehyde, structure of the product, 1623;
– reaction with the ethyl ester of β-methyl-β-propylglycidic acid, opening of oxide ring, 61;
– system with acetic acid-water, electrical conductivity of, 1185;
– system with allyl mustard oil, electrolytic dissociation in, 1191.
Aniline blue, and carbinol, reaction with acids, mechanism of, 3425.
Aniline, dimethyl, condensation with acetylene and acetaldehyde, 1857.
Anilines, nitro, hydrogen bond and physical properties, (density, surface tension, internal friction coefficient, 2567;
– resolution by molecular chromatography, 93.
Anils, alkali organic compounds of, structure and chemical transformations of. Transformations of disodium and dilithium compounds of benzophenonephenylimide under the influence of alkyl halides, 899;
– p-phenylazo-substituted, of glutaconic dialdehyde, structure and color of, 105.
Anisole, system with stannic chloride, viscosity and density of, 2697;
– see also ethers, phenolic.

Anthracene, new method of chloromethylation of formation of 9,10-bis-(piperidinomethyl)-anthracene and 9,10-bis-(anilinomethyl)-anthracene, 3479;
– system with hexachloroethane, study by the thermal analysis method, 3615.
Anthranilic acid, system with acetamide, fusibility, density, viscosity, electrical conductivity, chemical interaction, 1493.
Anthraquinone, β-amino, reaction with sulfur chloride (Hertz reaction), 109.
Anthraquinone compounds. Hydrolysis of anthraquinone-1,5-disulfonic acid, mechanism of, 2921.
Antimalarial compounds. 6-Methoxy-8-(4'-aminopentyl)-aminoquinoline, preparation, properties, 999.
Antimony, system with zinc, enthalpies of formation of compounds in, 321.
Antimony organic compounds. Cleavage of diphenylchloroantimony and phenyldiiodoantimony with acid chlorides and alkyl halides in presence of aluminum chloride, 117;
– Cleavage of tri-p-tolylantimony and tri-α-naphthylhalides in presence of aluminum chloride, 1581.
Antimony tribromide, system with monobromoacetic acid, fusibility, viscosity and density of, 2997.
Antipyrine, reaction with thiocyanates of zinc and cadmium, 1553;
– system with chloral hydrate-water, stratification in, 393;
– system with water, crystallization in, 393;
Antitubercular compounds. Synthesis and properties of sulfamethine, 175;
– aromatic derivatives of thiourea as, preparation, properties, 1021.
Arbuzov rearrangement, see rearrangement.
Arsenic organic compounds. Action of acetyl chloride and acetic anhydride on alkyl esters of arsenious acid, 435;
– Alkyl- and dialkylarsenious acid chlorides, preparation, properties, 125;
– Cyclic esters of ethylarsinous acid, preparation, properties, hydrolysis, reactions with acetyl chloride, acetic anhydride, methyl iodide, 2759;
– Esters of butanearsenous acid, preparation, 775;
– Some esters of dibutylarsinic acid, preparation, properties, molecular refraction, calculation of atomic refraction of the arsenic, 3803.
Arsine, enthalpy of formation of, 2023.
2-Arylbenzothiazoles, see thiazole compounds.
N-arylmaleimides, see imides.
L-Ascorbic acid, formation from 2-keto-L-gulonic acid and its methyl ester in an aqueous medium, 1639.
Association of amines and imines, (aromatic), association in liquids, 2571.
Auxochrome effect of elements (cations), quantitative aspects of, 2661.
Azine, acetone, action of alkyl halides on, influence of various factors on ratio of products, 2201.
Azines, see also hydrazine derivatives;
– hydrochlorides and N-formyl derivatives, U. V. absorption spectra, 3495;
– aldehyde, synthesis by cyclization of acylhydrazones of aldehydes, 1297;
– isobutyraldehyde, isovaleraldehyde, cyclization with alkyl halides to the corresponding 4,5-dialkylpyrazolines and their N-alkyl derivatives, 2905.
Azo compounds, see also dyestuffs chemistry;
– alkoxydianilidophosphazosulfonaryls, preparation, properties, 287;
– inner complex salts of. Reaction of copper salts with some o-hydroxy- and o-amino, o'-alkoxy- and-o'-aroxy-monoazo compounds, 405;
– inner complexes of. The reaction of copper salts with certain o-hydroxy- and o-amino-o'-methylthioazo compounds, 3577;
– p-Nitrophenyl sulfides and sulfones of benzazoles and 4-phenylphthalazine, preparation, properties, hydrolytic cleavage of sulfones, 2549;
– Reaction of phosphorus pentachloride with carboxylic acid amides. Trichlorophosphazoacyls, preparation, properties, 1033;
– Reaction of trichlorophosphazosulfonaryls with alcohols, 533;
– Trichlorophosphazotrichloroacetyl and the acid chloride of the N-phosphoric acid of trichloriminoacetyl chloride, preparation, properties, 2239;
– Triphenylphosphazosulfonaryls, preparation, properties, 1027.
Azomethine dyes, see dyestuffs chemistry.
Bactericides. Dependence of antimicrobial activity of chloromycetin on structure and mechanism of action, 885.
Baker-Nathan effect, experimental proof of, based on optical data on the characteristic oscillation frequencies of molecules, 2107.
Barbituric acid derivatives, containing a cyclohexenyl group, (Phanodorm, Evipan), reaction with a hydrochloric acid solution of iodine chloride, 167;
– reaction with a hydrochloric acid solution of iodine chloride; thiobarbiturates, thiourea, 297.

Barbituric acids, spiro, synthesis from methylene-malonic ester and bicyclic dienes-1,1'-dicyclopentenyl and 1,1'-di-cyclohexenyl and subsequent treatment of the esters formed, with urea, in presence of sodium ethylate, 3173.
Barium silicate, fluoride, see silicates, fluorides.
Benzamide, complex formation with other organic compounds, 2079.
Benzene, alkylation with alkyl bromides, in presence of metallic aluminum, formation of complex compound, factors affecting yield of alkylbenzene, 2441;
– alkylation with chlorocyclohexane and chlorocyclopentane, in presence of metallic aluminum as catalyst, 3019;
– alkylation with di-(1-hydroxy)-cyclohexylacetylene monoacetate in the presence of $AlCl_3$, 3067;
– alkylation with polyhalogenated derivatives (1,2-dichloroethane), in presence of metallic aluminum, 1549;
– alkylation with pseudobutylene using a $BF_3 \cdot H_3PO_4$ catalyst, 2435;
– binary systems with ethylbenzene, dibromoethane, methyl acetate, study by the viscosity-density method, mol. wts. of components, 765;
– condensation with 1,4-cyclohexanediol and 4-chlorocyclohexanol, 545;
– condensation with styrene, under various conditions, 1853;
– reaction with 1-phenylcyclohexanol, in presence of aluminum chloride, and bromide, ferric chloride, 201;
– sulfonation with oleum, formation of diphenyl sulfone sulfonic acids, 1379;
– chloro, catalytic alkylation with propyl alcohols, 2155;
– p-dichlorobenzene, systems with hexachloroethane, study by the thermal analysis method, 3615;
– disulfonic acids, see acids;
– p-divinyl, synthesis from terephthalic acid, 635;
– sulfodichloramide, see dichloramide;
– 1,4-diacetyl, syntheses based on, 1283;
– diazoamino, as initiator of polymerization of styrene, kinetics of breakdown of, products of decomposition, 3205;
– 1,3-dinitro, molecular complex with dimethylaminostilbene, absorption spectra of, 1979;
– 2,4-dinitrochloro, interaction products with β-picoline, formation of the 2,4-dinitrochlorophenylate of β-picoline, a violet polymethine dye and a decomposition product of the dye, 3845;
– ethyl, binary system with benzene, study by the viscosity-density method, 765;
– ω-nitroethyl-p-nitro, see benzene derivatives.
– tert.-butyl, derivatives, investigation of the mobility of the tertiary butyl group in, by the method of isotopic exchange, 1837;
– 1,2,4-triamino, reaction with carboxylic acids, 1921;
– 1,2,4-trichloro, vapor-phase hydrolysis in presence of phosphate catalyst, 1845.
Benzene derivatives, absorption spectra and structure of, 2,5-Dihydroxyacetophenone and its methyl ethers, 311;
– Synthesis of ω-nitroethyl-p-nitrobenzene from 2-nitro-2-(p-nitrobenzyl)-indandione-1,3, 3469.
Benzene series, unsaturated ketones of, see ketones.
Benzimidazole, see also imidazole derivatives.
Benzimidazole derivatives, quaternary salts of, structure of products of alkali treatment, (opening of imidazole ring), 2779;
– Synthesis and properties of. The reaction of 1,2,4-triaminobenzene with carboxylic acid, 1921.
Benzine, binary system with salicylic acid, ternary system with salicylic acid – water, metastable equilibrium in, 3609.
Benzoic acid, system with acetamide, fusibility, viscosity, density, electrical conductivity, chemical interaction, 1493.
Benzophenone, halo derivatives of, preparation, reaction of m-iodobenzoyl chloride with some aromatic hydrocarbons and halo derivatives, 2221.
– phenylimide, see imide.
p-Benzoquinone, and chloro, 2,3-dichloro derivatives, see quinone compounds.
Benzoyl chloride, m-iodo, reaction with aromatic hydrocarbons to form ketones, 2221.
Benzoyl peroxide, acetyl, reactions with alcohols (methyl, ethyl, isopropyl, n-butyl) and acetic acid, 2213.
Benzyl alcohol, system with chloral at 25, 50 and 70°, viscosity and density of, 3001.
Benzylamines, substituted, synthesis from the corresponding benzyl chlorides via the urotropine salts, 2915.
Beryllium chloride, heterogeneous equilibria in aqueous ternary systems with chlorides of first group metals, 1449.
Beryllium hydroxide, solubility product of, 1745.
Biochemistry. The enzymatic hydrolysis of N-benzoyl-O-peptides of serine and threonine, 3413.
Bismuth, system with strontium, thermal analysis of, 1705.
Bispyran, 3,4-diketones, of furanidine series, for the synthesis of condensed heterocyclic systems (quinoxalines, dihydropyrazines, imidazoles), triazine compounds, 2293.

Bisulfite compounds, of 4-nitroso-1-naphthol and 1-naphthol, see 1-naphthol.
Borate, triallyl, system with methyl methacrylate – acrylonitrile, copolymerization in presence of benzoyl peroxide, 2509.
Boron compounds. Ammonium-calcium octoborate, preparation, properties, 15.
Boron fluoride, use as a catalyst in organic chemistry. Alkylation of benzene by pseudobutylene using a $BF_3 \cdot H_3PO_4$ catalyst, 2435.
Boron organic compounds. Interaction of copper tetraphenyl boron with carbonyl compounds, 3829.
Boron trifluoride, use in alkylation of diphenyl with alcohols, 215.
Bromide, phenylmagnesium, reaction with silicon tetrafluoride, to form organosilicon compounds, 113.
Bromides and nitrates of potassium and silver, and chlorides and nitrates of potassium and silver, irreversible reciprocal systems of the singular type with layering, from, 19;
– alkyl, for alkylation of benzene in presence of metallic aluminum as catalyst, factors affecting yield of alkylbenzene, 2441;
– methylmagnesium, ethylmagnesium, see magnesium organic compounds.
Bromination, of unsaturated compounds. Bromine addition reactions of allyltrimethylammonium perchlorate, 3037.
Bromine, action on 1-phenyl-1-α-(or β-)-naphthyl-2-methylethylenes, 459;
– hydrogen bromide and alkyl hypobromites, order of addition to allylmethylacetylene (hexen-1-yne-4), 3693.
Butadiene, chemical structure of autopolyner of, 1827.
Butadiene-1,3, reaction with phenyldiazonium chloride and bromide, 3091.
Butadienes, 2-halogeno- and 2-alkoxy, condensation with propargylaldehyde to 4-halogeno- and 4-alkoxy-Δ 1,4-dihydroxybenzaldehydes, 2741.
1,3-Butanediol, polyesters, see esters.
Butanone-2, 1,4-diamino, preparation, properties, derivatives, 1861.
Butene-2, 2-chloro-4-mercapto, preparation, properties, 255;
– 4-chloro-1-phenyl, preparation, properties, reactions, 3091;
– 2,4-dichloro-, synthesis of cyanamide derivative, secondary amine and its derivatives, 2719.
Butyl acetate, system with trichloroacetic acid, densities and viscosities at 50, 60 and 70°, 3033.
N-Butylamine, preparation from n-butyl alcohol and ammonia, in presence of mixed oxide catalysts, 2479.
Butyl bromide, tert., reaction with divinylethylacetylene, in presence of zinc halides, 431.
Butyl chloride, tert., reaction with divinylethylacetylene in presence of zinc halides, 431.
n-Butyl formate, system with titanium tetrachloride, viscosity, density and conductance, compound formation in, 3297.
Butyl group, tertiary, investigation of the mobility of, in derivatives of tert.-butylbenzene by the method of isotopic exchange, 1837.
Butylene, pseudo, for alkylating benzene using a $BF_3 \cdot H_3PO_4$ catalyst, 2435.
Butyric acid, system with urea-water, thermal analysis of, 1505.
Cadmium chloride, system with KCl-H_2O, study of complex formation in, using refractometry, 3627;
– sulfate, see chlorides, sulfates.
Cadmium thiocyanate, see thiocyanates.
Calcium chloride, systems with NaCl-H_2O, KCl-H_2O, vapor pressures of, 1161;
– sulfate, see chlorides, sulfates.
Calcium sulfate, system with Na_2Cl_2-K_2Cl_2, equilibrium diagram of, 747.
Camphene, mechanism of racemization on titanic acid, 2711;
– physical properties of, 2641.
Camphor, synthesis of tertiary alcohols based on (tertiary alkylborneols), via the Grignard reaction, 3071;
– tertiary alcohols based on (tertiary ethyl- and butylborneol), synthesis via the Grignard reaction, 3075.
Camphorates, of rare earth elements, preparation, properties, 401.
Carbazole, 1,2,3,4,5,6,7,8-octahydro, and N-acetyl derivative, preparation, properties, 607.
Carbazole, compounds. Synthesis of N-phenylcarbazole-propene oxide, 905.
Carbazoles, N-benzyl-1,2,3,4-tetrahydro, see indole derivatives.
Carbinol, 2-aminotriphenyl, conversion to 9-phenylacridine, mechanism of, 163;
– 2-furyltrichloromethyl, see furan derivatives.
Carbinols, aromatic, absorption spectra of, and halochromism, 3005.
Carbolines, 1,2,3,4-tetrahydro, see indole derivatives.
Carbon, solubility in molten iron, influence of additives on, 1725.
Carbon tetrachloride, initiation of chain reaction with isopropyl alcohol by acetylated and benzoylated hydroperoxides of 1-hydroxycyclohexanone, 2209;

– reaction with tetrasubstituted silanes, 1255.
Carbostyril, tautomerism with α-pyridone, pH measurements, infrared spectra, 2257.
Catalysis. Catalytic reactions with metallic aluminum. Alkylation of benzene with chlorocyclohexane and chlorocyclopentane, 3019.
Catalyst, boron fluoride as. Alkylation of benzene by pseudobutylene using a $BF_3 \cdot H_3PO_4$ catalyst, 2435;
– S. V. Lebedev's, and its dehydrogenating and dehydrating components, use in conversion of acetaldehyde to crotonaldehyde benzaldehyde o-tolualdehyde, o-xylene, 2733;
– metallic aluminum as. Alkylation of benzene with alkyl bromides, 2441.
Cations, alkali metal, of complex compounds of aluminum bromide, influence on the molecular composition of these complexes in solvents of low dielectric constant, 2985.
Catalysts, mixed oxide, use in synthesis of N-butylamine, 2479;
– oxides of transition metals as, for oxidation of hydrocarbons (propylene), 1541;
– skeletal nickel, method for the determination of the activity of, with the aid of the cementation reaction, 3649;
– use in reduction of aromatic nitro compounds, influence of functional groups, 1973;
– vanadium oxides, as, in the decomposition of isopropyl alcohol, 3679.
Cellulose chemistry. A study of the comparative reactivity of the hydroxyl groups in cellulose. The distribution of methoxy groups in partly methylated cellulose obtained by the methylation of cellulose with diazomethane, 3755;
– Role of phosphoric acid in the study and treatment of cellulose. Swelling and solution of cellulose in phosphoric acid, 3357;
– Structure and properties of cellulose. Investigation of the relative reactivity of the hydroxyl groups of cellulose. Distribution of methoxy groups in partially methylated cellulose prepared in an alkaline medium, 1649;
– Study of the comparative reactivity of the hydroxyl groups in cellulose. The distribution of methoxy groups in partly methylated cellulose prepared in a medium of bases, 3749.
Cellulose cuprammonium solutions, chemistry of, interrelationships between components, study based on precipitation with NaOH or LiCl, absorption spectra, 3347.
Cellulose vinyl ethers, see ethers.
Cellulose xanthate, change in chemical heterogeneity of, during the ripening of viscose, 2205.
Chinocid (6-methoxy-8-(4'-aminophenyl)aminoquinoline), see quinoline compounds.
Chloral, binary systems with acetone, methyl ethyl ketone, methyl propyl ketone, acetylacetone, viscosity and density of, 3639;
– systems with benzyl alcohol, cyclohexanol, viscosity and density of, 3001;
– systems with phenol, o-, m- and p-cresol, viscosity and compound formation in, 3291;
– hydrate, system with antipyrine-water stratification in, 393.
Chloride, benzylmagnesium, reaction with silicon tetrafluoride with formation of dibenzyl and tetrabenzylmonosilanes according to conditions, mechanism of the reaction, 3683;
– carbomethoxysulfanilyl, reaction with 2-aminothiazole, influence of temperature, duration of the process, solvent, on the composition of the product, 3181.
Chlorides, alkylpolysilane, direct synthesis of, from chlorinated alkylsilane and -disilane chlorides, 1413;
– and iodides of potassium and lead with internal heterocomplex, reciprocal system of, 1119;
– and iodides of sodium and cadmium, irreversible-reciprocal system of, 1457;
– and iodides of sodium and lead, irreversible reciprocal system of, study by the visual-polythermal method, 2673;
– and molybdates of lithium and cadmium, ternary reciprocal system of, study by the visual-polymetric method, 2977;
– and nitrates of potassium and silver, and bromides and nitrates of potassium and silver, irreversible reciprocal systems of the singular type, from, with layering, 19;
– and orthovanadates of lithium and cadmium, diagonal sections of the reciprocal systems of, study by the visual-polymetric method, 2977;
– and sulfates of potassium and cadmium, adiagonal reciprocal system of, double decomposition, complex-formation and polymorphism in, 725;
– and sulfates of potassium and calcium, ternary reciprocal system of, surface of crystallization, 349;
– and tungstates, of lithium and cadmium, diagonal sections of the reciprocal systems of, study by the visual-polymetric method, 2977;
– of lithium and silver, reciprocal system of, with layering, 1749;
– of sodium and potassium, adiagonal reciprocal system of, study by the visual polythermal method, 2365;
– of arylcarbamidophosphoric acids, preparation, properties, reaction with alcoholates of aliphatic alcohols to form esters, 2555;
– of arylphosphoric acids, see acids;

– of first group metals, heterogeneous equilibria in aqueous ternary systems with beryllium chloride, 1449;
– of urethanphosphoric acids, see acids.
– sulfenyl, reaction with phosphites (esters of phosphorous acid), and alkylhalogeno phosphites, to form S-alkyl-O-alkyl phosphates and S-alkyl-O-alkyl halogenophosphates, O-aryl thiophosphates, arylphosphonium dichlorides and disulfides, 3765;
Chlorination, of alkanesulfo acids, to form alkanesulfo-2,4-dichloroanilides, proof of structure of the products, 3177;
– of dichlorohexadiene and dehydrochlorination of the reaction products, 1817;
– of ketene, to form a mixture of chloroacetyl and dichloroacetyl chlorides, 451;
– of titanium monoxide at 300-700°, 721;
– photochemical, of phenyltrichlorsilane, 1391.
Chlorite solutions, potentiometric study of, 1439.
Chloromethylation, of anthracene, new method of, formation of 9,10-bis-(piperidinomethyl)-anthracene and 9,10-bis-(anilinomethyl)-anthracene, 3479.
Chloromycetin, chemistry of. Dependence of antimicrobial activity on structure and mechanism of action, 885.
Chromatography, molecular. Resolution of mixtures of nitroanilines, 93.
Chromic sulfate, green and violet modifications of, properties, 1085.
Chromium sulfate, preparation, thermographic study of, 1445.
Chromotropic acid, see acids.
Chrysene compounds. Condensation of cyclic allyl halo-derivatives with cyclic 2-methyl-1,3-diketones and intramolecular cyclization of the resultant compounds to ketones containing the hydrogenated skeleton of chrysene, 1667.
Cinnamic acid, preparation using tetraacetoxysilane, 1051;
– system with acetamide, fusibility, viscosity, density, electrical conductivity, chemical interaction, 1493.
Citrate complexes, of vanadium compounds, formation, composition, influence of pH, 1527.
Coal chemistry. Changes in phenolic ethers during catalytic hydrogenation, 2855.
Cobalt, complex compounds with dimethylglyoxime, formed in presence of Na_2SnO_3, composition of, 1771;
– compounds. Determination of the solubility of $Co[Hg(CNS)_4]$, as a function of temperature, 387;
– sulfate, system with sodium sulfate, phase diagram of, 367.
Colchicum Speciosum Stev., alkaloids of, see alkaloids.
Color, and exomolecular reactions. Study of the absorption spectra of molecular complexes of 1,3-dinitrobenzene and 2,4-dinitrostilbene with dimethylaminostilbene, 1979;
– of certain indamine dyes derived from α-naphthol containing substituents in the naphthalene nucleus, 2831.
Complex compounds, internal, the role of pH in the formation and extraction of, 2061.
Complex formation, in systems PCl_5-HCl- organic solvent, 1141;
– of acetamide and benzamide with other organic compounds, 2079;
– stepwise, criticism of method proposed for calculating the constants of unstable complexes, 2325;
– stepwise, further discussion on the polarographic determination of the composition and stability of complex ions in solution in, 2327.
Compounds, containing three-membered ring. Study of the reaction of the ethyl ester of β-methyl-β-propylglycidic acid with aniline, 61;
– of variable composition, chemistry of. The tantalum-selenium system, 2651;
– of variable composition, chemistry of and the periodic law, 2347;
– of variable composition, chemistry of. Lattice energy of acids of elements of subsidiary subgroups, 2341.
Conductivity, electrical, of solutions of aluminum chloride in nitromethane, 1753;
– of ternary systems of amines, acetic acid and water, 1185;
– ionic, of liquid chemical compounds and systems, influence of temperature on, 1149.
Copperammonium sulfate, system with zincammonium sulfate – water, at 20°, equilibrium in presence of the radioactive indicators Zn^{65} and Cu^{64}, 2033.
Copper organic compounds. Interaction of copper tetraphenyl boron with carbonyl compounds, 3829.
Copper salts, see salts.
Co-precipitation, of radio elements with precipitates of difficultly soluble salts, methods of establishing mechanism of, 1077.
Corelborin P, (cardiac glycoside from red hellebore), isolation of saccharide component, 1999.
Corticosteroids, see steroid compounds.
Cotarnine, see stypticin.
Coumarins, benzotetrahydro, isomeric, synthesis from cyanoethylated ketones (α- and β-tetralones), 3167.

Cracking, catalytic, of paraffins (n-octane), on aluminosilicate catalysts, effect of additives on the first stages of, 2701.
Cresol, o-, m- and p-, systems with chloral, viscosity and compound formation in, 3291.
Curarising agents, nitrogen-containing derivatives of esters of meso-α,α'-diphenylsuccinic acid, as, 977.
Cyanhydrins, of γ-piperidones, tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones, preparation, stereochemistry of, use as intermediates for the synthesis of new anesthetics of the α-eucaine structure, 3545;
– of γ-piperidones, tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones, synthesis of 1-alkyl-2,5-dimethyl-4-carbalkoxy-4-piperidols, 3877.
Cyanides, iron, reaction with rhenium, structure of complex, 1099.
Cyanoethylated ketones, see ketones.
Cyanoethylation, of indole with acrylonitrile, 597;
– of ketones (cyclohexanone) with the aid of acrylonitrile, synthesis of δ-keto acids, and derivatives, 3251.
Cyclic compounds, methods of introducing the dihydroxyacetone, glycerol and dihydroxypropanecarboxylic side chains, 1343.
Cyclization, in the imidazole series. Action of phosphorus oxychloride and of acetic and phosphoric acids on 2-β-ketoalkyl(aryl)-mercaptoimidazoles, 2785;
– of aldazines under the influence of alkyl halides, to corresponding 4,5-dialkylpyrazolines and their N-alkyl derivatives, 2905;
– of aldazines under the influence of anhydrous formic acid, to 1-formyl-4,5-dialkylpyrazolines, 2593;
– of 2,2-diindandionyl-1-acenaphthenone, 1959.
Cycloalkylation, see alkylation, cyclo.
N-Cycloalkylethanolamines, see ethanolamines.
Cycloheptyl, di-, preparation, contact transformation in the presence of platinized carbon, formation of phenanthrene, fluorene, 1-methyl-1-cyclohexylcyclohexane, 1-methyl-1-phenylcyclohexane, tolylbenzenes, isomeric ditolyls, 3673.
Cyclohexadienes, methyl, conversion to dinitrotoluenes under the action of a nitrating mixture, 1811.
Cyclohexane, oxidative chlorophosphination using phenyldichlorophosphine, 3375;
– 1-methyl-3,4-dibromo, reaction with quinoline, to form toluene, 1813;
– 1,2,3-tribromo, synthesis, properties, reaction with quinoline, to form benzene, 1575;
– 1,3,5-n-trimethyl, isopropyl, isomerization by aluminum chloride, 3043.
Cyclohexane compounds. Cycloalkylation of aromatic compounds. Condensation of 1,4-cyclohexanediol and 4-chlorocyclohexanol with benzene, 545;
– Dehydration of 2-methyl-5-(1-hydroxycyclohexyl)-hexyne-3-diol-2,5-and 2,4-di-(1-hydroxy-cyclohexyl)-butyne-3-ol-2, 439.
Cyclohexanol, system with chloral, at 60 and 80°, viscosity and density of, 3001;
– 1-phenyl, reaction with benzene, in presence of aluminum chloride and bromide, ferric chloride, 201.
Cyclohexanone, condensation with ammonia, 649;
– conversion to unsaturated δ-lactone, 861;
– azine, transformations of, in presence of acidic agents, 607;
– azine and phenylhydrazone, behavior towards oxidizing agents, 561;
– enol acetate of, preparation, reaction with N-bromosuccinimide, 967;
– 1-hydroxy-, acetylated and benzoylated hydroperoxides of, use in initiation of chain reaction of carbon tetrachloride with isopropyl alcohol, kinetics of accumulation of HCl in the reaction, 2209.
Cyclohexen compounds. The structure of 2-methyl-4-(2',6',6'-trimethylcyclohexen-1'-yl)-buten-2-al-1, 3457.
Cyclohexene-4-dicarboxylic acids, see acids.
Cyclohexenes, methyl, conversion to dinitrotoluenes under the action of a nitrating mixture, 1811.
Cyclooctatetraene, oxidation to terephthalic acid, 647.
Cyclopropane, hydrocarbons, see hydrocarbons;
– methyl, 1,1-dimethyl-, action of mercuric acetate, ring cleavage, 3339.
Decadiene-3,7,-2,2,3,5,6,8,9,9-octamethyl, see hydrocarbons, unsaturated.
Dehalogenation, of dichloroacridines with the aid of skeletal nickel, 639.
Dehydration, of γ-glycols. (2,5-dimethyl-hexanediol-2,5; 4-methylhexanediol-1,4 and 4-methyl-octanediol-1,4, 447;
– of substances, using vacuum and deep freezing, 791.
Delphelatine, (aconite alkaloids), identity with eldeline, 2299.
Delphinium alkaloids, see alkaloids.
Delphonine, isolation, properties, structure, reactions, 2011.
Diamidines, alkylated, of the stilbene type, preparation, properties, 3851.
Diamines, of the diphenyl series, synthesis of quinoline bases from, 527;
– reaction with 2,4-dinitrophenylpyridinium chloride, to form pyridine dyestuffs, 249.
Diarylbromonium and diarylchloronium salts, see salts.
Diazoaminobenzene, see benzene.

Diazo compounds. Halogenoarylation of unsaturated compounds with aromatic diazo compounds. Acrylonitrile in halogenoarylation, 3585;
– Reaction of phenyldiazonium chloride and bromide with butadiene-1,3 and some reactions of 4-chloro-1-phenylbutene-2, 3091;
– aromatic, action on unsaturated compounds. Azo-coupling with simple vinyl ethers, 211.
Dibiphenylalkanes, see alkanes.
Dichloramide, benzenesulfo, action on alcoholic solutions of piperylene, 1785.
Dichlorides, vinylallyl type, conversion to silane chlorides, 1419.
Diene synthesis, preparation of hydroaromatic compounds on the basis of. Action of organomagnesium compounds on esters of cyclohexene-4-dicarboxylic acids, 1795;
– Reaction of substituted acrylonitriles, 831;
– with fluoroprene, condensations with α,β-unsaturated aldehydes and ketones, 3055.
Diketene, reaction with urea to form 4-methyluracil, 1939.
1,3-Diketones, cyclic, condensation with halogen derivatives of the allyl type and inner-molecular cyclization (with loss of water) of the resultant compounds, 939;
– 2-methyl, cyclic, condensation with cyclic allyl halo-derivatives and intramolecular cyclization of the resultant compounds to ketones containing the hydrogenated skeleton of phenanthrene, chrysene and cyclopentanophenanthrene with an angular methyl group, 1667.
Dimedone, nitro, halogen derivatives of, preparation, properties, reactions, 3499.
Dimerization, of fluoroprene, at 120° and by condensation with divinyl, 3687.
Dimethylglyoxime, complex compounds, with cobalt formed in presence of Na_2SnO_3, composition of, 1771.
Dimethyl sulfate, hydrolysis in acid and alkaline medium, study by means of the heavy oxygen isotope, 3323.
Diols, silane, see silicon organic compounds.
Dioxane, system with pyrosulfuric acid, physicochemical analysis of, chemical interaction, 1545;
– system with sulfuric acid, physico-chemical analysis of, 397;
– system with water – acetic anhydride, physico-chemical investigation of, 2685;
– systems with acetic acid, acetic anhydride, viscosity, density, surface tension, refractive index, chemical reaction in, 427;
– sulfotrioxide, application to the determination of mono- and polyhydroxy compounds, 475.
1,3-Dioxane, 4-phenyl, reaction with $SOCl_2$, PCl_3 and fatty acids, 1643.
Dioxane solutions, aqueous, of sulfuric acid, electrical conductivity of, and variation with temperature, 2399.
Dioxanes, alkyl, hydrolysis of diols, quantitative method of determination based on hydrolysis in the presence of hydroxylamine salts, 3061.
Dipentene, irreversible catalytic conversion of, over skeletal nickel in the liquid phase, to a mixture of p-cymene and p-menthane, 1565.
Diphenyl, alkylation with alcohols in presence of BF_3, 215;
– amine, see also amines;
– amine, reaction with triphenylfluorosilane and triphenylchloromethane, in presence of lithium, 2765;
– systems with quinoline, quinoline – sulfur, metastable equilibria between liquid phases, 2043;
– 4-amino- and 4-amino-4'-nitro, 2,2'-halogen derivatives, inhibited internal rotation and kinetics of acylation of, 3777;
– diamines, see diamines;
– dichlorosilane, see silicon organic compounds;
– 1,4-dilithiumdihydroxy, reaction with alkyl halides, 1405;
– halogen-containing amino- and nitro- derivatives of, preparation, 2817;
– hexane, see hexane derivatives;
– sulfone, see sulfones;
– sulfone sulfonic acids, see sulfones.
Dipole moments, of complex compounds of indium and thallium trihalides, 25;
– of complex compounds of titanium and tin tetrachlorides, 343.
Dissociation, constants, electrolytic, of some saccharodicarboxylic acids and their monolactones, 3575;
– electrolytic, in nonaqueous systems. Aniline-allyl mustard oil system, 1191.
Disulfamides, of thiazole, see thiazole compounds.
Divinyl, mechanism of formation from acetylene, by catalytic hydropolymerization over palladium catalyst, 1233;
– oxidation to the α-oxide with acetyl peroxide, 3087;
– thermopolymers, see high polymer chemistry.
Dyestuffs chemistry. Action of sulfur chloride on β-aminoanthraquinone, 109;
– Azomethine dyes from 3-alkyl-1-(carboxy and dicarboxybenzthiazolyl-2')-pyrazolones-5, analysis, absorption spectra, 3383;
– Azomethine dyes from oxindole derivatives, 1327;
– Azomethine dyes from oxindole derivatives, 2251;

– Bisulfite compounds of 4-nitroso-1-naphthol and 1-naphthol, 3745;
– Chemistry of heterocycles. Synthesis of 9-phenylacridine based on 2-aminophenylcarbinol and the mechanism of this transformation, 163;
– Inner complex salts of azo compounds. Reaction of copper salts with some o-hydroxy- and o-amino, o'-alkoxy- and -o'-aroxy-monoazo compounds, 405;
– Interaction products of β-picoline and 2,4-dinitrochlorobenzene, 3845;
– Investigation in the field of tautomeric compounds. The lability of hydrogen atoms of the quinaldine methyl group, 2175;
– Naphthofuroxan. Derivatives of 1,2-naphthoquinone-6-sulfonic acid dioxime, 259;
– 1,2-Naphtho-(3',4')-furoxan series. The bisulfite compound of 6-nitro-1,2-naphtho-(3',4')-furoxan and its derivatives, 2311;
– Oxidative-hydrolysis of nitrosubstituted hydroxyazo dyes, 2161;
– Quantitative aspects of the auxochrome effect of elements (cations), 2661;
– Reaction products of 2,4-dinitrophenylpyridinium chloride with diamines, 249;
– Spectra and halochromism. The reaction of p-fuchsin, aniline blue and their carbinols with acids, 3425;
– Structure and color of p-phenylazosubstituted anils of glutaconic dialdehyde, 105;
– Studies in the field of azomethine dyes. Indamine dyes derived from the anilide of 1-hydroxy-2-naphthoic acid, preparation, properties, absorption spectra, 2839;
– Studies in the field of azomethine dyes. On the color of certain indamine dyes derived from α-naphthol containing substituents in the naphthalene nucleus, 2831;
– Sulfonation and chlorination of naphthofuroxan, 281;
– Synthesis of N-carbazolepropene oxide, 905;
– Synthesis of quinoline bases from diamines of the diphenyl series, 527;
– The analysis of the influence of structure on spectra. A comparative study of color in azomethines of type $O_2NC_6H_4CH = NC_6H_4A$ and $AC_6H_4CH = NC_6H_4NO_2$. Reflection and absorption , 3389;
– The effect of acids and alkalis on absorption spectra of pyridine dyes, 3447;
– The preparation of azo compounds from chromotropic acid and other 1,8-dihydroxynaphthalene sulfonic acids, 3657;
– Transformation and synthesis of carbohydrates. Steric hindrance in the azo-coupling of arylglucamines, 855.

Elaeagnus Angustifolia L., alkaloids from, see alkaloids.
Eldeline, identity with delphelatine, preparation, properties, derivatives, of demethyleneeldelidine, 2299.
Electrochemistry. Change of the ionic conductance of liquid chemical compounds and systems with temperature, 1149;
– Dipole moments of some complex compounds of titanium and tin tetrachlorides, 343;
– Electrosynthesis of o- and p-methoxyphenylhydrazines, 2585;
– Hydrolysis of salts. Halides of zinc, cadmium and mercury, 337;
– Hydrolysis of salts. Perchlorates of elements of the second group of the periodic system, 331;
– Periodic relationship of electrode potentials of metals in fused salts, 3303;
– The influence of alkali metal cations in complex compounds of aluminum bromide on the molecular composition of these complexes in solvents of low dielectric constant, 2985;
– The influence of specific adsorption on the half-wave potential during reduction of complex compounds, 1763;
– The problem of the anodic precipitates obtained during the electrolysis of silver salts, 1721;
– The question of the composition of the copper pyrophosphate bath, 2963.
Electrolyte solutions, aqueous, thermochemical study of, ammonium chloride, 1465.
Electronic theory, experimental proof of the Baker-Nathan effect, 2107.
Emulsions, hydrocarbon, decomposition rate of potassium persulfate in, 1481.
Endoethylenenaphthofurans, see furan compounds.
Energy, lattice, of salts with polyatomic ions, calculation of heats of formation of corresponding gaseous anions, ammonium salts series, alkali and alkaline earth salts, 2655;
– of acids of elements of subsidiary subgroups, 2341;
– of salts formed by ions with outer envelopes of eight electrons, 1069.
Enol acetates, see acetates.
Enthalpy of formation, of arsine, 2023;
– of compounds of zinc with antimony, 321.
Equilibria, metastable, between liquid phases, study of the binary system salicylic acid – benzine, and equilibrium of solid and liquid phases in the ternary system water-benzine-salicylic acid, 3609;
– between liquid phases, (systems diphenylamine – quinoline, diphenylamine-quinoline-sulfur), 2043.

Ester, acetoacetic, reaction with 5,8-endoethylene-1,4-naphthoquinone, 837;
– reaction with phosphorous esters (triethyl, triisobutyl phosphites) to form mixed unsaturated phosphoric esters, properties of products, 2503;
– ethyl, of chloroindanedionecarboxylic acid, see acid, chloroindanedionecarboxylic;
– of β-methyl-β-propylglycidic acid, see acid, β-methyl-β-propylglycidic;
– isonicotinoylacetic, and derivatives, preparation, properties, reaction, 1291;
– malonic, condensation with o-aldehydobenzoic acid and its methyl ester, 143;
– methyl, of acetylenedicarboxylic acid, see acid, acetylenedicarboxylic;
– of o-aldehydobenzoic acid, see acid, o-aldehydobenzoic;
– of α, β-dibromo- and α, β-dichloropropionic acid, reaction with tributyl and triethyl phosphites, 2245;
– of p-dimethylaminobenzenesulfonic acid, see acid;
– of 2-keto-L-gulonic acid, see acid, 2-keto-L-gulonic;
– of propiolic acid, see propiolic acid;
– methylenemalonic, reaction with the bicyclic dienes, 1,1'-dicyclopentenyl and 1,1'-dicyclohexenyl to form esters, and subsequently spirobarbituric acids, 3173;
– systems (n-propyl acetate-n-butyl acetate, isoamyl acetate – n-butyl acetate), viscosity, density and molcular bond energies of, 1453.
Esters (acetate) of 17 α-methylandrostanediol-3β, 17, dehydration with pinacoline rearrangement, 3267;
– acetoacetic, benzoylacetic, condensation with chloro- and 2,3-dichloro-p-benzoquinone, 603;
– acid alkylthiophosphinic, alkali salts of, alkylation to S-alkylated derivatives, acylation to produce O-derivatives, 2491;
– aliphatic, of phosphorous acid, reaction with α, β-dibromoethyl and α, β-dichloroethyl isopropyl and α, β-dichloroethyl butyl ethers, (Arbuzov rearrangement), 171;
– alkamine, of α, β-diphenylpropionic acid, derivatives of β-(4-methoxyphenyl)-α-phenylpropionic acid, preparation, pharmacological properties, 3867;
– alkamino, of heterocylic acids, see acids, heterocylic;
– alkyl, of arsenious acid, reaction with acetyl chloride and acetic anhydride, 435;
– of propane-1-thiosulfonic- and butane-1-thiosulfonic acid, synthesis and antibacterial properties, 3739;
– alkylidene and arylidene glycol, of acrylic and methacrylic acids, preparation, properties, polymerization, 1275;
– alkylmalonic, reaction with β-chlorovinyl ketones, to formation of alkyl-(γ-ketoalkenyl)-malonic esters, 971;
– allyl, of trimethylacetic and formic acids, reaction with mesitylmagnesium bromide, 569;
– aromatic sulfonic acid, hydrolysis of. Hydrolysis of phenyl esters of substituted benzenesulfonic acids, 2537;
– hydrolysis of. Influence of substituents in the benzene ring on the hydrolysis rate of ethyl sulfonates and of aromatic sulfonyl chlorides, 2529;
– (n-butyl chloroacetate, n-butyl trichloroacetate, ethyl trichloroacetate, isobutyl trichloroacetate, isoamyl trichloroacetate), systems with titanium tetrachloride, physicochemical study of, compound formation in, 3643;
– chlorophenyl, of methacrylic acid, preparation, properties, polymerization, 1279;
– complex, of lignoceric alcohol, and lignoceric acid, synthesis of, 3079;
– with organic acids, oxonium compounds of. The $CH_3COOC_4H_9$-CCl_3COOH, $CH_3COOC_8H_{11}$-CCl_3COOH and $CCl_3COOC_2H_5$-CCl_3COOH systems, 3033;
– cyclic, of ethylarsinous acid, synthesis, properties, hydrolysis, reactions with acetyl chloride, acetic anhydride, methyl iodide, 2759;
– di-tert-(β',β',β'-trichloro)-butyl, of substituted α-hydroxymethylphosphinic acid, preparation, properties, 929;
– glycol, of methacrylic acid, preparation, system with methyl methacrylate – acrylonitrile, copolymerization of, 2517;
– halophenyl, of sulfonic acids, new method for the preparation of, properties, use as insectofungicides, 2875;
– incomplete, of acids of phosphorus, addition to ethyl isocyanate, vinyl acetate and esters of unsaturated carboxylic acids, 3463;
– ethyl malonic, acetoacetic, condensation with 2-acyl-3-chlorobicyclo-(2,2,1) heptanes, 3819;
– (methyl, ethyl, n-propyl, n-butyl, n-octyl) of n-butanearsenous acid, preparation, 775;
– mixed, of arylsulfonimidophosphoric acids, see acids, arylsulfonimidophosphoric;
– of dithiophosphoric acid containing an amide group in the aliphatic ester radical, preparation, properties, insecticidal action, 523;
– of dithiophosphoric acid, synthesis, properties, use as insecticides, 2861;
– of thiophosphoric acid, preparation, properties, use as insectofungicides, 2877;
– of thiophosphoric acid, containing heterocyclic radicals, preparation, properties, insecticidal activity, 925;
– of 1-alkyl-2,5-dimethyl-4-phenyl-4-piperidinols, preparation, analgesic activity, homologs of promedol and isopromedol, 3533;

– of alkylphosphinous acids, atomic refraction of phosphorus in, 1615;
– of alkylphosphinous acids, preparation, addition reactions (sulfur, selenium, cuprous iodide), isomerization, 2753;
– of arylcarbamidophosphoric acids, preparation, properties, 2555;
– of arylphosphoric acids, see acids;
– of chloro- and dichloro-thiophosphoric acids, new method for the preparation of, 519;
– of cyclohexene-4-dicarboxylic acids, preparation, properties, action of organomagnesium compounds to form hydroaromatic glycols, diketones and unsaturated ketones, 1795;
– of dialkylaminoacetic acids, preparation, properties, local anaesthetic action, 1655;
– of dibutylarsinic acid, preparation, properties, molecular refraction, calculation of atomic refraction of the arsenic, 3803;
– of 3,7-dimethylocten-6-ol-3-ic-(1) acid (β-hydroxy-α,β-dihydrogeranic) and 5,9-dimethyldecadien-2,8-ol-5-ic-(1) acid, direction and stereochemical specificity of dehydration of, 3111;
– of 2-furyltrichloromethylcarbinol, see furan derivatives;
– of glycidic acids, reaction with ammonia, reactivity of oxide ring, 1585;
– of heterocyclic aminoalcohols, see alcohols, amino;
– of malonic acid, reaction with vinyl butyl ether, formation of the ethyl ester of vinylmalonic acid, mechanism of the reaction, 3731;
– of meso-α,α'-diphenylsuccinic acid, nitrogen-containing derivatives of, preparation, properties, curarising action, 977;
– of monobasic acids (n-butyl formate, isoamyl formate), systems with titanium tetrachloride, viscosity, density, and conductance compound formation in, 3297;
– p-nitro and p-bromobenzoylacetic, reaction with p-benzoquinone to form benzofuran and benzodifuran derivatives, 3261;
– of octadecenoic acids, see acids, octadecenoic;
– of phosphinic and thiophosphinic acids, new method of preparation of, addition of incomplete esters of acids of phosphorus to ethyl isocyanate, vinyl acetate and esters of unsaturated carboxylic acids, 3463;
– of phosphinic and thiophosphinic acids, new method of synthesis, properties. Addition of mixed dialkylphosphorous and dialkylthiophosphorous acids and of diallylphosphorous acid to unsaturated compounds, 1877;
– of phosphoric acid, chlorothio, dialkyl, reaction with p-nitrophenols in the presence of pyridine hydrochloride, use of products as insectofungicides, 2867;
– of phosphoric acid, chlorothio, dialkyl, preparation, properties, use as insectofungicides, 2871;
– of phosphoric acid, O,O-dialkylthio, acyl derivatives of, preparation, properties, 1801;
– of N-phosphoric acid, trichloroiminoacetic acid and esters of trihydroxyphosphazotrichloroacetyl, preparation, properties, 2935;
– of phosphorus acid, acid and neutral, reaction with alkyl hypochlorites, to form neutral esters of phosphoric acid, 3759;
– of phosphorous, acid, reactions with sulfenyl chlorides, to form S-alkyl-O-alkyl phosphates and S-alkyl-O-alkyl halogenophosphates, O-aryl thiophosphates, arylphosphonium dichlorides and disulfides, 3765;
– of phosphorous and phenylphosphinous acids, reaction with chloro- and bromoacetone, 1605;
– of tertiary and secondary 4-piperidols, synthesis, anesthetic properties, 3153;
– of tiglic and angelic acids, see acids;
– of 1,2,5-trimethyl-4-carbalkoxy-4-piperidols, new synthetic analogs of α-cocaine and α-eucaine, preparation, anesthetic properties, 3891;
– of 1,2,5-trimethyl-4-aryl-4-piperidol, synthesis, use as anesthetic, 3139;
– of 1,2,5-trimethyl-4-phenyl-4-piperidol with aliphatic acids, synthesis of the anesthetics promedol and isopromedol, 3117;
– of 1,2,5-trimethyl-4-phenyl-4-piperidol, with aromatic acids, synthesis, use as anesthetics, 3131;
– of unsaturated carboxylic acids, addition of incomplete esters of acids of phosphorus to, 3463;
– of α,β-unsaturated dibasic acids (dimethyl and diethyl esters of maleic, fumaric and acetylenedicarboxylic acids), condensation with fluoroprene, 3335;
– of urethanphosphoric acids, see acids;
– partial aromatic, of arylsulfonimidophosphoric acids, acid chlorides of, preparation, 267;
– phosphorous, (triethyl, triisobutyl, phosphites), reaction with mono- and dichloroacetylacetone, phosphonoacetone, and acetoacetic ester, to form mixed unsaturated phosphoric esters, properties of products, 2503;
– poly, of tetramethylene glycol and 1,3-butanediol, preparation, properties, 575;
– of thiodivaleric acid, preparation, properties, 841;
– of trimethylene and pentamethylene glycols, preparation, properties, 581;
– phthalidylmalonic, o-carboxybenzylidenemalonic, formation by condensation of o-aldehydobenzoic acid and its methyl ester with malonic ester, 143;

– thio (phenyl, benzyl), of methacrylic acid, preparation, properties, polymerization, 499;
– triethyl, of phosphorous acid, reaction with α, α- and α, γ-dihalo ketones, 1611;
– triethyl, tributyl, of phosphorous acid, reaction with the nitrile and methyl ester of α, β-dibromo- and α, β-dichloropropionic acid, 2245;
– vinyl, formation by reacting 1-octyne with lower saturated monobasic acids, 1271.
Ethane, dibromo, binary system with benzene, study by the viscosity-density method, 765;
– hexachloro, reaction with isopropyl alcohol initiated by benzoyl peroxide, mechanism of, 2485;
– systems with anthracene, benzene, naphthalene, p-dichlorobenzene, ethyl trichloroacetate, study by the thermal analysis method, 3615;
– 4-vinylphenyl, preparation, polymerization, copolymerization, 845.
Ethanol, α-(m-hydroxyphenyl)-β-methylamino, methods for the preparation of, 2597.
Ethanolamine, reaction with diatomic phenols (pyrocatechol, resorcinol, hydroquinone), properties of binary systems with, 1211.
Ethanolamines, N-cycloalkyl, synthesis by the action of formic acid and ethanolamine on the corresponding cyclanones, properties, picrates, 2777.
Ethanols, amino, see alcohols, amino;
– α-(p-aminophenyl)-β-alkylamino, see alcohols, amino.
Ether, vinyl butyl, reaction with esters of malonic acid, formation of the ethyl ester of vinylmalonic acid, mechanism of the reaction, 3731.
Ethers, cellulose vinyl, synthesis and transformations of, 849;
– complex, oxonium compounds of. The systems $HCOOC_2H_5$-CH_3COOH and $CCl_3COOC_2H_5$-CH_3COOH, 2099;
– β-cyanoethyl, of acetylenic alcohols, Mannich reaction with, 933;
– dialkylaminomethyl alkyl, and compounds of similar structure, reactivity of, from interaction with phenylmagnesium bromide, 957;
– α, β-dibromoethyl, α, β-dichloroethyl isopropyl, α, β-dibromoethyl, α, β-di-chloroethyl butyl, reaction with phosphites, (Arbuzov rearrangement), 171;
– diethers, containing silicon, synthesis by condensing trialkanesilane chlorides with primary alkoxychloroalkanes, 1401;
– glycol, synthesis of the β-alkoxy derivatives of methylene glycol ethers, by the "organomagnesium" method, properties of the products, 3367;
– α-halo-, addition to isoprene, 1833;
– α-methylvinyl propyl and butyl, ionic polymerization with $FeCl_3$ and BF_3 catalysts, 1883;
– phenolic (anisole), changes during catalytic hydrogenation, 2855;
– vinyl, azo coupling with p-nitrobenzenediazonium hydroxide, to form p-nitrophenylhydrazone of glyoxal, 211.
Ethyl acetoacetate, reaction with p-benzoquinone, to form benzofuran derivatives, 3255.
Ethyl alcohol, containing heavy oxygen isotope, synthesis from acetaldehyde and heavy water, 3319;
– isocyanate, addition of incomplete esters of phosphorus acids to, 3463;
Ethylene compounds. Investigation of the action of bromine on 1-phenyl-1-α- (or β-) naphthyl-2-methylethylenes, 459;
– Synthesis and investigation of 1,1-di-α-naphthyl-2-phenyl-2-bromoethylene, 455.
Ethylene glycol, unsymmetrical dimethylphenylphenylacetylenyl-, reaction with mercuric acetate to form an organomercury compound, 2119;
– unsymm. methyl-diphenylphenylethynyl-, trimethylphenylethylphenylethynyl-, action of mercury salts, 2747.
Ethylene series, α-glycols of, see α-glycols.
Ethylenes, tert. alkyl, synthesis using isoprene hydrobromide, 421.
Ethylenic triols, see acetylene compounds.
Ethyl formate, system with acetic acid, viscosity and density at 25°, 40° and 60°, 2099.
Ethylmalonic ester, see esters.
Ethyl propionate, containing heavy oxygen, synthesis, mechanism of hydrolysis in an alkaline medium, 1183.
Ethyl trichloroacetate, system with CH_3COOH, viscosity, density, vapor pressure, 2099;
– system with hexachloro ethane, study by the thermal analysismethod, 3615;
– system with CCl_3COOH, densities and viscosities at 50, 60 and 70°, 3033.
Evipan, see barbituric acid derivatives.
Ferric nitrate, systems with $Hg(NO_3)_2$ – KCNS – KCl, $Hg(NO_3)_2$ – KCNS – KBr, study of equilibrium in, by the optical method, 377.
Ferrous sulfide, reaction with Al_2O_3 in presence of carbon, 29;
– reaction with SiO_2 in presence of carbon, 325.
Five year plan, sixth, chemical industry and science in, L
Fluorescein, dihexyl, preparation, from hexylresorcinol and phthalic anhydride, properties, 895.
Fluorides and silicates, of lithium and barium, reciprocal system of, study by the visual polythermal method, 735;

– and sulfates of lead and potassium, complex formation and double decomposition in the reciprocal system of, 359.
Fluorine organic compounds. Phenyltrifluoromethyl sulfide, preparation, properties, nitration, 99.
Fluoroprene, condensation with derivatives of α,β-unsaturated monobasic acids (methyl acrylate, methyl methacrylate, butyl methacrylate, acrylonitrile), 3329;
– condensation with esters of α,β-unsaturated dibasic (dimethyl and diethyl esters, of maleic, fumaric and acetylenedicarboxylic acids), 3335;
– condensation with α,β- unsaturated aldehydes and ketones, 3055;
– dimerization at 120° and by condensation with divinyl, 3687.
Formaldehyde acetals, see acetals.
Formic acid, system with urea-water, thermal analysis of, 1497;
– and derivatives, as reducing agents, synthesis of N-cycloalkylethanolamines, 2777;
– and derivatives, reduction with. Reduction of quinolinium salts, 1929.
Free radicals, see radicals.
Fritillaria alkaloids, see alkaloids.
Fritillaria Raddeana Rgl. alkaloids, see alkaloids.
p-Fuchsin, and carbinol, mechanism of reaction with acids, 3425.
Fungicides, insecto, organic. New method for the preparation of esters of chloro- and dichlorothiophosphoric acids, 519;
– New method for the preparation of halophenyl esters of sulfonic acids, 2875;
– Preparation of dialkyl chlorothiophosphates, 2871;
– Reaction of dialkyl chlorothiophosphates with p-nitrophenols in the presence of pyridine hydrochloride, 2867;
– Synthesis of mixed esters of dithiophosphoric acid, 2861;
– Synthesis of mixed esters of dithiophosphoric acids containing an amide group in the aliphatic ester radical, 523;
– Synthesis of mixed esters of thiophosphoric acid, 2877;
– The synthesis of mixed esters of thiophosphoric acid containing heterocyclic radicals, 925.
Furan, α-ethyl, α-propenyl, hydrogenation to the corresponding tetrahydro derivatives and hydrogenolysis over Raney nickel catalyst with splitting of the furan ring, 3025.
Furan compounds. Basic properties of substituted 2-hydroxydihydrofurans-2,5, 1007;
– 3,4-Diketones of the furanidine series of the bispyran type in the synthesis of condensed heterocyclic systems, 2293;
– 2-furyltrichloromethylcarbinol and its complex esters, synthesis, properties, 3029;
– Isomerization of unsymm. methyl-di-p-tolyl-butindiol (1,1-di-p-tolylpentin-2-diol-1,4), 2423;
– Mechanism of the catalytic dehydration of 2,2,5,5-tetramethylfuranidine, 293;
– Naphthofuroxan. Derivatives of 1,2-naphthoquinone-6-sulfonic acid dioxime, preparation, properties, 259;
– 1,2-Naphtho-(3',4')-furoxan series. The bisulfite compound of 6-nitro-1,2-naphtho-(3',4')-furoxan and its derivatives, 2311;
– Preparation and properties of 1-(2-furyl)-3-methyl-1-buten-3-ol, 877;
– Preparation of endoethylenenaphthofurans, by condensing 5,8-endoethylenenaphthoquinone with benzoylacetic ester and with acetylacetone, 3259;
– Preparation of 3-isoamyl-, 3-hexyl-, 3-p-tolyl-tetrahydrothiophenes from the corresponding furanidines, 593;
– Properties of 5,5-dimethyl-2-tert-butyl-4-2-hydroxy-2,5-dihydrofuran, 1317;
– Reaction of p-benzoquinone with ethyl acetoacetate to form benzofuran derivatives, 3255;
– Reaction of 5,8-endoethylene-1,4-naphthoquinone with hydrogen chloride and acetoacetic ester, 837;
– Sequence of hydrogenation cyclization and hydrogenolysis reactions of furan derivatives on nickel catalysts, 1301;
– Sulfonation and chlorination of naphthofuroxan, 281;
– The reaction of p-benzoquinone with p-nitro- and p-bromobenzoylacetic esters, to form benzofuran and benzodifuran derivatives, 3261;
Furanidine, 2,2,5,5-tetramethyl, see furan compounds.
Furans, endoethylenenaphtho, see furan compounds.
Furylpyruvic acid, see acids.
Galanthus Woronovi alkaloids, see alkaloids.
Gentianine, structure of, 1065;
Geraniol, synthesis by condensation of methylheptenone with methyl bromoacetate and subsequent reactions, oxidation to geranial, 53.
Germanium heteropolyacids, redox properties of, 2969.
Glucamines, 3,4,5-trimethylphenyl. Steric hindrance in azo coupling of, 855.
Glucose, system with potassium chloride – water, at 25°, solubilities in, 2383.
Glutaconic dialdehyde, p-phenylazo-substituted anils of, see anils.
Glutaric acid, β-(pyridyl-4), β-(piperidyl-2)-, and derivatives, preparation, properties, transformations, 469.

Glycerins, tertiary ethylenic, see acetylene compounds.
Glycerol, side chain, methods of introducing into cyclic compounds, 1343.
Glycine, complexes with stannic chloride and bromide, formation, structure of, 3667;
– reaction with phosphomolybdic acid, in aqueous and aqueous alcohol media, 2847.
Glycines, arylsulfonyl, and N-derivatives, mechanism of cleavage when heated in an alkaline medium, 159.
Glycol, tetramethylene, polyesters, see esters;
– unsymm. dimethyl-phenyl-phenylethinylethylene, reaction with mercuric chloride and bromide to form organomercury compounds, 1803.
Glycols, trimethylene, pentamethylene, polyesters, see esters.
α-Glycols, of the ethylene series, synthesis and transformation of 2-methyl-3,5-diphenyl-4-pentene-2,3-diol, 243.
γ-Glycols, mechanism of dehydration of. Dehydration of 2,5-dimethylhexanediol-2,5; 4-methylhexanediol-1,4 and 4-methyloctanediol-1,4, 447;
– acetylenic, reactions of. Isomerization of unsymm. methyl-di-p-tolyl-butindiol (1,1-di-p-tolyl-pentin-2-diol-1,4), 2423;
– heterocyclic acetylenic, synthesis and transformations of, 79;
– unsymmetrical heterocyclic, acetylene, hydration to corresponding heterocyclic tetrahydrofuranones with a spiran structure, 195.
Guanidine nitrate, mechanism of formation by ammoniolysis of cyanoguanidine, 2171.
Gramicidin S, structure, copper complexes, reactions, 1991;
– structure, hydrolysis products, 1691;
– structure. Two forms of gramicidin, their mutual transformations and structure, 2261.
Halides, alkyl, action on acetone azine, influence of various factors on ratio of products, 2201;
– cleavage of diphenylchloroantimony and phenyldiiodoantimony with, 117;
– cleavage of tri-p-tolylantimony and tri- α-naphthylantimony by, in presence of aluminum chloride, to form corresponding fatty-aromatic hydrocarbons, 1581;
– reaction with 1,4-dilithiumdihydrodiphenyl, 1405;
– reaction with isobutyraldehyde, isovaleraldehyde, to the corresponding 4,5-dialkylpyrazolines and their N-alkyl derivatives, 2905;
– primary, secondary, tertiary, addition to diene hydrocarbons (divinyl, isoprene, diisopropenyl), 1263;
– zinc, cadmium, mercury, acidity, hydrolysis, 337.
Halochromism, of aromatic carbinols, 3005;
– of tertiary alicyclic and aliphatic alcohols, 3013.
Halogenation, of aromatic silanes. Preparation and properties of some chloro- and bromo-derivatives of benzyltrichlorosilane, 2927;
– of unsaturated compounds with aromatic diazo compounds. Reaction of phenyldiazonium chloride and bromide with butadiene-1,3 and some reactions of 4-chloro-1-phenylbutene-2, 3091.
Halogen derivatives (1,2-dichloroethane), use in alkylation of benzene in presence of metallic aluminum, 1549.
Halogenoarylation, of acrylonitrile with diazonium salts in presence of cupric halides, to form α-halogeno-β-arylpropionitriles, aryl halides, and phenols, 3585.
Halogens, conjugated addition reactions with olefins, nitrogen β-haloalkylation, 187.
Harmol, tetrahydro, and N-methyltetrahydro, isolation from the bark of Elaeagnus Augustifolia L., properties, 3593.
Heptane, bicyclo (2,2,1), derivatives of. Condensation of 2-acyl-3-chlorobicyclo (2,2,1) heptanes with malonic ester and related compounds, 3819.
Heptyne-4-, 2,6,6-trimethyl-3,3-diisopropyl, see hydrocarbons, acetylenic.
Heterocyclic chemistry. New methods for preparing 9-phenylacridine, 3555.
Heterocyclic compounds, catalytic transformations of. Preparation of 3-isoamyl-, 3-hexyl- and 3-p-tolyltetrahydrothiophenes from the corresponding furanidines, 593;
– chemistry of. Synthesis of 9-phenylacridine based on 2-aminotriphenylcarbinol and the mechanism of this transformation, 163;
– Synthesis of 9-phenylacridine from acyl derivatives of 2-aminotriphenylcarbinol, 2283;
– Condensation of tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones with organomagnesium and lithium compounds, 501;
– 3,4-diketones of the furanidine series of the bispyran type in the synthesis of condensed heterocyclic systems (quinoxalines, dihydropyrazines, imidazoles), triazine compounds, 2293;
– Hydrolysis and alcoholysis of cyanohydrins of γ-piperidones, tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones. Synthesis of 1-alkyl-2,5-dimethyl-4-carbalkoxy-4-piperidols, 3877;
– Synthesis of heterocyclic aminoalcohols and their esters, 951;
– The Mannich reaction with heterocyclic ketones (γ-piperidones, tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones), 507.
Hexachloroethane, see ethane.

Hexadiene, dichloro, chlorination of, and dehydrochlorination of the reaction products, 1817.
Hexane, p,p'-diamino-meso-3,4-diphenyl, derivatives of, synthesis, anti-tumor effect on mice, 3099.
Hexane derivatives. Synthesis and investigation of nitro- and sulfo-derivatives of 3,4-dimethyl-3,4-diphenylhexane, 1635.
Hexanes, (0,1,3)-bicyclo, formation from hydrocarbons of the cyclohexadiene series, properties, Raman spectra, 1045;
– (0,2,2)-bicyclo, steric structure of, 2459.
High polymer chemistry. Application of the Hoffman reaction to high-molecular compounds containing amide groups, 2561;
– Attempted synthesis of 7-aminoheptanoic acid by the partial hydrolysis of pimelodinitrile with hydrogen peroxide, 3103;
– Copolymerization of the system methyl methacrylate – acrylonitrile – glycol esters of methacrylic acid, 2517;
– Copolymerization of the three-component system methyl methacrylate – acrylonitrile – tetraallyl orthosilicate, 2513;
– Decomposition rate of potassium persulfate in hydrocarbon emulsions, 1481;
– Dependence of the properties of mixed polyamides on the number of hydrogen bonds, 1371;
– Formation of polyamide resins. Participation of polymerization and polycondensation reaction in transformation of ε-caprolactam into polymers, 563;
– Free radical reactions in solutions. Role of activators in the decomposition processes in triazenes and in initiation of polymerization, 3789;
– Hydrogenation of solutions of butadiene rubber at atmospheric pressure and room temperature. Influence of the nature of the solvent on the process of catalytic hydrogenation of unsaturated compounds over palladium-on-calcium carbonate catalyst, 1823;
– Hydrogenation of solutions of butadiene rubber at atmospheric pressure and room temperature. Preparation of rubbers of different degrees of hydrogenation, study of their properties, 1557;
– Investigation of copolymerization of three-component systems (methyl methacrylate–acrylonitrile–triallyl borate), 2509;
– Investigation of the process of polymerization of styrene under the influence of diazoamino compounds and activators, 3205;
– Investigation of the chemical structure of divinyl thermopolymers, (soluble and insoluble) by ozonolysis, 2705;
– Polarographic study of the kinetics of polymerization processes, 2071;
– Polyesters of trimethylene and pentamethylene glycols, 581;
– Polymerization of α-methylvinyl propyl and butyl ethers, 1883;
– Properties of the polyesters of tetramethylene glycol and 1,3-butanediol, 575;
– Reactions for the formation of polyorganosiloxanes by the heterofunctional condensation method, 1249;
– Reactions of free radicals in solutions. Destruction of polymeric molecules by free radicals, 2461;
– Study of the process for the catalytic hydropolymerization of acetylene to divinyl over palladium catalyst, 1233;
– Synthesis and polymerization of thioesters of methacrylic acid, 499;
– Synthesis and polymerization of 4-vinylphenylethane, 845;
– Synthesis of alkylidene and arylidene glycol esters of acrylic and methacrylic acids, 1275;
– Synthesis of chlorophenyl esters of methacrylic acid, 1279;
– Synthesis of chloro- and bromo-substituted methylstyrenes, 1849;
– Synthesis of ω,ω'-diamino-p-xylene and its derivatives, 585;
– Synthesis of p-divinylbenzene, 635;
– The change of the chemical heterogeneity of cellulose xanthate during the ripening of viscose, 2205;
– The chemical structure of the autopolymer of butadiene, 1827;
– The condensation of styrene with benzene, 1853;
– The hydrolysis of the polyanhydrides of adipic and sebacic acids, 2851;
– The polyesters of thiodivaleric acid, 841;
– The polymerization of some silicoolefins, 1367;
– The role of oxidation-reduction systems in the process of vulcanization with sulfur, 2767;
– The role of oxygen in the initial stage of vinyl chloride polymerization, 1227;
– Utilization of the reaction for the reduction of metal oxide salts with hydrocarbons for initiation of the polymerization process, 3315;
– Vinyl ethers based on cellulose, 849.
Ioffman reaction, see reaction.
Hooker reaction, see reaction.
Hydrazides, aryl, of diarylglycolic acids, preparation, properties, antitubercular activity, 2889;
– of isonicotinic, nicotinic, benzoic and p-aminobenzoic acids, reaction with mustard oils to give thiosemicarbazide compounds, conversion of these to 1,3,4-triazole-5-thiones, tuberculostatic properties, 2879;

– 2,5-Substituted 1,3,4-thiadiazoles, preparation, properties, tuberculostatic properties, 2885.
Hydrazine derivatives. Cyclization of aldazines under the influence of alkyl halides, 2905;
– Cyclization of aldazines under the influence of anhydrous formic acid, to form 1-formyl-4,5-pyrazolines, and hydrolysis of these to 4,5-dialkylpyrazolines, 2593;
– Reaction of phenylhydrazine with chlorophenols, study by the method of physico-chemical analysis, 1757;
– reactions of. Absorption spectra of azines and pyrazolines, 3495;
– (Decomposition of pyrazoline compounds over lithium hydroxide), synthesis of cyclopropane hydrocarbons, properties, 3839;
– Interaction of phenylhydrazine with β-substituted propionitriles, to form 3-amino-1-phenylpyrazoline, 3491;
– The action of alkyl halides on acetone azine, influence of various factors on ratio of products, 2201;
– Synthesis of 3,5,5-trialkylpyrazolines, 1925;
– Synthesis of 1,2,3,4,5,6,7,8-octahydrocarbazole, 607.
Hydrazine hydrate, reaction with 2-nitro-1,3-indandione, to form 1-(nitromethyl)-4-phthalazone, mechanism of, reactions of the product, 1963.
Hydrazines, o- and p-methoxyphenyl, electrosynthesis of, by reduction of the corresponding diazonium salts, 2585;
– of benzothiazole series, see thiazole derivatives.
– acyl, of aldehydes, see aldehydes.
Hydrocarbon emulsions, see emulsions.
Hydrocarbons, formation by cleavage of diphenylchloroantimony and phenyldiiodoantimony with acid chlorides and alkyl halides in presence of aluminum chloride, 117;
– acetylenic, branched, synthesis of. Preparation of 2,6,6-trimethyl-3,3-diisopropylheptyne-4, 3703;
– alkadiene, of unsymmetrical structure, oxidation with acetyl peroxide, 2413;
– aromatic, preparation from hydroaromatic ketones by the action of phosphorus pentoxide, 2103;
– reaction with m-iodobenzoyl chloride to form ketones, 2221;
– (benzene, toluene), phenol, aqueous solutions of, effect of ultrasonics on absorption spectra, oxidation processes arising from, 2727;
– cyclic, unsaturated, and derivatives. Synthesis of 1,2,3-tribromocyclohexane and its reaction with quinoline, 1575;
– The reaction of 1-methyl-3,4-dibromocyclohexane with quinoline, 1813;
– Transformation of methylcyclohexenes and methylcyclohexadienes into dinitrotoluenes under the action of nitrating mixture, 1811;
– cyclopropane, synthesis from decomposition of alkyl pyrazolines over lithium hydroxide, 3839;
– diene (butadiene, piperylene, isoprene, diisopropenyl, cyclopentadiene), condensation with γ-vinylpyridine, reactions of products, 49;
– condensation with acetylenedicarboxylic acid and its methyl ester, 2133;
– condensation with propiolic acid and its methyl ester, to form Δ 1,4-dihydrobenzoic acids and their methyl esters, 1779;
– (divinyl, isoprene, diisopropenyl), addition to alkyl halides, 1263;
– with conjugated double bond systems (2-methylhexadiene-2,4), partial reduction using sodium in liquid ammonia, synthesis of 2-methylhexene-3, and -4, 2453;
– (ethylene, ethane, n-butane, n-octane) redistribution of hydrogen between on aluminosilicate catalyst using carbon isotope C^{14}, 2403;
– methane, capacity for oxidation in the liquid phase, influence of structure, molecular weight, 3327;
– of cyclohexadiene series, conversion to bicyclic hydrocarbons containing a three-membered ring -(0,1,3)-bicyclohexanes, 1045;
– mononitro, of the aromatic series, catalytic amination with compressed ammonia, 917;
– paraffin, thermal stability of, 1777;
– polymethylene, isomerization by aluminum chloride. Isomerization of 1,3,5-n-trimethyl cyclohexane and isopropylcyclohexane, 3043;
– (propylene), oxides of transition metals as catalysts for oxidation of, 1541;
– silicoacetylenic, see silicon organic compounds;
– unsaturated. Synthesis of 2,2,3,5,6,8,9,9-octamethyl decadiene-3,7, 3699;
– cyclic, and their derivatives. Steric structure of bicyclo-(0,2,2)-hexane, 2459;
– trichloro, preparation, action of nucleophilic substances, 1215;
– with a quaternary atom – tert. alkylethylenes, synthesis using isoprene hydrobromide, 421.
Hydrochloric acid, systems with PCl_5-organic solvent (acetonitrile), complex formation in, 1141.
Hydrogen, redistribution between hydrocarbons on aluminosilicate catalyst using carbon isotope C^{14}, 2403.
Hydrogen bond, relationship to the physical properties of nitroanilines, 2567.
Hydrogen transfer, in oxidation – reduction reactions, manner of, Leikart reaction, 2407.
Hydrogenation, catalytic, changes in phenolic ethers during, (anisole), 2855;
– catalytic, of unsaturated compounds over palladium-on-calcium carbonate catalyst, (butadiene rubber), 1823;

– of 4-(β,β-dicarbethoxyvinyl)-pyridine in the presence of Raney nickel catalyst, 3475;
– over Raney nickel, of α-ethyl and α-propenylfuran, to the corresponding tetra hydro derivatives, 3025.
Hydrogen atoms, of methyl groups of nitrotoluenes, mobility of, and formation of tautomeric compounds, 961.
Hydrogen bromide, bromine and alkyl hypobromites, order of addition to allylmethylacetylene (hexene-1-yne-4), 3693.
Hydrogen chloride, reaction with 5,8-endoethylene-1,4-naphthoquinone, 837.
Hydrogen ion concentration, the role of in the formation and extraction of complex compounds, 2061.
Hydrogenolysis, of α-ethyl and α-propenyl furan over Raney nickel catalyst with splitting of the furan ring, 3025.
Hydrolysis, of anthraquinone-1,5-disulfonic acid, mechanism of, 2921;
– of aromatic sulfonic acid esters. Hydrolysis of phenyl esters of substituted benzensulfonic acids, 2537;
– Influence of substituents in the benzene ring on the hydrolysis rate of ethyl sulfonates and of aromatic sulfonyl chlorides, 2529;
– of dimethyl sulfate in acid and alkaline medium, study of mechanism of, by means of the heavy oxygen isotope, 3323;
– of isomeric benzenedisulfonic acids, conditions for, 3185;
– of polyanhydrides of adipic and sebacic acids, 2851;
– of sucrose, reaction mechanism of, deduced from velocity constants, 2577;
– enzymatic, of N-benzoyl-O-peptides of serine and threonine, 3413;
– vapor-phase of halo derivatives of organic compounds. (1,2,4-trichlorobenzene), 1845.
Hydroxides, reciprocal effect of during fractional precipitation from solution with ammonia, 1093.
Hydroxyazo, dyes, nitrosubstituted, see dyestuffs chemistry.
Hydroxy compounds, mono, poly, application of dioxane-sulfotrioxide to the determination of, 475.
Hydroxyl groups, in cellulose, comparative reactivity of. Distribution of methoxy groups in partly methylated cellulose obtained by methylation of cellulose with diazomethane, 3755;
– Distribution of methoxy groups in partly methylated cellulose prepared in a medium of bases, 3749.
Hypobromites, alkyl, bromine, hydrogen bromide, order of addition to allylmethylacetylene (hexen-1-yne-4), 3693.
Hypochlorites, alkyl, reaction with phosphites (neutral and acid), with formation of neutral esters of phosphoric acid, 3759.
Hypotriiodic acid, see acid.
Imidazole derivatives. Action of α-halo ketones on 2-mercaptoimidazoles, 483;
– Oxidation of benzimidazole and its methyl derivatives, 479;
– Preparation of pyrimidinoimidazolone salts and alkylation of pyrimidinoimidazolones, 3805;
– Reaction of sulfuric acid with 2-β-ketoalkyl(aryl) mercaptoimidazoles, to form (2,1-b) thiazoles, 1933;
– The action of acetic anhydride on 2-β-ketoalkyl (aryl)-mercaptoimidazoles, to form acetyl compounds, and ketones produced from them structure of the products, 3243;
– The action of bromoacetaldehyde and its derivatives on some 2-mercaptoimidazoles, formation of thiazolines, new mechanism of closure of the thiazole ring, 3233;
– The action of phosphorus oxychloride and of acetic and phosphoric acids on 2-β-ketoalkyl (aryl)-mercaptoimidazoles, (cyclization), 2785.
Imide, benzophenonephenyl, disodium and dilithium compounds of, transformations under the influence of alkyl halides, 899.
Imidodisulfonates, see sulfonates.
Imido groups, acetylation with ketene, 1375.
Imidosulfamide, see sulfamide.
Imine, acetylaceton, reaction with p-quinone, to form 2-methyl-3-acetyl-5-hydroxybenzofuran and 2-methyl-3-acetyl-5-hydroxyindole, 1629.
Imines, aliphatic, aromatic, relationship between properties and molecular state in liquids, 2571.
Imino groups, acetylation with ketene, 1375.
Indiamine dyes, see dyestuffs chemistry.
1,3-Indandione, see indene compounds.
Indene compounds. Condensation of 1,3-indandione with acenaphthenequinone, 539;
– Cyclization of 2,2-diindandionyl-1-acenaphthenone, with acetic anhydride and sulfuric acid, to acenaphthenone-1-spiro-(2; 4')-2',3' (CO) 6',5' (CO)dibenzoylenepyran, 1959;
– 1,3-indandione and its nitro derivative, addition to a double bond, structure of the compounds obtained, 3483;
– 2-nitro-perinaphth-1,3-indandione and some of its derivatives, preparation, properties, 289;
– 2-phenyl-1,3-indandione, preparation, properties, anticoagulant effect, 871;
– Reaction of hydrazine hydrate with 2-nitro-1,3-indandione to form 1-(nitromethyl)-4-phthalazone, mechanism of, reactions of the product, 1963;
– Reaction of the ethyl ester of chloroindanedione-carboxylic acid with primary amines, 69.
Indicator, fluorescent, (4-ethoxyacridone), preparation, 2869.

Indicators, radioactive, determination of the solubility of sparingly soluble compounds with the aid of, 2359.
Indium tribromide, complex compounds with diethyl ether, preparation, dipole moments, 25.
Indole, cyanoethylation with acrylonitrile, 597.
Indole compounds. Acyloxysilanes from monobasic organic acids in the synthesis of ketones of the indole and pyrrole series, 2627;
– azomethine dyes from oxindole derivatives, preparation of p-diethylaminoanils of (3)-substituted isatins, 2251;
– Azomethine dyes from oxindole derivatives, synthesis, absorption spectra, 1327;
– Synthesis by three methods, of N-benzyl-1,2,3,4-tetrahydrocarbazoles, properties, 3505;
– Synthesis of some derivatives of 1,2,3,4-tetrahydrocarboline from the corresponding arylhydrazones of substituted γ-piperidones, 3511;
– Synthesis of substituted indoles from quinones, 1633;
– The o-toluidides of diarylglycolic acids and their transformation into 3,3-diaryl-7-methyloxindoles, 239.
Inhibitors (oxidation). Mechanism of action, 191;
of α-pinene, 1243.
Insecticides, (mothproofing agents) aromatic isocyanates as, preparation, properties, 1949.
Insectofungicides, see fungicides.
Iodides, action on halogenated organic compounds, mechanism of, formation of complex carbon skeletons, 1569;
– alkyl, reaction with silver salts of phenylalkylarsinic acids, to form alkyl esters of phenylalkylarsinic acids, 2469;
– and chlorides of potassium and lead, reciprocal system of, with internal heterocomplex, 1119;
– of sodium and cadmium, irreversible-reciprocal system of, 1457;
– of sodium and lead, irreversible reciprocal system of, study by the visual-polythermal method, 2673.
Iodine, systems with iodine chloride, exchange reactions in, study by the method of labeled atoms, 1711.
Iodine chloride, hydrochloric acid solution of, reaction with barbituric acid derivatives containing a cyclohexenyl group (Phanodorm, Evipan), 167;
– hydrochloric acid solution of, reaction with thiobarbiturates thiourea, 297;
– systems with iodine, exchange reactions in, study by the method of labeled atoms, 1711.
Ion-exchange adsorption, see adsorption.
Ions, organic, of the aliphatic and aromatic series (methylamine and aniline), sorption exchange on Ca thiocarbonate, 2075.
Iron, molten, influence of various factors on the solubility of carbon in, 1725.
Iron (III), oxalate complex of, composition, 757;
– oxalate complex of, instability constant and equilibrium diagram, 1133.
Iron cyanides, see cyanides.
Isoamyl formate, system with titanium tetrachloride, viscosity, density and conductance, compound formation in, 3297.
Isocyanates, aromatic (2,4,5- and 3,4,5-trichlorophenyl) preparation, properties, use as mothproofing agents, 1949.
Isomerization, of dialkylaminoacetylenes, with metallic sodium, and also with alcoholic alkali, influence of various factors, 3107;
– of 1,3,5-n-trimethylcyclohexane and isopropylcyclohexane, by aluminum chloride, 3043;
– of monodeuteronaphthalenes, 1869;
– of unsymm. methyl-di-p-tolylbutindiol(1,1-di-p-tolylpentin-2-diol-1,4), 2423;
– catalytic, heterogeneous, of hydrocarbons on acid catalysts, mechanism of. Mechanism of racemization of camphene on titanic acid, 2711.
Isoprene, addition of α-halo ethers, 1833;
– alcohol solutions of, action of benzosulfodichloro- and benzosulfodibromoamides, to give 1,2 and 1,4-chloro- and bromo ethers, reactions and properties of the products, 2447;
– oxidation to α-oxides with acetyl peroxide, 3087;
– hydrobromide, use in the synthesis of hydrocarbons with a quaternary atom – tert. -alkylethylenes, 421.
Isoquinoline compounds. N-methyl-6,7-methylenedioxy-8-methoxy-3,4-dihydroisoquinoline, see stypticin.
Isovaleraldehyde, reaction with sodium isoamylate solution in isoamyl alcohol, to form mainly methylolheptene and methylolheptane compounds, glycols, high alcohols, isovaleric acid, unsaturated and hydroxy acids, 3049.
Ketene, chlorination of, to form a mixture of chloroacetyl and dichloroacetyl chlorides, 451;
– reaction with nitrogen-containing bases, acetylation of imino and imido groups, 1375.
Ketone, p-hydroxyphenyl-phenethyl, and ethers and homologs, preparation, properties, 2791;
– methyl ethyl, methyl propyl, binary systems with chloral, viscosity and density of, 3639.
Ketone systems (acetone-methyl ethyl ketone, acetone-methyl propyl ketone, methyl ethyl ketone-methyl propyl ketone), viscosity, density and molecular bond energies of, 1453;
– condensation with dialkylphosphorous acids, to form esters, 929;
– cyanoethylation of, with the aid of acrylonitrile, synthesis of δ-keto acids and derivatives, 3251;

– formation by cleavage of diphenylchloroantimony and phenyldiiodoantimony with acid chlorides and alkyl halides in presence of aluminum chloride, 117;
– alkyl β-aminovinyl, tautomerism of, 3431;
– aromatic, formation by reaction of m-iodobenzoyl chloride with aromatic hydrocarbons, 2221;
– aryl β-chlorovinyl, direct synthesis by reaction of aromatic acid chlorides with acetylene, 643;
– β-chlorovinyl, reaction with β-dicarbonyl compounds. Ketovinylation of alkylmalonic esters, 971;
– cyanoethylated, conversion to unsaturated δ-lactones, 861;
– (α- and β-tetralones), use in the synthesis of unsaturated δ-lactones (isomeric benzotetrahydrocoumarins), 3167;
– 3,4-di-, of furanidine series, see furan compounds;
– α, α- and α, γ-dihalo, reaction with triethyl phosphite, 1611;
– α-halo, action on 2-mercaptoimidazoles, 483;
– anomalous reaction with esters of phosphorous acid. Reaction of chloro- and bromoacetone with esters of phosphorous and phenylphosphinous acids, 1605;
– anomalous reaction with esters and phosphorous acid. Reaction of α, α- and α, γ-dihaloketones with triethyl phosphite, 1611;
– reaction with phosphorous esters, (triethyl, triisobutyl phosphites), 2503;
– heterocyclic (γ-piperidones, tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones), Mannich reaction with to form heterocyclic β-amino ketones, 507;
– Pyrones, tetrahydro-γ- and tetrahydro-γ-thio, condensation with organomagnesium and -lithium compounds, 501;
– hydroaromatic, conversion into aromatic hydrocarbons by phosphorus pentoxide, 2103;
– methyl butyl and ethyl phenyl, catalytic synthesis of, from acetyl chloride and butyl bromide and benzoyl chloride and ethyl bromide, respectively, 3685;
– of the indole and pyrrole series, synthesis using acyloxysilanes from monobasic organic acids, 2627;
– of the thiophene series, formation by acylation of the thiophene nucleus with silicoanhydrides of saturated monobasic organic acids, 3717;
– unsaturated (methyl vinyl, methyl acetylenyl), condensation with fluoroprene, 3055;
– unsaturated, of the benzene, thiophene and selenophen series, use of silicoanhydrides of unsaturated monobasic organic acids in the synthesis of, 3559.
Lactam, ε-capro, transformation into polymers, participation of polymerization and polycondensation reactions in, 563.
Lactolide, epoxyoctenol methyl (α-methoxy-α-tert-butyl-β,β-dimethylethylene oxide), preparation and properties, 2115.
Lactones, mono, of saccharodicarboxylic acids, see acids.
δ-Lactones, unsaturated, preparation from monocyanoethylated acetone and cyclohexanone, properties, 861;
– with condensed ring systems, (isomeric benzotetrahydrocoumarins), synthesis from cyanoethylated ketones (α- and β-tetralones), properties, structure, reactions, 3167.
Lattice energy, see energy.
Lead chloride, iodide, see chlorides; iodides.
Lead fluoride, sulfate, see fluorides, sulfates.
Lead tetraacetate, free radical reactions of, (metallic Hg, mercuric acetate), 1887.
Leikart reaction, see reaction.
Leontice Ewersmannii BGE alkaloids, see alkaloids.
Leontine, alkaloid from Leontice Ewersmannii BGE, structure of the heterocyclic nucleus, 301.
Leuckart reaction, see reaction.
Levomycetin, see chloromycetin.
Liebermann reaction, see reaction.
Lignoceric acid, esters of, see esters.
Lignoceric alcohol, esters of, see esters.
Light sensitivity, of aromatic selenium-containing nitro compounds. 1-nitronaphthalene-8-seleninic acid, preparation, properties, salts, 1969.
Likhosherstov, M. V., obituary, 1701.
Lithium chloride, tungstate, see chlorides, tungstates.
Lithium organic compounds, condensation with tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones, 501;
– Reaction of 1,4-dilithiumdihydroxydiphenyl with alkyl halides, 1405;
– Synthesis of propionic acid-1-C^{14} via an organolithium compound, 2183;
– Transformations of dilithium compounds of benzophenonephenylimide under the influence of alkyl halides, 899;
– use in synthesis of α- and β-alkenylsilanes, 1395;
– use in the synthesis of thiazole derivatives, 65.
Lithium silicate, fluoride, see silicates, fluorides.
Lithium sulfate, molybdate, see sulfates, molybdates.
Lithium titanate, see titanate.
Longisporine, a new antibiotic, isolation, chemical nature, 2267.
Luminophores, zinc sulfide, discussion of a paper by N. Ril and G. Ortman, 1697.
Magnesium organic compounds, action on esters of cyclohexene-4-dicarboxylic acids, to form hydroaromatic glycols, diketones and unsaturated ketones, 1795;

– condensation with tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones, 501;
– reaction for the exchange of alkoxyl groups by the radicals of, a new method for the preparation of mixed acetals of formaldehyde with the β-phenylethyl alcohol residue, 3363;
– Reaction of mesitylmagnesium bromide with the allyl esters of trimethylacetic and formic acids, 569;
– Reaction of potassium fluoborate with styrylmagnesium and phenylacetylenylmagnesium bromides, 2093;
– reactions with methyl methacrylate. (action of methylmagnesium and ethylmagnesium bromides), 2723;
– Reductive properties of α-naphthylmethylmagnesium chloride in some Grignard reactions, 873.
Malonic ester, see ester, esters.
Medicinal chemistry. Acetylene derivatives. Heterocyclic compounds. Hydration of heterocyclic alcohols and glycols of the acetylene series, 195;
– Aconite alkaloids. Identity of delphelatine with eldeline, 2299; Monoacetylsongorine – a new alkaloid from Aconitum soongoricum Staph., 299;
– Aliphatic-aromatic aminoalcohols. Synthesis of α-(m-aminophenyl)-β-alkylaminoethanols, 2193;
– Alkaloids of Fritillaria Raddeana Rgl., 623; of Galanthus Woronovi. Isolation of galanthamidine, 179; of Leontice Ewersmannii BGE Leontine, the structure of the heterocyclic nucleus, 301; of the branchy plantain (Plantago Ramosa, Syn. P. Indica), 2307; of the plants of the poppy family, 181.
– Alkamino esters of α, β-diphenylpropionic acid. Derivatives of β-(4-methoxyphenyl)-α-phenylpropionic acid, 3867; of some heterocyclic acids as possible hypotensive agents, 129.
– Alkylated diamidines of the stilbene type, 3851;
– Aminoacriquine and its analogs, 491;
– A new synthesis of β-4-nitrophenyl-β-alanine, 551;
– A new way of introducing a dihydroxacetone side-chain (into ketosteroids), 3785;
– Barbituric acids. Methylenemalonic ester in diene synthesis. Spirobarbituric acids, 3173;
– Chemical structure and parasiticidal activity. Synthesis of 6-methoxy-8-(4'-aminopentyl)-aminoquinoline, 999;
– Chemistry of chloromycetin. Dependence of antimicrobial activity on structure and mechanism of action, 885;
– Chemistry of heterocycles. Synthesis of 9-phenylacridine from acyl derivatives of 2-aminotriphenylcarbinol, 2283;
– Chlorination of alkanesulfo acids, 3177;
– Condensation of o-aldehydobenzoic acid and its methyl ester with malonic ester, 143;
– Condensation of tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones with organomagnesium and – lithium compounds, 501;
– Corelborin P, 1999;
– Cyanoethylated ketones in the synthesis of unsaturated δ-lactones. Isomeric benzotetrahydrocoumarins, 3167;
– Delphinium alkaloids. Delphonine, 2011;
– Derivatives of bicyclo (2,2,1) heptane. Condensation of 2-acyl-3-chlorobicyclo (2,2,1) heptanes with malonic ester and related compounds, 3819;
– Derivatives of 4-hydroxy- and 4-butoxy-5,6,7,8-tetrahydronaphthalene-2-carboxylic acids, 155;
– 3,4-Diketones of the furanidine series of the bispyran type in the synthesis of condensed heterocyclic systems, 2293;
– Direct synthesis of aryl β-chlorovinyl ketones, 643;
– Electrolytic dissociation constants of some saccharodicarboxylic acids, 3575;
– Electrosynthesis of o- and p-methoxyphenylhydrazines, 2585;
– Fatty aromatic amino alcohols. α-(p-aminophenyl)-β-alkylaminoethanols, 2317.
– Fritillaria alkaloids. The chlorination products of raddeanine, 2003; The structure of raddeanine, 2007.
– Heterocyclic compounds. 1-carbalkoxyalkyl-2,5-dimethyl-4-piperidones, 3899; Cyanhydrins of γ-piperidones, tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones. Stereochemistry of the cyanhydrin synthesis, 3545; Hydrolysis and alcoholysis of cyanohydrins of γ-piperidones, tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones. Synthesis of 1-alkyl-2,5-dimethyl-4-carbalkoxy-4-piperidols, 3877; obtained from hydrazides. 2,5-substituted 1,3,4-thiadiazoles, 2885; Pain-relieving substances. Esters of 1-alkyl-2,5-dimethyl-4-phenyl-4-piperidinols. Homologs of promedol and isopromedol, 3533; Synthetic anesthetic substances. Esters of 1,2,5-trimethyl-4-carbalkoxy-4-piperidols. New synthetic analogs of α-cocaine and α-eucaine, 3891; Synthetic anesthetics. Esters of tertiary and secondary 4-piperidols, 3153; Synthetic anesthetics. Esters of 1,2,5-trimethyl-4-phenyl-4-piperidol, with aromatic acids, 3131; Synthetic anesthetics. Esters of 1,2,5-trimethyl-4-aryl-4-piperidol, 3139; Synthetic pain-relieving substances. 1-alkyl-2,5-dimethyl-4-phenyl-4-piperidinols, 3521.
– Hydrogenation of 4-(β,β-dicarbethoxyvinyl)-pyridine in the presence of Raney nickel catalyst, 3475;

- Imidazole derivatives. Oxidation of benzimidazole and its methyl derivatives, 479; Reaction of sulfuric acid with 2-β-ketoalkyl (aryl)-mercaptoimidazoles, 1933; Action of α-halo ketones on 2-mercaptoimidazoles, 483;

Naphthalenes, α-alkyl, study of general method of preparation by dehydrating α-naphthylalkanols and subsequent hydrogenation, 3871;
– monodeutero, isomerization of, 1869.
α-Naphthol, indamine dyes derived from, see dyestuffs chemistry.
1-Naphthol, and 4-nitroso-1-naphthol, preparation, bisulfite compounds, reaction of the latter with hydroxylamine, 3745.
Naphthoquinones, see quinone compounds.
Nerol, synthesis by condensation of methylheptenone with methyl bromoacetate and subsequent reactions, oxidation to neral, 53.
Nickel, skeletal, as catalyst, see catalysts.
Nickel sulfate, system with sodium sulfate, phase diagram of, 367.
Nicotinic acid, β-chloroethylamide of, see amide.
Nitrates and chlorides of potassium and silver, and bromides and nitrates of potassium and silver, irreversible reciprocal systems of the singular type from, with layering. 19.
Nitrile, of α, β-dibromo- and α, β-dichloropropionic acid, reaction with triethyl and tributyl phosphites, 2245;
– pimelodi, partial hydrolysis with hydrogen peroxide, to 7-aminoheptanoic acid, 3103.
Nitriles, propio, β-substituted, reaction with phenylhydrazine to form 3-amino-1-phenylpyrazoline, 3491.
Nitrobenzene, system with stannic chloride, viscosity, density, compound formation in, 2377;
– m-di, system with stannic chloride, viscosity, density, compound formation in, 2377.
Nitrogen, β-haloalkylation, by the method of conjugated reactions, 187.
Nitrogen peroxide, reaction with undecylenic acid, 819.
Nitro group, influence of some functional groups on the reduction kinetics of, on skeletal nickel, 1973.
p-Nitrophenols, reaction with dialkyl chlorothiophosphates on the presence of pyridine hydrochloride, use of the products as insectofungicides, 2867.
Nitroso group, Liebermann reaction for, 1579.
Nitrous acid, reaction with salicylic acid in acetic acid medium, with formation of o-nitrosophenol and subsequently o-diazophenol, 3653.
Nomenclature, of chemical compounds, information from the Commission of the Chemical Sciences Division of the Academy of Sciences of the USSR, 2331;
– of compounds obtained by treating carboxylic acid amides with phosphorus pentachloride, 2323.
Nucleophilic substances, action on trichloro unsaturated hydrocarbons of structure $CCl_3CH = CRR'$, 1215.
1-Octyne, preparation, properties, reaction with lower saturated monobasic acids to form vinyl esters, 1271.
Oil, allyl mustard, system with aniline, electrolytic dissociation in, 1191.
Olefins, conjugated addition reactions of halogens to, discussion of papers by A. I. Titov and F. L. Maklyaev, 2645;
– conjugated addition reactions of halogens to, nitrogen β-haloalkylation, 187;
– silico, see silicon organic compounds.
Organic compounds, halogenated, action of iodides on, formation of complex carbon skeletons, 1569.
Oxalate complex, of iron, see iron.

Oxalates, of calcium, strontium, barium, cadmium, copper, lead, solubility of, in aqueous solutions of potassium nitrate, 1167.
Oxazolidones-4, 5-arylidene-2-thio, hydrolysis to form furyl- and arylpyruvic acids, 3443.
Oxazolone, 4-aminomethylene-2-phenyl-5, condensation with α-amino-β-mercapto acids, study of products, 3811.
Oxidation, by potassium permanganate, of the ethylenic triols: 2,3,6-trimethylhepten-4-triol-2,3,6; 3,4,7-trimethylocten-5-triol-3,4,7; 2,5-dimethyl-5-(1-hydroxycyclohexyl)-penten-3-diol-2,5 and 2,4-di-(1-hydroxycyclohexyl)-buten-3-ol-2, 2429;
– inhibitors, see inhibitors;
– low-temperature, of methane hydrocarbons, in the liquid phase, influence of structure, molecular weight, 3327;
– of alkadiene hydrocarbons of unsymmetrical structure with acetyl peroxide, 2413;
– of divinyl, isoprene and piperylene with acetyl peroxide, 3087;
– of propylene, in presence of catalysts (simple oxides of metals and binary chromites), 1541;
– potential, of bichromate, theory of relationship with pH, 3601;
– reduction, manner of hydrogen transfer in, Leikart reaction, 2407;
– reduction, systems for the initiation of radical processes. Utilization of the reaction for the reduction of metal oxide salts with hydrocarbons for initiation of the polymerization process, 3315.
Oxidative action, of acyl peroxides (benzoyl, acetylbenzoyl, hydroxycyclohexyl), 497.
Oxide, N-carbazolepropene, see carbazole compounds;
– divinyl, reaction with primary and secondary alcohols to form the corresponding aminoaclohols, 2125;
– α-methoxy-α-tert-butyl- β,β-dimethylethylene, see lactolide, epoxyoctenol methyl.
Oxide ring, three-membered, compounds containing. Reaction of ammonia with esters of glycidic acids, 1585.
Oxides, manganese, reaction with isopropyl, and other alcohols, 415;
– metal (vanadium), reaction with alcohols (isopropyl alcohol), 3679;
– of transition metals as catalysts of the oxidation of hydrocarbons (propylene), 1541.
α-Oxides, of piperylene, see piperylene;
– of the acetylene and vinylacetylene series, reaction with hydrogen selenide to form alkyl, hydroxyalkyl- and vinylselenophen, 3707.
N-oxides, heterocyclic, polarographic reduction of, comparison with dipole moments, 1953;
Oxindole, see indole compounds.
Oxonium compounds, of complex esters, see esters.
Oxygen, role of, in initial stage of vinyl chloride polymerization, 1227;
– isotopes, determination in organic compounds by exhaustive hydrogenation and subsequent mass spectrometric analysis, 1177.
Oxonization, of unsaturated compounds. Curves for the absorption of ozone by unsaturated compounds and their mixtures. 803.
Papaveraceae alkaloids, see alkaloids.
Pentene-2,3-ethyl, synthesis from ethylmagnesium bromide and carbon dioxide, properties, 43.
Paraffins, (n-octane), investigation of the first stages of catalytic cracking of, on aluminosilicate catalysts, by the effect of small additives on the process, 2701.
Peptides, N-benzoyl-O, of serine and threonine, enzymatic hydrolysis of, 3413;
– of threonine and allothreonine and their methylamides, synthesis, 2605;
– threonine, synthesis using the method of mixed anyydrides, carbobenzoxy derivatives, 2601.
Perchlorate, allyltrimethylammonium, mechamism of bromine addition reactions of, 3037.
– of elements of the second group of the periodic system, acidity, hydrolysis, formation of aquo-acids, 331.
Peroxides, acyl(benzoyl, acetylbenzoyl, hydroxycyclohexyl), oxidative action of, 497;
– unsymmetrical, (acetyl benzoyl, benzoyl-m-nitrobenzoyl, benzoyl-p-nitrobenzoyl), reactions with mercury, 1259.
Petroleum chemistry. Alkylation of benzene with polyhalogenated derivatives in presence of metallic aluminum, 1549;
– Cycloalkylation of aromatic compounds. Reaction of 1-phenylcyclohexanol with benzene, 201;
– Investigation of the first stages of catalytic cracking of aluminosilicate catalysts by the effect of small additives on the process, 2701;
– Low temperature oxidation of methane hydrocarbons, 3327.
Phanodorm, see barbituric acid derivatives.
Phases, liquid, metastable equilbria between, (systems diphenylamine – quinoline, diphenylamine – quinoline – sulfur), 2043.
Phenanthrene compounds. Condensation of cyclic allyl halo- derivatives with cyclic 2-methyl-1,3-diketones and intramolecular cyclization of the resultant compounds to ketones containing the hydrogenated skeleton of phenanthrene, chrysene and cyclopentanophenanthrene with an angular methyl group, 1667.
Phenazines, bromo, preparation, properties, 3377.
– iodo, preparation, properties, 3855.

Phenol, system with chloral, viscosity, compound formation in, 3291;
– system with stannic chloride, viscosity, density, electrical conductivity, vapor pressure, compound formation in, 2371;
– derivatives (o- and p-nitrophenol, 2,4-dinitrophenol, p-aminophenol), systems with stannic chloride, complex formation in, 2691;
– ethers and esters of, amination with compressed ammonia, 815;
– m-nitro, reaction with symmetrical mercury compounds (diphenyl-, di-p-aminophenyl-, di-p-methoxyphenyl- and di-o-tolyl-mercury), 1017.
Phenols, catalytic reaction with phosphorus oxychloride, formation of chlorophosphates, 3407;
– chloro, reaction with phenylhydrazine study by the method of physico-chemical analysis, 1757;
– diatomic (pyrocatechol, resorcinol, hydroquinone), reaction with ethanolamine, properties of binary systems with, 1211;
– (phenol, pyrocatechol, resorcinol, hydroquinone, o-, m-, p-nitrophenol, 2,4-dinitrophenol, 2,4,6-trinitrophenol), physicochemical analysis of, chemical interaction in, 2083.
Phenothiazine compounds. Synthesis of β-(N-2-chlorophenothiazyl)-propionic acid and its derivatives and derivatives of β-N-phenothiazyl-propionic acid, 3227;
– Synthesis of dialkylaminoacyl-2-chlorophenothiazines, pharmacological properties, 3769.
Phenylhydrazine, see hydrazine derivatives.
Phenylmercury hydroxide, catalytic decomposition in solvents (containing deuterium), 1889.
Phosphate complexes of iron, in solution, composition of, 751.
Phosphates, see esters of phosphoric acid.
Phosphine, phenyldichloro, use in the oxidative chlorophosphination of cyclohexane and propylene, 3375.
Phosphites, see esters, of phosphorous acid.
Phosphoric acid, swelling and solution of cellulose in, influence of heat, standing, 3357.
Phosphonium compounds, asymmetric, see phosphorus organic compounds.
Phosphorus compounds. Heterotriacids of phosphorus and silicon with varying composition of addends, containing molybdenum and tungsten, synthesis, analysis, 1.
Phosphorus organic compounds. Acid chlorides of partial aromatic esters of arylsulfonimidophosphoric acids, 267;
– Addition and isomerization reactions of esters of alkylphosphinous acids, 2753;
– Alkoxydianilidophosphazosulfonaryls, preparation, properties, 287;
– A new method of preparation of esters of phosphinic and thiophosphinic acids. Addition of incomplete esters of acids of phosphorus to ethyl isocyanate, vinyl acetate and esters of unsaturated carboxylic acids, 3463;
– Addition of mixed dialkylphosphorous and dialkylthiophosphorous acids and of diallylphosphorous acid to unsaturated compounds, 1877;
– Atomic refraction of phosphorous in esters of alkylphosphinous acids, 1615;
– Chlorides and esters of arylcarbamidophosphoric acids, 2555;
– Chlorides and esters of urethanphosphoric acids preparation, properties, 2947;
– Di-acid chlorides of acylamidophosphoric acids of the aromatic series, preparation, properties, 1029;
– Double salts of lanthanum, cerium, praseodymium and neodymium with triphenylbenzylphosphonium nitrate, 403;
– Esters of N-phosphoric acid, trihydroxyphosphazo-trichloroacetyl, preparation, properties, 2935;
– Interaction of dialkylphosphorous acids with aldehydes and ketones. Di-tert-(β',β',β'-trichloro)-butyl esters of substituted α-hydroxymethylphosphinic acid, 929;
– Mechamism of the Arbuzov rearrangement. Reaction of α,β-dibromoethyl and α,β-dichloroethyl isopropyl and α,β-dibromoethyl and α,β-dichloroethyl butyl ethers with phosphites, 171;
– Mixed esters of arylsulfonimidophosphoric acids and non-rotational isomerism, 75;
– Organic insectofungicides. A new method for the preparation of chloro- and dichlorothiophosphoric acids, 519;
– Pentaphenylphosphorus, reactions of, 2825;
– Preparation of phosphines and asymmetric phosphonium compounds with different aliphatic radicals, 3815;
– Preparation of some alkyl-β-hydroxyethyl-phosphorous acids, 1619;
– Reaction of chloro- and bromoacetone with esters of phosphorous and phenylphosphinous acids, 1605;
– Reaction of α,α- and α,γ-dihaloketones with triethyl phosphite, 1611;
– Reaction of phosphorus esters with mono and dichloroacetylacetone, phosphonoacetone and acetoacetic ester to form unsaturated mixed phosphoric esters, 2503;
– Reaction of phosphorus pentachloride with carboxylic acid amides. Trichlorophosphazoacyls, preparation, properties, 1033;

– Reaction of trichlorophosphazosulfonaryls with alcohols, 533;
– Reactivity of the alkali salts of dialkylthiophosphoric acids, acylation reactions, 119;
– Some rules in the series of phosphorus-containing acids, relationship between dissociation constants and structure, 2497;
– synthesis from hydrocarbons and their derivatives. Oxidative chlorophosphination of cyclohexane and propylene using phenyldichlorophosphine, 3375;
– Synthesis of acyl derivatives of 0,0-dialkylthiophosphates, 1881;
– Synthesis of trialkylsilanephosphoric acids, 285;
– The mechanism of the Arbuzov rearrangement. Reaction of the nitrile and methyl ester of α,β-dibromo and α,β-dichloropropionic acid with phosphites, 2245;
– The reactions of sulfenyl chlorides with phosphites, 3765;
– Trichlorophosphazotrichloroacetyl and the acid chloride of the N-phosphoric acid of trichloraminoacetyl chloride, 2239;
– Triphenylphosphazosulfonaryls, preparation, properties, 1027.
Phosphorus oxychloride, catalytic reaction with phenols, formation of chlorophosphates, 3407.
Phosphorus pentachloride, nomenclature of compounds obtained by treating with carboxylic acid amides, 2323;
– reaction with carboxylic acid amides, to form trichlorophosphazoacyls, 1033;
– system with tin chloride, electrical conductivity, viscosity, cryoscopy, complex formation, 1535;
– systems with HCl-organic solvent (acetonitrile), complex formation in, 1141.
Phosphorus, pentaphenyl, see phosphorus organic compounds.
Photochemical chlorination, see chlorination.
Photographic chemistry. Studies in the field of azomethine dyes. Indamine dyes derived from the anilide of 1-hydroxy-2-naphthoic acid, 2839;
– On the color of certain indamine dyes derived from α-naphthol containing substituents in the naphthalene nucleus, 2831.
Phthalazines, synthesis by cyclization of acylhydrazones of aromatic aldehydes, 1297.
Phthalic acid derivatives. Synthesis of 3,6-endohexahydrophthalic acid derivatives, 227.
β-Picoline, interaction products with 2,4-dinitrochlorobenzene, formation of the 2,4-dinitrochlorophenylate of β-picoline, a violet polymethine dye and a decomposition product of the dye, 3845.
Pinacols, containing substituted acetylene residues, see acetylene compounds.
Pinacones, containing substituted acetylenic radicals, transformations of, 2747;
– Action of mercuric chloride and bromide on unsymm. dimethyl-phenyl-phenylethinyl-ethylene glycol, 1803.
α-Pinene, inhibitors of oxidation of, 1243;
– optically pure, preparation from β-pinene, 2635.
Piperidine compounds. 1-alkyl-2,5-dimethyl-4-phenyl-4-piperidinols, preparation, separation of isomers, use as analgesics, 3521;
– 1-Carbalkoxyalkyl-2,5-dimethyl-4-piperidones, preparation, properties, 3899;
– Hydrolysis and alcoholysis of cyanohydrins of γ-piperidones, tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones, synthesis of 1-alkyl-2,5-dimethyl-4-carbalkoxy-4-piperidols, 3877;
– of acetylene and vinylacetylene alcohols, preparation, properties, hydration, benzoates, physiological activity, 195;
– β-(piperidyl-4)-glutaric acid and the products of its transformations, 469;
– Preparation of 4-amino-piperidines by reductive amination of 4-piperidones, spasmolytic activity, 1679;
– Synthesis of 1-benzoyl-4-(β-carbethoxy-β-formylethyl)-piperidine acetal, 3163;
– Synthesis of substituted 4-piperonyl-6-oxotetrahydropyrimidines, 1287;
– Synthetic anesthetic substances. Esters of 1,2,5-trimethyl-4-carbalkoxy-4-piperidols, new synthetic analogs of α-cocaine and α-eucaine, preparation, anesthetic properties, 3891.
Piperidine, 3-vinyl, synthesis, in 5 steps from 3-(α-chloroethyl)-pyridine, derivatives, oxidation, 2271.
Piperidinols, 1-alkyl-2,5-dimethyl-4-phenyl-4, see piperidine compounds.
4-Piperidol, 1,2,5-trimethyl-4-phenyl, esters, see esters;
– 1,2,5-trimethyl-4-aryl, esters of, see esters.
4-Piperidols, 1-alkyl-2,5-dimethyl-4-carbalkoxy see piperidine compounds;
– tertiary, secondary, esters of, see esters.
Piperidones, see piperidine compounds;
– see also ketones, heterocyclic.
4-Piperidones, 1-carbalkoxyalkyl-2,5-dimethyl, see piperidine compounds.
γ-Piperidones, cyanohydrins of, see cyanohydrins.
Piperylene, action of hypochlorous acid, with formation of chlorhydrins, 2129;
– alcoholic solutions of, action of benzenesulfodichloramide, 1785;
– oxidation to isomeric α-oxides, with acetyl peroxide, 3087;

— solutions in methyl and ethyl alcohols, action of benzosulfodibromoamide to form 1-bromopenten-3-ol-2 and 2-ol-4-ethers, 2137;
— α-oxides of, addition reactions with water, acetic anhydride, acetyl chloride, ethyl alcohol, 3083.
Plantago Ramosa, Syn. P. Indica), alkaloids of, see alkaloids.
Polarographic analysis. Polarographic reduction of heterocyclic N-oxides, 1953;
— Polarographic study of the kinetics of polymerization processes, 2071.
Polyamides, mixed, dependence of properties on the number of hydrogen bonds, 1371.
Polyenoid compounds. The structure of 2-methyl-4-(2',6',6'-trimethylcyclohexen-1'-yl)-buten-2-al-1, 3457.
Polymerization, initiation of, and decomposition, of triazenes, role of activators in, 3789;
— of isoprene, initiation of, with ferric and chromium naphthenates, 3315;
— polarographic study of kinetics of (methyl methacrylate), 2071;
— ionic, of α-methylvinyl propyl and butyl ethers, with $FeCl_3$ and BF_3 catalysts, 1883.
Potassium acid sulfates, (tripotassium hydrobisulfate), properties of, 1081.
Potassium bichromate, oxidation potential of, theory of relationship with pH, 3601.
Potassium bromide, system with $Hg(NO_3)_2$ — KCNS — $Fe(NO_3)_3$, study of equilibrium in, by the optical method, 377.
Potassium chloride, system with $CdCl_2$-H_2O, study of complex formation in, using refractometry, 3627;
— system with $CaCl_2$-H_2O vapor pressure of, 1161;
— system with glucose — water, at 25°, solubilities in, 2383;
— system with $Hg(NO_3)_2$ — KCNS — $Fe(NO_3)_3$, study of equilibrium in, by the optical method, 377;
— system with Na_2Cl_2-$CaSO_4$, equilibrium diagram of, 747;
— system with Na_2CO_3-K_2SO_4, phase diagram of, 1129;
— system with urea — water, at 25°, solubility in, 2983;
— iodide, see chlorides, iodides;
— sulfate, see chlorides, sulfates;
— tungstate, see chlorides, tungstates.
Potassium fluoborate, reaction with styrylmagnesium and phenylacetylenylmagnesium bromides, 2093.
Potassium fluoride, sulfate, see fluorides, sulfates.
Potassium nitrate, system with NH_4NO_3-H_2O, physicochemical analysis at 25°C, 1169;
— system with silver nitrate, study by the method of electromotive forces, 3275;
— solutions, aqueous, solubility of oxalates of calcium, strontium, barium, cadmium, copper and lead in, 1167.
Potassium persulfate, in hydrocarbon emulsions, decomposition rate of, 1481.
Potassium sulfate, system with Na_2CO_3-K_2Cl_2, phase diagram of, 1129;
— system with sulfuric acid, physicochemical analysis of, 1081.
Potassium thiocyanate, systems with $Hg(NO_3)_2$-$Fe(NO_3)_3$ — KCl, $Hg(NO_3)_2$ — $Fe(NO_3)_3$ — KBr, study of equilibrium in, by the optical method, 377.
Potential, half-wave, influence of specific adsorption on, during reduction of complex compounds, 1763.
Potentials, electrode, of metals, in fused salts, periodic relationship of, 3303.
Precipitation, fractional, of hydroxides from solution, with ammonia, reciprocal effect of, 1093.
Promedol, isopromedol, see esters of 1-alkyl-2,5-dimethyl-4-phenyl-4-piperidinols. also anesthetics.
Propane, dihydroxy, carboxylic side chain, methods of introducing into cyclic compounds, 1343.
Propargyl aldehyde, condensation with 2-halogeno- and 2-alkoxybutadienes, to form 4-halogeno- and 4-alkoxy-$\Delta^{1,4}$-dihydroxybenzaldehydes, 2741;
— reaction with aniline, structure of the product, 1623.
Propiolic acid and its methyl ester, condensation with dienic hydrocarbons to form $\Delta^{1,4}$-dihydrobenzoic acids and their methyl esters, 1779.
Propionaldehydes, β,β-dihalogen substituted, reactions of formation of 1,1,3-tribomo-3-acetoxypropane and its reactions, 3733.
Propionic acid-1-C^{14}, synthesis via an organolithium compound, 2183.
Propionitriles, β-substituted, see nitrile.
Propylene, oxidative chlorophosphination using phenyldichlorophosphine, 3375.
Putrescine derivatives. Preparation and properties of di-N,N'-(1-benzylethyl)putrescine and N-isopropyl-N'-(1-benzylethyl)putrescine, physiological action, 619.
Pyramidon, system with salicyclic acid-water phase equilibria in, 1197.
Pryazine compounds. Amino acid amidines of the dihydropyrazine series. Preparation from the imino ether of (O,O-dibenzyl-2,5-dihydropyrazine)amidines, 275.
Pryazolidine compounds. Oxidizability of 1,2-diphenyl-4-n-butylpyrazolidin-3,5-dione, 653.
Pyrazolines, hydrochlorides and N-formyl derivatives, absorption spectra (UV), 3495;

– 3,5,5-trialkyl, synthesis, by rearrangement of ketazines, properties, 1925.
Pyrazolone compounds. Preparation of 1-(2'-chloro-5'-sulfophenyl)-3-methyl-5-pyrazolone from the amide of acetoacetic acid, 2543;
– Pyrazolones-5, 3-alkyl-1-(carboxy and dicarboxybenzthiazolyl-2')-, azomethine dyes from, preparation, analysis, absorption spectra, 3383;
– Tautomerism of derivatives of dipyrazolonylphenylmethane, 993.
Pyridine, system with acetic acid- water, electrical conductivity of, 1185.
Pyridine compounds. β-chloroethyl and ethyleneimine derivatives, preparation, properties, 2275;
– Derivatives of pyrido-(3,2-d)-thiazole, preparation, properties, 985;
– Hydrogenation of 4-(β,β-dicarbethoxyvinyl)-pyridine in the presence of Raney nickel catalyst, 3475;
– Preparation, properties, of γ-vinyl pyridine, condensation with diene hydrocarbons (butadiene, piperylene, isoprene, diisopropenyl, cyclopentadiene), reactions of the products, 49;
– Pyrido-(3,4-d)-thiazole derivatives, 663;
– β-(pyridyl-4)-glutaric acid and the products of its transformations, 469;
– Reaction products of 2,4-dinitrophenylpyridinium chloride with diamines, 249.
Pyridine dyes, see dyestuffs chemistry.
α-Pyridone, tautomerism with carbostyril, pH measurements, infrared spectra, 2257.
Pyrimidine compounds. Preparation of pyrimidinoimidazolone salts and alkylation of pyrimidinoimidazolones, 3805;
– Synthesis of substituted 4-piperonyl-6-oxotetrahydropyrimidines, 1287;
– Transformation of diastereoisomeric γ-ethyl-β-amino caprylic acids into substituted tetra- and hexahydropyrimidines, 1323.
Pyrones, see ketones, heterocyclic.
γ-Pyrones, tetrahydro-, tetrahydrothio, cyanohydrins of, see cyanohydrins.
Pyrrole compounds. Acyloxysilanes from monobasic organic acids in the synthesis of ketones of the indole and pyrrole series, 2627.
Pyruvic acids, furyl-, aryl-, see acids.
Quaternary ammonium compounds. The formation of tetrolic acid by reaction of trimethyl-(2,2,3,3-tetrachlorobutyl)-ammonium iodide with aqueous alkali, 2167.
Quaternary salts, of 2-arylbenzothiazoles and 2-arylbenzoselenazoles, steric hindrance in, study based on absorption spectra, 3215;
– of benzinidazole derivatives, the structure of the products of alkali treatment of (opening of imidazole ring), 2779.
Quinaldine, lability of hydrogen atoms of the methyl group, condensation with naphthalene and perylene tetracarboxylic dianhydrides, to form dyestuffs, 2175.
Quinoline, reaction with 1-methyl-3,4-dibromocyclohexane, to form toluene, 1813;
– reaction with 1,2,3-tribromocyclohexane, to form benzene, 1575;
– system with acetic acid, viscosity, density, electrical conductivity of, 1521;
– system with acetic acid-water, electrical conductivity of, 1185;
– systems with diphenylamine, diphenylamine – sulfur, metastable equilibria between liquid phases, 2043;
– 6-monohalomethyl, preparation, properties, derivatives, 1945;
– 2-nitromethyl, and derivatives preparation, from quinophthalone, 2943.
Quinoline compounds, preparation, properties, 233;
– Reduction of quinolinium salts with formic acid in presence of sodium formate or triethylamine, 1929;
– Synthesis and properties of 2-(hydroxyphenyl) quinoline derivatives, 263;
– Synthesis of 6-methoxy-8-(4'-aminopentyl)-aminoquinoline, properties, antimalarial activity, 999;
– Synthesis of quinoline bases from diamines of the diphenyl series, 527.
Quinone compounds. Condensation of acenaphthenequinone with 1,3-indandione, 539;
– Condensation of chloro- and 2,3-dichloro-p-benzoquinone with acetoacetic and benzoylacetic esters, 603;
– Conversion of naphthoquinones to triketocarboxylic acids, by the Hooker reaction, 1907;
– Hydrolytic and oxidativehydrolytic cleavage of 2-phenyl- and 2-benzyl-3-hydroxy-1,4-naphtho-, quinones, 1901;
– Preparation of endoethylenenaphthofurans, 3259;
– Reaction of acetylacetonimine with p-quinone, 1629;
– The reaction of p-benzoquinone with p-nitro- and p-bromobenzoylacetic esters, to form benzofuran and benzodifuran derivatives, 3261;
– Reaction of 5,8-endoethylene-1,4-naphthoquinone with hydrogen chloride and with acetoacetic ester, 837;
– Synthesis of some quinones of the dihydro- and tetrahydronaphthalene series by oxidation of the corresponding hydroquinones with potassium bromate, 601;
– Synthesis of substituted indoles, 1633;

– The reaction of p-benzoquinone with ethyl acetoacetate, to form benzofuran derivatives, 3255.
Quinuclide compounds. Preparation and properties of ethyl-N-(2-quinuclidinyl)urethane, 135.
Racemic compounds, alkylsulfuric acids as reagents for the cleavage of, 1385.
Racemization of camphene, on titanic acid, mechanism of, 2711.
Raddeanine, chlorination, structure, absorption spectrum, 2003;
– structure of, 2007;
Radicals, free, reactions in solution, destruction of polymeric molecules by, 2461;
– Mechanism of the decomposition of aliphatic aromatic triazenes in the presence of water and acids, 3307;
– Role of activators in the decomposition processes in triazenes and in initiation of polymerization, 3789.
Radiochemistry. Compounds labeled with C^{14} and N^{15}. Synthesis of "key" compounds, 2187;
– Determination of solubility of sparingly soluble compounds with the aid of radioactive indicators, 2359;
– Determination of the isotopic oxygen composition in organic compounds, 1177;
– Investigation of the mobility of the tertiary butyl group in derivatives of tert.-butylbenzene by the method of isotopic exchange, 1837;
– Methods of establishing the mechanism of the co-precipitation of radioelements with precipitates of difficulty soluble salts, 1077;
– Studies of compounds labeled with C^{14} and N^{15}. Synthesis of α-N^{15}-amino acids, 2587;
– Study of redistribution of hydrogen between hydrocarbons on aluminosilicate catalyst using carbon isotope C^{14}, 2403.
– Study of the mechanism of hydrolysis with the aid of the heavy oxygen isotope. Hydrolysis of ethyl propionate in alkaline medium, 1183; Hydrolysis of dimethyl sulfate in acid and alkaline medium, 3323;
– Study of the exchange reactions of iodine in systems containing iodine chloride by the method of labeled atoms, 1711;
– Study of the mechanism of distribution of isomorphous components on crystallization from aqueous solutions using radioactive indicators. Study of the equilibrium in the system copperammonium sulfate – zinc-ammonium sulfate – water at 20° in presence of the radioactive isotopes Zn^{65} and Cu^{64}, 2033;
– Synthesis of ethyl alcohol containing the heavy oxygen isotope, 3319;
– Synthesis of propionic acid-1-C^{14} via an organolithium compound, 2183;
– Synthesis of some mercaptans and disulfides labeled with radioactive sulfur isotope, 777.
Rare earths, camphorates, see camphorates;
– double salts with triphenylbenzylphosphonium nitrate, 403.
Reaction, Grignard, reductive properties of α-naphthylmethylmagnesium chloride in, 873;
– Hoffman, application to high-molecular compounds containing amide groups, 2561;

β-Sitosterol, behavior towards u.v. rays, temperature, digitonin, acetyl derivative, 1357;
– conversion to $\Delta^{5,6}$-dehydroepianhydrosterone-17, 1361.
Sodium carbonate, specific heat at high temperature, 1107;
– system with K_2Cl_2-K_2SO_4, phase diagram of, 1129;
– thermodynamic characteristics at high temperatures, 1103.
Sodium chloride, system with $CaCl_2$-H_2O, vapor pressure of, 1161;
– system with K_2Cl_2-$CaSO_4$, equilibrium diagram of, 747;
– iodide, see chlorides, iodides;
– and tungstate, see chlorides, tungstates.
Sodium hydroxide, mechanism of reaction with tantalum pentoxide, 1429;
– specific heat at high temperature, 1107;
– thermodynamic characteristics at high temperatures, 1103.
Sodium isoamylate, solution in isoamyl alcohol, reaction with isovaleraldehyde to form mainly methylolheptene and methylolheptane compounds, glycols, higher alcohols, isovaleric acid, unsaturated and hydroxy acids, 3049.
Sodium nitrate, system with NH_4NO_3-H_2O, physicochemical analysis at 25°C, 1169.
Sodium organic compounds. Transformations of disodium compounds of benzophenonephenylimide under the influence of alkyl halides, 899.
Sodium phosphomolybdates, preparation from molybdic anhydride and sodium phosphates, 3273.
Sodium phosphotungstates, preparation from tungstic acid and sodium phosphates, composition of the products, 2967.
Sodium sulfate, specific heat at high temperature, 1107;
– systems with cobalt sulfate, nickel sulfate, phase diagrams of, 367;
– thermodynamic characteristics at high temperatures, 1103.
Solubilities in the system potassium chloride – glucose – water at 25°, 2383.
Solubility, in the system, potassium chloride – urea – water, at 25°, 2983;
– of $Co[Hg(CNS)_4]$ in water, determination as a function of temperature, 387;
– of oxalates of calcium, strontium, barium, cadmium, copper and lead in aqueous solutions of potassium nitrate, 1167;
– of perchlorates of elements of the second group of the periodic system, 1733;
– of sparingly soluble compounds, determination with the aid of anisotropic radioactive indicators, 2359.
Solubility product, of beryllium hydroxide, 1745.
Solvents, of low dielectric constant, influence of alkali metal cations in complex compounds of aluminum bromide on the molecular composition of these complexes in, 2985;
– organic (acetonitrile), systems with PCl_5 – HCl, complex formation in, 1141.
Songorine, monoacetyl, isolation from Aconitum soongoricum Staph., properties, 299.
Sophocarpinols, phenyl, ethyl, preparation, properties, derivatives, 2303.
Sorption exchange of organic ions (methylamine and aniline) on Ca thiocarbonate, 2075.
Specific heat, of Na_2CO_3, Na_2SO_4 and NaOH at high temperatures, 1107;
– true, of materials at low temperatures, determination of, calorimetric apparatus for, 2665.
Speciosine, a new alkaloid from Colchicum Speciosum Stev., isolation, properties, 3591.
Spectra, absorption, and halochromism, of tertiary alicyclic and aliphatic alcohols, 3013;
– and structure, of benzene derivatives, 3,4-dihydroxyacetophenone and its methyl ethers, 147;
– of aromatic carbinols, and halochromism, 3005;
– of p-aminobenzenesulfonic acid, and its amide, 2801;
– of azines and pyrazolines, their hydrochlorides and formyl derivatives, 3495;
– of 2,5-dihydroxyacetophenone and its methyl ethers, 311;
– of p-dimethylaminobenzenesulfonic acid and its methyl ester, 2809;
– of p-fuchsin and aniline blue, and their carbinols, 3425;
– of molecular complexes of 1,3-dinitrobenzene and 2,4-dinitro stilbene with dimethylaminostilbene, 1979;
– of pyridine dyes, effect of acids and alkalis on, 3447;
– of triphenylamine and its p-nitro derivatives in pure alcohol and in the presence of sodium alcoholate, 1941;
– reflection, analysis of the influence of structure on. Comparative study of color in azomethines of type $O_2NC_6H_4CH = NC_6H_4A$ and $AC_6H_4CH = NC_6H_4NO_2$, 3389;

– Spectroscopic investigation of factors conditioning β-elimination reactions of β-haloalkylsilanes, 2613;
– UV and visible, of triphenylamine in concentrated sulfuric acid, 2953;
– infra red, of derivatives of the androstane and 18-norandrostane series, 3569.
Spirobarbituric acids, see barbituric acids.
Stability, thermal, of paraffinic hydrocarbons, 1777.
Stannic bromide, system with monobromoacetic acid, fusibility, viscosity and density of, 2997.
Stannic chloride, system with anisole, viscosity and density of, 2697;
– system with phenol, viscosity, density, electrical conductivity, vapor pressure, compound formation in, 2371;
– systems with nitrobenzene, m-dinitrobenzene, viscosity, density, compound formation in, 2377;
– systems with o- and p-nitrophenol, 2,4-dinitrophenol and p-aminophenol complex formation in, 2691;
– stannic bromide, complexes with glycine, formation, structure of, 3667;
– stannic bromide, complexes with thiourea, formation, structure of, 3663.
Stereochemistry. Heterocyclic compounds. Cyanhydrins of γ-piperidones, tetrahydro-γ-pyrones and tetrahydro-γ-thiopyrones. Stereochemistry of the cyanhydrin synthesis, 3545;
– Direction and stereochemical specificity of the dehydration of esters of 3,7-dimethylocten-6-ol-3-io-(1) acid (β-hydroxy-α, β-dihydrogeranic) and 5,9-dimethyldecadien-2,8-ol-5-ic-(1) acid, 3111;

– Steric hindrance in quaternary salts of 2-arylbenzothiazoles and 2-arylbenzoselenazoles, 3215;
– Sulfonation and sulfonic acids of acidophobic compounds. Alkylsulfuric acids as reagents for the cleavage of racemic compounds, 1385;
– Synthesis and separation of diastereoisomeric γ-ethyl-β-aminocaprylic acids and their derivatives, 907;
– Tautomeric compounds. Tautomerism of derivatives of dipyrazolonyl-phenyl-methane, 993; The mobility of the hydrogen atoms of the methyl groups of nitrotoluenes, 961; Tautomerism of alkyl β-aminovinyl ketones, 3431; Transformation and synthesis of carbohydrates. Steric hindrance in the azo-coupling of arylglucamines, 855.
Steroid compounds, and related substances. 9-Methyl-1,6-diketo-Δ^5-octahydronaphthalene, preparation, properties, 465;
– Condensation of halogen derivatives of the allyl type with cyclic 1,3-diketones and inner-molecular cyclization (with loss of water) of the resultant compounds, 939;
– Some properties of p-toluenesulfonates of 17 β-hydroxysteroids. Infra-red spectra of some derivatives of the androstane and 18-norandrostane series, 3569; Products of dehydration of 17 α-methylandrostanediol-3 β, 17 and its derivatives, 3267; Synthesis of the acetate of 17,17-dimethyl-18-nor-$\Delta^{5,12}$-androstadienol-3, 3565;
– Stereochemistry of the hydrogenation and reduction of 6,9-dimethyl-1-keto-$\Delta^{(10),5}$-hexahydronaphthalene, 1333;
– Synthesis of $\Delta^{5,6}$-dehydroepianhydrosterone-17 from pinewood steroid (β-sitosterol), 1361;
– Synthesis of polycyclic compounds related to the steroids. Condensation of cyclic allyl haloderivatives with cyclic 2-methyl-1,3-diketones and intramolecular cyclization of the resultant compounds to ketones containing the hydrogenated skeleton of phenanthrene, chrysene and cyclopentanophenanthrene with an angular methyl group, 1667;
– The simpler analogs of corticosteroids. Methods of introducing the dihydroxyacetone, glycerol and dihydroxypropanecarboxylic side chains in cyclic compounds, 1343.
Sterols, pinewood see β-sitosterol.
Stilbene, dimethylamino, molecular complexes with 2,4-dinitrostilbene and 1,3-dinitrostilbene, absorption spectra of, 1979;
– 2,4-dinitro, molecular complex with dimethylaminostilbene, absorption spectra of, 1979.
Stilbenes, 4,4'-diamidines and 2-substituted products, preparation, properties, 3851.
Strontium, system with bismuth, thermal analysis of, 1705.
Structure, spatial, and reactivity. Inhibited internal rotation and the kinetics of the acylation of 2,2'-halogen derivatives of 4-aminodiphenyl and 4-amino-4'-nitrodiphenyl, 3777.

Stypticin (cotarnine – N-methyl-6,7-methylenedioxy-8-methoxy-3,4-dihydroisoquinoline chloride), polarographic behavior of, 2991.
Styrene, condensation with benzene, under various conditions, 1853;
– polymerization under the influence of diazoamino compounds and activators, (organic acids and anhydrides), 3205;
– methyl, chloro- and bromo- substituted, preparation, properties, 1849.
Styrene compounds. Condensation of styrene and its homologs with aldehydes in presence of hydrochloric acid and reaction of 4-phenyl-1,3-dioxane with $SOCl_2$, PCl_5 and fatty acids, 1643;
– Reaction of potassium fluoborate with styrlmagnesium and phenylacetylenylmagnesium bromides, 2093.
Succinic acid, chloro, N-arylamides of, see Amides, N-aryl.
Succinimide, N-bromo, reaction with the enol acetate of cyclohexaone, 967.
Surcose, reaction mechamism of the hydrolysis of, deduced from velocity constants for hydrolysis in water and alcohol-water solutions at 25° in presence of varying amounts of HCl and the sugar, 2577.
Sulfamethine (condensation product of 4,4'-diaminodiphenyl sulfone with p-dimethylaminobenzaldehyde), preparation, properties, antitubercular activity, 175.
Sulfamide, imido, copper, barium, silver salts of, preparation, properties, 411.
Sulfates and chlorides of potassium and cadmium, adiagonal reciprocal system of, double decomposition, complex-formation, and polymorphism in, 725;
– and chlorides of potassium and calcium, ternary reciprocal system of, surface of crystallization, 349;
– and fluorides of lead and potassium complex formation and double decomposition in the reciprocal system of, 359;
– and molybdates of lithium and silver, reciprocal-irreversible system of, study by the visual polythermal method, 2027.
Sulfenyl chloride, see chloride.
Sulfide, phenyltrifluoromethyl, preparation, properties, nitration, 99.
Sulfides, formation by reacting ferrous sulfide with oxides of metals. Reaction of FeS with SiO_2 in presence of carbon, 325;
– formation in the reaction of ferrous sulfide with metal oxides. Reaction of FeS with Al_2O_3 in presence of carbon, 29;
– di, labeled with radioactive sulfur, preparation, properties, 777;
– p-nitrophenyl of benzazoles and 4-phenylphthalazine, preparation, properties, comparison with corresponding sulfones, 2549.
Sulfonamides. Reaction of di-(carbomethocysulfanilyl)-aminothiazole with 2-aminothiazole, kinetics of, 2279;
– Reaction of trichlorophosphazosulfonaryls with alcohols, 533.
Sulfonate, hydroxylamine, mono, preparation, conversion to imidodisulfonates.
Sulfonates, imidodi, preparation from hydroxylamine monosulfonate, 771.
Sulfonation and sulfonic acids as acidophobic compounds. Alkylsulfuric acids as reagents for the cleavage of racemic compounds, 1385;
– Use of dioxanesulfotrioxide for determination of aromatic amines and aldehydes, 1003;
– Formation of diphenyl sulfone sulfonic acids in the sulfonation of benzene with oleum, 1379;
– of 2-chloronaphthalene, at elevated temperature to form sulfonic acids, 2521;
– of 2-chloronaphthalene at low temperatures, 2225;
– of isomeric benzenedisulfonic acids, to trisulfonic acid, conditions for reaction, 3185;
– Preparation and properties of 1,8-naphthalenedisulfonic acid, 529;
– Quantitative determination of benzenedisulfonic acids, 2909;
– Sulfonic acids of sulfones as by-products of sulfonation reactions. The behavior of the disulfonic acid of diphenylsulfone under conditions of alkaline fusion of benzene-m-disulfonic acid, 2235;
– behavior of diphenylsulfone and its sulfonic acids under the action of sulfuric acid, 3189;
– The hydrolysis and isomerization of naphthalene trisulfonic acids, 2231;
– two-step, of 2-chloronaphthalene with monohydrate and oleum, to form disulfonic acids, 2525;
– chloro-, of acetanilide, di- and polysulfonation reactions during, 2623.
Sulfone, 4,4'-diaminodiphenyl, condensation product with p-dimethylaminobenzaldehyde (sulfamethine), preparation, properties, antitubercular activity, 175;
– diphenyl, and its sulfonic acids, behavior under the action of sulfuric acid, 3189.
Sulfones, heterocyclic, cleavage of. p-Nitrophenyl sulfides and sulfones of benzazoles and 4-phenylphthalazine, 2549;

– of benzazoles and 4-phenylphthalazine, preparation, properties, hydrolytic cleavage, comparison with corresponding p-nitrophenyl sulfides, 2549;
– sulfonic acids of, as by-products of sulfonation reactions. Behavior of the disulfonic acid of diphenylsulfone under conditions of alkaline fusion of benzene-m-disulfonic acid, 2235;
– Formation of diphenyl sulfone sulfonic acids in the sulfonation of benzene with oleum, 1379.
Sulfonic acids, of sulfones, see sulfones.
Sulfur, system with diphenylamine – quinoline, metastable equilbria between liquid phases, 2043.
Sulfur chloride, reaction with β-aminoanthraquinone (Hertz reaction), action of HCl, 109.
Sulfuric acid, aqueous dioxan solutions of, variation of electrical conductivity of, with temperature, 2399;
– system with dioxane, physico-chemical analysis of, 397;
– system with potassium sulfate, physicochemical analysis of, 1081.
Sulfur organic compounds. Action of benzosulfodichloro- and benzosulfodibromoamide on alcohol solutions of isoprene, 2447;
– Triphenylphosphazosulfonaryls, preparation, properties, 1027.
Surface tension, of binary systems composed of acetic acid and its chloro derivatives, at 40, 50 and 60°, 3281;
– of binary systems formed by acetamide with acetic acid and its chloro derivatives, 3285;
– of binary systems formed by urea with acetic acid and its chloro derivatives, 1207.
Symmetrization, of methylethoxychlorosilanes, 207.
System, acetamide-acetic acid, density, viscosity, electrical conductivity of, 1485;
– acetamide – monochloroacetic acid, density, viscosity, electrical conductivity, 1489;
– acetamide – trichloroacetic acid, density, viscosity, electrical conductivity, 2089;
– adiagonal reciprocal, of chlorides and sulfates of potassium and cadmium, double decomposition, complex-formation and polymorphism in, 725;
– of chlorides and tungstates of sodium and potassium, 2365;
– aluminum chloride – urea – water, physico-chemical analysis of, 399;
– $(NH_4)_2BeF_4 – NH_4MnF_3 – H_2O$, solubility at 25°, 2039;
– $CdCl_2$-KCl-H_2O, study of complex formation in, using refractometry, 3627;
– chlorides and tungstates of lithium and cadmium, study by the visual-polymetric method, 2977;
– copperammonium sulfate – zincammonium sulfate – water at 20° study of equilibrium in presence of the radioactive indicators Zn^{65} and Cu^{64}, 2033;
– irreversible reciprocal, of chlorides and iodides of sodium and lead, study by visual-polythermal method, 2673;
– irreversible-recipfocal, of sodium and cadmium chlorides and iodides, 1457;
– nonaqueous, aniline-allyl mustard oil, electrolytic dissociation in, 1191;
– phenylhydrazine-chlorophenols, physico-chemical analysis of, 1757;
– potassium chloride – glucose – water, at 25°, solubilities in, 2383;
– potassium chloride – urea – water, at 25°, solubility in, 2983;
– potassium nitrate – silver nitrate, study by the method of electromotive forces, 3275;
– phosphorus pentachloride-tin chloride, electrical conductivity, viscosity, cryoscopy, complex formation, 1535;
– potassium sulfate-sulfuric acid, physicochemical analysis of, T081;
– pyramidon-salicyclic acid-water, phase equilibria in, 1197;
– quinoline – acetic acid, viscosity, density, electrical conductivity of, 1521;
– reciprocal, of lithium and barium silicates and fluorides, study by the visual polythermal method, 735;
– of chlorides and iodides of potassium and lead with internal heterocomplex, 1119;
– of chlorides and orthovanadates of lithium and cadmium, study by the visual-polymetric method, 2977;
– irreverisible, of sulfates and molybdates of lithium and silver, study by the visual polythermal method, 2027;
– of the fluorides and sulfates of lead and potassium, complex formation and double decomposition in, 359;
– with layering, of the chlorides and tungstates of lithium and silver, 1749;
– salicyclic acid-benzine, metastable equilibrium between liquid phases, 3609;
– Na_2Cl_2-K_2Cl_2-$CaSO_4$, equilibrium diagram of, 747;
– stannic chloride – anisole, viscosity and density of, 2697;
– stannic chloride – phenol, viscosity, density, electrical conductivity, vapor pressure, compound formation in, 2371;
– strontium-bismuth, thermal analysis of, 1705;
– sulfuric acid-dioxane, physicochemical analysis of, 397;
– tantalum-selenium, compound formation in, 2651;
– ternary, of five ions Na_2CO_3-K_2Cl_2-K_2SO_4, phase diagram of, 1129;

– urea – acetic acid – monochloroacetic acid, physicochemical analysis of, 3623;
– urea-water-butyric acid, thermal analysis of, 1505;
– water- benzine-salicyclic acid, metastable equilibrium between liquid phases, 3609;
– ternary reciprocal, of chlorides and molybdates of lithium and cadmium, study by the visual-polymetric method, 2977;
– of the chlorides and sulfates of potassium and cadmium, surface of crystallization of, 349;
– of the tungstates and molybdates of lithium and silver, 1749;
– titanium tetrachloride – n-butyl chloroacetate, viscosity, density and conductance at 75 and 80°, compound formation in, 3643;
– urea-formic acid-water, thermal analysis of, 1497;
– water – acetic anhydride -dioxane, physicochemical investigation of, 2685;
– zinc-antimony, enthalpies of formation of compounds in, 321.
Systems, acetamide – benzoic, – cinnamic, -salicyclic, -anthranilic acids, fusibility, viscosity, density, electrical conductivity, chemical interaction, 1493;
– acetamide – phenols (phenol, pyrocatechol, resorcinol, hydroquinone, o-,m-, p-nitrophenol, 2,4-dinitrophenol, 2,4,6-trinitrophenol), physicochemical analysis of, chemical interaction in, 2083;
– aluminum bromide with anisole, pyridine, diphenyl ether, diethyl ether, benzophenone, nitromethane, nitrobenzene, dioxane, dielectric properties of, 1511;
– aqueous ternary, of beryllium chloride with chlorides of first group metals, heterogeneous equilibria in, 1449;
– binary, benzene-ethylbenzene, dibromoethane, – methyl acetate, study by the viscosity-density method, mol. wts. of components, 765;
– chloral – benzyl alcohol, – cyclohexanol, viscosity and density of, 3001;
– with chloral (chloral-acetone-methyl ethyl ketone, – methyl propyl ketone, acetylacetone) viscosity and density of, 3639;
– ethanolamine-pyrocatechol, -resorcinol, – hydroquinone, fusion, viscosity, density and electroconductivity of, 1211;
– formed by urea with acetic acid and its chloro derivatives, density and viscosity of, 2679;
– surface tension of, 1207;
– (ketones, esters, alcohols), viscosity, density, molecular bond energies, 1453;
– of acetamide and benzamide with other organic compounds, complex formation in, 2079;
– of acetamide with acetic acid and its chloro derivatives, surface tension of, 3285;
– of acetic acid and its chloro derivatives, surface tension at 40, 50 and 60°, 3281;
– of chloral with phenol, o-, m- and p-cresol, viscosity, compound formation in, 3291;
– of metatitanates, and chlorides, sulfates, chromates, molybdates, tungstates, pyrophosphates, of sodium and potassium, study by the visual-polythermal method, 1433;
– $CH_3COOC_4H_9$-CCl_3COOH, $CH_3COOC_5H_{11}$-CCl_3COOH and $CCl_3COOC_2H_5$-CCl_3COOH, densities and viscosites at 50, 60 and 70°, 3003;
– conjugated. Addition of alkyl halides to diene hydrocarbons(divinyl, isoprene, diisopropenyl), 1263;
– Condensation of propargylaldehyde with 2-halogeno- and 2-alkoxybutadienes, 2741;
– Condensation of γ-vinylpyridine with diene hydrocarbons, 49;
– Diene syntheses with fluoroprene. Condensation of fluoroprene with derivatives of α, β-unsaturated monobasic acids, 3329;
– Condensations of fluoroprene with α,β-unsaturated aldehydes and ketones, 3055;
– Condensation of fluoroprene with the esters of α, β-unsaturated dibasic acids, 3335;
– dimerization of fluoroprene at 120°, and by condensation with divinyl, 3687;
– Hydrogenation of vinylalkylacetylenes in the presence of colloidal palladium, 2145;
– Reaction of divinylethylacetylene with tertiary butyl chloride and bromide, 431;
– The action of benzosulfodibromoamide on solutions of piperylene in methyl and ethyl alcohols, 2137;
– The action of benzenesulfodichloramide on alcoholic solutions of piperylene, 1785;
– The action of benzosulfodichloro- and benzosulfodibromoamide on alcohol solutions of isoprene, 2447;
– The condensation of dienic hydrocarbons with propiolic acid and its methyl ester, 1779;
– containing dioxane. Physicochemical properties of dioxane solutions of pyrosulfuric acid, 1545;
– dioxane-acetic acid, – acetic anhydride, viscosity, density, surface tension, refractive index, chemical reaction in, 427;
– diphenylamine – quinoline, diphenylamine – quinoline – sulfur, metastable equilibria between liquid phases, 2043;
– $HCOOC_2H_5$-CH_3COOH and $CCl_3COOC_2H_5$-CH_3COOH, viscosity and density of, at 25°, 40° and 60°, 2099;
– hexachloroethane – anthracene, – naphthalene, – p-dichlorobenzene, – benzene,-ethyl trichloroacetate, study by the thermal analysis method, 3615;
– hydroxide, fractional precipitation with ammonia, reciprocal effects, 1093;

– iodine-iodine chloride, exchange reactions in, study by the method of labeled atoms, 1711;
– irreversible reciprocal, of the singular type, with layering from chlorides and nitrates of potassium and silver, and bromides and nitrates of potassium and silver, study by the visual-polythermal fusion method, 19;
– lithium titanate-other salts, interaction in melts, 1739;
– $Hg(NO_3)_2$-KCNS-$Fe(NO_3)_3$-KCl, $Hg(NO_3)_2$-KCNS-$Fe(NO_3)_3$-KBr, study of equilibrium in, by the optical method, 377;
– mixed binary, the components of which possess geometrically similar molecules, viscosity, density and bond energy of, (benzene-pyridine, toluene-α-picoline, toluene-bromobenzene, picoline–bromobenzene, toluene-chlorobenzene, cumene-dimethylaniline, stannic chloride-titanium tetrachloride), 3635;
– oxidation-reduction, role of, in the process of vulcanization with sulfur, 2767;
– PCl_5-HCl-organic solvent, (acetonitrile), complex formation in, 1141;
– $NaCl – CaCl_2 – H_2O$, $KCl – CaCl_2 – H_2O$, vapor pressures of, 1161;
– sodium sulfate – cobalt sulfate, sodium sulfate – nickel sulfate, phase diagrams of, 367;
– $SnBr_4 – CH_2BrCOOH$ and $SbBr_3 – CH_2BrCOOH$, fusibility, viscosity and density in, 2997;
– stannic chloride – nitrobenzene, -m-dinitrobenzene, viscosity, density, compound formation in, 2377;
– stannic chloride – o- and p-nitrophenol, -2,4-dinitrophenol, – p-aminophenol, complex formation in, 2691;
– ternary, antipyrine-chloral hydrate-water, stratification in, 393;
– (methyl methacrylate – acrylonitrile – glycol) esters of methacrylic acid, 2517;
– (methyl methacrylate–acrylonitrile–tetraallyl orthosilicate), copolymerization of, 2513;
– (methyl methacrylate–acrylonitrile–triallyl borate), copolymerization in presence of benzoyl peroxide, 2509;
– of amines, acetic acid and water, electrical conductivity of, 1185;
– $NaNO_3$-NH_4NO_3-H_2O, KNO_3-NH_4NO_3-H_2O and $RbNO_3$-NH_4NO_3-H_2O, physicochemical analysis at 25°C, 1169;
– stratification in, when the component binary systems are homogeneous, 393;
– titanium tetrachloride – n-bityl formate, – isoamyl formate, viscosity, density and conductance, compound formation in, 3297;
– titanium tetrachloride – n-butyl trichloroacetate, – ethyl trichloroacetate, – isobutyl trichloroacetate and isoamyl trichloroacetate, viscosity, density, refractive index, compound formation in, 3643;
– vanadium sulfate-citric acid,-citrates, physicochemical analysis of, 1527.
Tantalum, system with selenium, compound formation in, 2651;
Tantalum carbide, fused, preparation, apparatus, 1089.
Tantalate hydrates, sodium, (penta, hexa), preparation, properties, 1425.
Tantalum pentoxide, mechanism of reaction with sodium hydroxide, 1429.
Taspine, alkaloid from Leontice ewersmannii BGE, structure, cleavage, 2957.
Taurine, homologs, synthesis by the Leuckart reaction, from the corresponding β-ketosulfonic acids, 3263.
Tautomerism. Mobility of the hydrogen atoms of the methyl groups of nitrotoluenes, 961;
– of alkyl β aminovinyl ketones, 3431;
– of derivatives of dipyrazolonyl-phenylmethane, 993;
– of α-pyridone and carbostyril, 2257;
– The lability of hydrogen atoms of the quinaldine methyl group, 2175;
– Transformations and properties of hydroxy- and chloroketocarboxylic acids, 1915.
Temperature, influence on ionic conductance of liquid chemical compounds and systems, 1149.
Terephthalic acid, from oxidation of cyclooctatetraene, 647.
Terpenes, catalytic transformations of. Preparation of optically pure α-pinene from β-pinene, 2635.
Tetralin hydroperoxide, mechanism of transformation in the process of oxidation, 473.
Tetrolic acid, formation by reaction of trimethyl-(2,2,3,3-tetrachlorobutyl)-ammonium iodide with aqueous alkali, 2167.
Tetraphenyl boron, copper, see copper organic compounds, boron organic compounds.
Tetraphenyltin, see tin organic compounds.
Textile chemistry. A study of the comparative reactivity of the hydroxyl groups in cellulose. The distribution of methoxy groups in partly methylated cellulose obtained by the methylation of cellulose with diazomethane, 3755;
– The distribution of methoxy groups in partly methylated cellulose prepared in a medium of bases, 3749;

– Attempted synthesis of 7-aminoheptanoic acid by the partial hydrolysis of pimelodinitrile with hydrogen peroxide, 3103;
– Chemistry of cuprammonium solutions of cellulose. VII. The reaction of polyhydroxy compounds with the ammine complex of copper, 3347;
– Formation of polyamide resins. Participation of polymerization and polycondensation reactions in transformation of ε-caprolactam into polymers, 563;
– Role of phosphoric acid in the study and treatment of cellulose. The swelling and solution of cellulose in phosphoric acid, 3357;
– The change of the chemical heterogeneity of cellulose xanthate during the ripening of viscose, 2205.
Thallium trichloride, complex compounds with pyridine, quinoline and dioxane, preparation, dipole moments, 25.
Thermodynamics. From the Committee on Chemical Thermodynamics at the Division of Chemical Science of the Academy of Sciences of the USSR. Information for scientists doing research in the field of experimental thermochemistry, 3905.
1,2,3-Thiadiazolines, 1,1-dioxides of, see thiazole compounds.
1,3,4-Thiadiazoles, see thiazole compounds.
Thiazole compounds, and the use of the Mannich reaction, letter to the editor, 2021;
– Azomethine dyes from 3-alkyl-1-(carboxy and dicarboxybenz-2')-pyrazolones-5, preparation, analysis, absorption spectra, 3383;
– Derivatives of benzothiazole. Reaction of 2-benzothiazolesulfonic acid with nitrogen bases, 989;
– Derivatives of pyrido-(3,2-d)-thiazole, preparation, properties, 985;
– Mannich reaction with 2,4-dimethylthiazole, 515;
– preparation, properties, antitubercular activity of 2,5-substituted 1,3,4-thiadiazoles, 2885;
– Pyrido-(3,4-d)-thiazole derivatives, preparation, 663;
– Reaction of 2-aminothiazole with carbomethoxysulfanilyl chloride, influence of temperature, duration of the process, solvent, on composition of the product, 3181;
– Reaction of di-(carbomethoxysulfanilyl)-aminothiazole with 2-aminothiazole, kinetics of, 2279;
– Some new hydrazines of the benzothiazole series, preparation, properties, 911;
– Steric hindrance in quaternary salts of 2-arylbenzothiazoles and 2-arylbenzoselenazoles, 3215;
– Structure of thiazole disulfamides, 2287;
– 5-Substituted derivatives of 2,4-dimethylthiazole, synthesis with the aid of organolithium compounds, properties, 65;
– Synthesis of β-chloroalkylmino derivatives of thiazole, by condensing the corresponding haloalkyl derivative with diethanolamine and subsequent chlorination, 3835;
– Synthesis of 4-methyl-5-acetyl-2-aminothiazole and some of its derivatives, properties, biological activity, 3223;
– Thiazolidine-4-carboxylic acid and its derivatives. Products of condensation of α-amino-β-mercapto acids with 4-aminomethylene-2-phenyl-5-oxazolone, 3811;
– 1,2,3-Thiadiazolines, 1,1-dioxides of, (structural analogs of pyrazolones), preparation, bactericidal properties, 3859;
– Thiazolidines, 3-aryl, 2,3-diaryl, synthesis, 589.
2-Thienylmethanes, di-, see methanes.
Thiocyanates. Determination of the solubility of $Co[Hg(CNS)_4]$ as a function of temperature, 387;
– of silver, physicochemical study of, 2049;
– of zinc and cadmium, reaction with antipyrine, 1553.
5-Thiones, 1,3,4-triazole, see triazoles.
Thiophene compounds. Bromine-substituted di-2-thienylmethanes, preparation, properties, reactions, 3797;
– 3-isoamyl, 3-hexyl, 3-p-tolyltetrahydro, preparation, from the corresponding furanidines, 593;
– synthesis of aliphatic amino acids from, α-amino acids, 2893;
– Use of silicoanhydrides of saturated monobasic organic acids for acylation of the thiophene nucleus and formation of ketones, 3717.
Thiophene series, unsaturated ketones of, see ketones.
Thiosulfonic acid, see acids.
Thiourea, aromatic derivatives of, preparation, properties, antitubercular activity, 1021;
– complexes with stannic chloride and bromide, formation, structure of, 3663.
Threonine peptides, see peptides;
– N-benzoyl-O, see peptides.
Tin chloride, system with phosphorus pentachloride, electrical conductivity, viscosity, cryoscopy, complex formation, 1535.
Tin organic compounds. Reaction of tetraphenyltin with organic acids (formic, acetic), to form benzene and basic Sn^{IV} salts, and with acetyl chloride, 3581.
Tin tetrachloride, dipole moments of complexes with organic compounds, 343.
Titanate, lithium, systems with other salts, interaction in melts, 1739.

Titanates, meta, of sodium and potassium, reaction with salts in melts, 1433.
Titanium monoxide, chlorination reactions at 300-700°, 721.
Titanium tetrachloride, dipole moments of complexes with organic compounds, 343;
– reaction with esters of monobasic acids (n-butyl formate and isoamyl formate), 3297;
– systems with n-butyl chloroacetate, n-butyl trichloroacetate, ethyl trichloroacetate, isoamyl trichloroacetate, physicochemical study of, compound formation in, 3643.
Toluenes, dinitro, formation from methylcyclohexenes and methylcyclohexadienes under the action of a nitrating mixture, 1811;
– nitro, mobility of the hydrogen atoms of methyl groups of, (reaction with phthalic anhydride), 961.
p-Toluenesulfonates, of 17 β-hydroxysteroids, see steroid compounds.
o-Toluidides, of diarylglycolic acids and their transformation into 3,3-diaryl-7-methyloxindoles, 239.
Triazenes, aliphatic, aromatic, mechanism of decomposition of, in the presence of water and acids, influence of free radical acceptors, 3307;
– alkyl-aromatic, role of activators in decomposition processes in, and in initiation of polymerization, 3789.
Triazoles. Heterocyclic compounds obtained from hydrazides, synthesis of 1,3,4-triazole-5-thiones, tuberculostatic properties, 2879.
Triethylcarbinol, synthesis from ethylmagnesium bromide and carbon dioxide, properties, 43.
Trimethylamine, reaction with polyhalides to form ammonium salts, 797.
Triols, ethylenic, see acetylene compounds.
Triphenylamine, and p-nitro derivatives, absorption spectra in pure alcohol and in presence of sodium alcoholate, 1941;
– and p-nitro derivatives, UV and visible absorption spectra in concentrated sulfuric acid, 2953;
– see also amines.
Triphenylcarbinol, 2-amino, acyl derivatives of, conversion to 9-phenylacridine, 2283.
Tungstates, and chlorides, of lithium and silver, reciprocal system of, with layering, 1749;
– of sodium and potassium, adiagonal reciprocal system of, study by the visual polythermal method, 2365.
Ultrasonics, effect on aqueous solutions of aromatic hydrocarbons, (benzene, toluene), phenol, effect on absorption spectra, oxidation processes, 2727.
Undecylenic acid, reaction with nitrogen peroxide, 819.
Unsaturated compounds, and their mixtures, curves for the absorption of ozone by, elucidation of structure from, 803;
– bromination of. Bromine addition reactions of allyltrimethyl-ammonium perchlorate, 3037;
– halogenation with aromatic diazo compounds. Reaction of phenyldiazonium chloride and bromide with butadiene-1,3 and some reactions of 4-chloro-1-phenylbutene-2, 3091.
Uracil, 4,5-diamino, triacetyl derivative, preparation, chemical properties, structure, 867.
– 4-methyl, preparation, based on diketene, 1939.
Urea, binary systems with acetic acid and its chloro derivatives, 1207;
– density and viscosity of, 2679;
– system with aluminum chloride-water, physicochemical analysis of, 399;
– system with formic acid-water, thermal analysis of, 1497;
– system with water-butyric acid, thermal analysis of, 1505;
– ternary system with acetic acid – monochloroacetic acid, physicochemical analysis of, 3623.
Urethane, ethyl-N-(2-quinuclidinyl), see quinuclidine compounds.
Vanadates, ortho, and chlorides of lithium and cadmium, diagonal sections of the reciprocal system of, study by the visualpolymetric method, 2977.
Vanadium compounds. Citrate complexes, formation, composition, influence of pH, 1527.
Vanadium oxides, as catalyst for isopropyl alcohol decomposition, 3679.
Vanadyl tartrate complexes, formation, composition, 33.
Vapor pressure, of the system [illegible] $_2O$ and KCl – $CaCl_2$ – H_2O, [illegible].
Vinyl acetate, addition of incomplete esters of acids of phosphorus to, 3463;
Vinylalkylacetylenes, see acetylene compounds.
Vinyl chloride, role of oxygen in the initial stage of polymerization of, 1227.
Viscose, change in chemical heterogeneity of cellulose xanthate, during ripening of, 2205.
Viscosity, of solutions of aluminum chloride in nitromethane, 1753.
Vulcanization, see rubber chemistry.
Water, determination in complex compounds (hydrated cobalt salts), using the Fischer reagent, 2993;
– system with acetic anhydride – dioxane, physicochemical investigation of, 2685;
– system with aluminum chloride – urea, physicochemical analysis of, 399;
– system with $(NH_4)_2BeF_4$ – NH_4MnF_3, solubility at 25°, 2039;

– system with antipyrine-chloral hydrate, stratification in, 393;
– system with $CdCl_2$-KCl, study of complex formation in, using refractometry, 3627;
– system with copperammonium sulfatezincammonium sulfate, at 20°, equilibrium in presence of the radioactive indicators Zn^{65} and Cu^{64}, 2033;
– system with potassium chloride – glucose, at 25°, solubilities in, 2383;
– system with pyramidon-salicylic acid phase equilibria in, 1197;
– system with urea-butyric acid, thermal analysis of, 1505;
– system with urea-formic acid, thermal analysis of, 1497;
– systems with NaCl-$CaCl_2$, KCl-$CaCl_2$, vapor pressures of, 1161;
– systems with $NaNO_3$-NH_4NO_3, KNO_3-NH_4NO_3, $RbNO_3$-NH_4NO_3, physicochemical analysis at 25°C, 1169;
– temary system with salicylic acid – benzine, metastable equilibrium between liquid phases, 3609.
Xanthate, cellulose, see cellulose.
p-Xylene, ω,ω'-diamino, and derivatives, preparation, properties, 585.
Zinc, system with antimony, enthalpies of formation of compounds in, 321.
Zincammonium sulfate, system with copperammonium sulfate – water, at 20°, equilibrium in presence of the radioactive indicators Zn^{65} and Cu^{64}, 2033.
Zinc sulfide liminophores, see luminophores.
Zinc thiocyanate, see thiocyanates.
